With the help of performance reports of Implementation Engineer - Data Protection Exam (NS0-528) Desktop practice exam software, you can gauge and improve your growth. You can also alter the duration and Network Appliance NS0-528 Questions numbers in your practice tests. Questions of this Implementation Engineer - Data Protection Exam (NS0-528) mock test closely resemble the format of the actual test.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.
Topic 2	<ul style="list-style-type: none">• NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.

Topic 3	<ul style="list-style-type: none"> • NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.
Topic 4	<ul style="list-style-type: none"> • NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.
Topic 5	<ul style="list-style-type: none"> • Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.

NS0-528 Valid Exam Pattern, NS0-528 Latest Braindumps

Our Network Appliance NS0-528 practice materials are suitable to exam candidates of different levels. And after using our NS0-528 learning prep, they all have marked change in personal capacity to deal with the Network Appliance NS0-528 Exam intellectually. The world is full of chicanery, but we are honest and professional in this area over ten years.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q172-Q177):

NEW QUESTION # 172

What is the importance of disaster recovery planning in a data protection solution?

- A. To ensure data availability in case of a disaster
- B. To ensure data compliance in case of a disaster
- C. To ensure data confidentiality in case of a disaster
- D. To ensure data integrity in case of a disaster

Answer: A

NEW QUESTION # 173

After deploying a new on-premises AFF cluster, you have been tasked with backing it up to StorageGRID. You have requested the NetApp ONTAP One licenses.

To successfully deploy this solution, what else needs to be deployed through NetApp ONTAP System Manager?

- A. NetApp Cloud Backup service
- B. NetApp BlueXP observability
- C. NetApp BlueXP tiering
- D. NetApp SnapMirror Cloud API license

Answer: D

Explanation:

To back up data from an on-premises AFF cluster to StorageGRID, you must use SnapMirror Cloud, which requires the SnapMirror Cloud API license to be deployed through ONTAP System Manager - even when using ONTAP One. This license enables integration with object storage like StorageGRID for cloud backup.

NEW QUESTION # 174

What is a cloud tiering policy in NetApp ONTAP?

- A. A set of rules for moving data between on-premises and cloud storage
- B. A set of rules for compressing data to reduce storage space
- C. A set of rules for optimizing data access
- D. A set of rules for encrypting data to protect it from unauthorized access

Answer: A

NEW QUESTION # 175

Your customer wants to create application-aware backups of their SAP HANA databases, which are running on VMware vSphere. What two steps must be completed to create these backups? (Choose two.)

- A. Install the plug-in for SAP HANA in SnapCenter software.
- B. Install the plug-in for VMware vSphere in SnapCenter software.
- C. Install the plug-in for Unix file systems.
- D. Create a policy when given the retention requirements by the customer.

Answer: A,D

Explanation:

To create application-aware backups of SAP HANA databases:

* You must install the SnapCenter Plug-in for SAP HANA, which provides database-consistent backup and restore operations.

* You must also create a backup policy that aligns with the customer's retention requirements to manage how long backups are kept and how often they're performed.

NEW QUESTION # 176

You have an 8-node MetroCluster IP configuration running NetApp ONTAP 9.14.1 software and using the NetApp ONTAP Mediator service. There is an HA failure in one DR group.

What will happen in this scenario?

- A. Mediator-assisted Automatic Unplanned Switchover (MAUSO) will be triggered.
- B. Switchover will happen only if the failure domain is set to auto-on-cluster-disaster.
- C. Mediator-assisted Automatic Unplanned Switchover (MAUSO) will not be triggered.
- D. Switchover will happen only for the failed HA pair.

Answer: A

Explanation:

In an 8-node MetroCluster IP configuration, if one DR group (i.e., one HA pair at a site) fails and the ONTAP Mediator is in use, MAUSO will be triggered. ONTAP 9.14.1 supports automatic detection and unplanned switchover for such cases using the Mediator to validate the failure and coordinate the takeover.

NEW QUESTION # 177

.....

Our NS0-528 test materials boost three versions and they include the PDF version, PC version and the APP online version. The clients can use any electronic equipment on it. If only the users' equipment can link with the internet they can use their equipment to learn our NS0-528 qualification test guide. They can use their cellphones, laptops and tablet computers to learn our NS0-528 Study Materials. The language is also refined to simplify the large amount of information. So the learners have no obstacles to learn our NS0-528 certification guide.
