DOWNLOAD the newest Test4Cram Cloud-Deployment-and-Operations PDF dumps from Cloud Storage for free:  
[https://drive.google.com/open?id=1JPuNrp5mjALEBov\\_uhXXlc8DSrzbE9ip](https://drive.google.com/open?id=1JPuNrp5mjALEBov_uhXXlc8DSrzbE9ip)

According to the needs of all people, the experts and professors in our company designed three different versions of the Cloud-Deployment-and-Operations study materials for all customers. The three versions are very flexible for all customers to operate. According to your actual need, you can choose the version for yourself which is most suitable for you to preparing for the coming exam. All the Cloud-Deployment-and-Operations Study Materials of our company can be found in the three versions. It is very flexible for you to use the three versions of the Cloud-Deployment-and-Operations study materials to preparing for your coming exam.

Free update for Cloud-Deployment-and-Operations Study Guide materials are available, that is to say, in the following year, you can get the latest information about the Cloud-Deployment-and-Operations exam dumps without spending extra money. In addition, Cloud-Deployment-and-Operations study guide of us is compiled by experienced experts, and they are quite familiar with the dynamics of the exam center, so that if you choose us, we can help you to pass the exam just one time, in this way, you can save your time and won't waste your money. We also have online and offline chat service stuff, if any other questions, just contact us.

# Reliable Cloud-Deployment-and-Operations Practice Questions | Cloud-Deployment-and-Operations Exam Blueprint

If your budget is limited, but you need complete exam material. Then you can try the Test4Cram's WGU Cloud-Deployment-and-Operations Exam Training materials. Test4Cram can escort you to pass the IT exam. Training materials of Test4Cram are currently the most popular materials on the internet. Cloud-Deployment-and-Operations Exam is a milestone in your career. In this competitive world, it is more important than ever. We guarantee that you can pass the exam easily. This certification exam can also help you tap into many new avenues and opportunities. This is really worth the price, the value it creates is far greater than the price.

## WGU Cloud Deployment and Operations Sample Questions (Q17-Q22):

### NEW QUESTION # 17

(Which type of support plan provides a technical account manager and full use of Trusted Advisor?)

- A. Business
- B. Developer
- C. Standard
- **D. Enterprise**

**Answer: D**

Explanation:

The Enterprise support plan provides a technical account manager (TAM) and full use of Trusted Advisor, offering proactive guidance and comprehensive access to all checks. This plan is designed for large-scale, mission-critical workloads. The WGU Cloud Deployment and Operations Study Guide (Section 6.4, AWS Support Plans) states, "The Enterprise support plan includes a dedicated Technical Account Manager and full Trusted Advisor access, providing 24/7 support and proactive optimization recommendations." Developer, Standard, and Business plans offer limited or no TAM support and partial Trusted Advisor access.

### NEW QUESTION # 18

(An administrator deploys an EC2 instance with the public IP address 54.18.127.233 into a newly created VPC in us-west-2. The EC2 instance must be accessible via ec2-public-54.18.127.233.us-west-2.compute.amazonaws.com from the internet. Which solution should be used?)

- A. Assign a resource-based name to the EC2 instance
- B. Assign a resource tag to the EC2 instance
- C. Set the VPC attribute enableDnsSupport to false
- **D. Set the VPC attribute enableDnsHostnames to true**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To make the EC2 instance accessible via a public DNS hostname like ec2-public-54.18.127.233.us-west-2.

compute.amazonaws.com, the administrator must set the VPC attribute enableDnsHostnames to true. This enables the automatic assignment of public DNS hostnames to instances with public IP addresses in the VPC.

The WGU Cloud Deployment and Operations Study Guide (Section 3.2, VPC Configuration) states, "Setting enableDnsHostnames to true in the VPC configuration ensures that EC2 instances with public IPs receive a public DNS hostname (e.g., ec2-public-`<ip>`.`<region>`.compute.amazonaws.com), facilitating internet accessibility." Resource tags, disabling DNS support, and resource-based names do not enable this functionality.

### NEW QUESTION # 19

(Which solution should be used to identify and shut down idle EC2 instances in an AWS account?)

- A. CloudSearch
- B. CloudTrail
- **C. CloudWatch**
- D. CloudFront

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

CloudWatch should be used to identify and shut down idle EC2 instances by monitoring metrics such as CPU utilization or network activity. Custom alarms can be set to trigger an AWS Lambda function or Systems Manager automation to terminate idle instances, optimizing costs. The WGU Cloud Deployment and Operations Study Guide (Section 4.1, CloudWatch Metrics) states, "CloudWatch can monitor EC2 instance metrics like CPUUtilization; an alarm can be configured to invoke a Lambda function to terminate idle instances, ensuring cost efficiency." CloudFront, CloudSearch, and CloudTrail are not designed for this monitoring and automation task.

#### NEW QUESTION # 20

(A cloud engineer needs to notify the response team whenever a high-security web server responds with a 403 Forbidden error. Which two steps can enable this functionality? Choose 2 answers.)

- **A. Create an alarm for the metric filter to deliver alerts using Amazon SNS**
- B. Send alarms from the Lambda function using Amazon SQS
- **C. Define a metric filter for Apache logs in CloudWatch**
- D. Bind a Lambda function to an Apache process

**Answer: A,C**

Explanation:

To notify a response team when a high-security web server returns a 403 Forbidden error, two key steps are required. First, define a metric filter for Apache logs in CloudWatch to detect the 403 error code within the log data. This involves setting up a filter pattern to match "403" in the Apache access logs. Second, create an alarm for the metric filter and configure it to deliver alerts using Amazon SNS, which supports email or other notifications to the response team. The WGU Cloud Deployment and Operations Study Guide (Section 4.2, CloudWatch Logs and Alarms) confirms that metric filters and SNS-integrated alarms are the standard approach for monitoring and alerting on log-based events. Options B and D are incorrect as they involve unnecessary or unsupported configurations (e.g., binding Lambda to Apache or using SQS for alarms).

#### NEW QUESTION # 21

(Which service should be used to horizontally scale Amazon EC2 instances?)

- A. Elastic Beanstalk
- B. Elastic network interface
- **C. Elastic Load Balancing**
- D. Elastic IPs

**Answer: C**

Explanation:

Elastic Load Balancing (ELB) should be used to horizontally scale Amazon EC2 instances by distributing incoming traffic across multiple instances, improving availability and fault tolerance. ELB works in conjunction with Auto Scaling groups to add or remove instances based on demand. The WGU Cloud Deployment and Operations Study Guide (Section 3.2, Elastic Load Balancing) notes, "Elastic Load Balancing distributes traffic across EC2 instances, enabling horizontal scaling as part of an Auto Scaling group to handle increased load efficiently." Elastic IPs, elastic network interfaces, and Elastic Beanstalk do not provide this scaling functionality.

#### NEW QUESTION # 22

.....

Once you have practiced on our WGU Cloud Deployment and Operations test questions, the system will automatically memorize and analyze all your practice. You must finish the model test in limited time. There have a timer on the right of the interface. Once you begin to do the exercises of the Cloud-Deployment-and-Operations test guide, the timer will start to work and count down. If you don't finish doing the exercises, all your exercises of the Cloud-Deployment-and-Operations Exam Questions will be delivered automatically. Then the system will generate a report according to your performance. You will clearly know where you are good at or not.
