Take a Leap Forward in Your Career by Earning WGU Cloud-Deploymentand-Operations

You can also set the number of WGU Cloud-Deployment-and-Operations dumps questions to attempt in the practice test and time as well. The web-based WGU Cloud-Deployment-and-Operations practice test software needs an active internet connection and can be accessed through all major browsers like Chrome, Edge, Firefox, Opera, and Safari. Our Desktop-based WGU Cloud-Deployment-and-Operations Practice Exam Software is very suitable for those who don't have an internet connection. You can download and install it within a few minutes on Windows-based PCs only and start preparing for the WGU Cloud Deployment and Operations exam.

WGU Cloud Deployment and Operations Sample Questions (Q41-Q46):

NEW QUESTION #41

(Which AWS solution can be used to send events from Shopify?)

- A. Service events
- B. CloudTrail events
- C. EventBridge
- D. IoT Events

Answer: C

Explanation

Amazon EventBridge is the AWS solution that can be used to send events from external sources like Shopify. EventBridge supports integration with third-party applications through its event bus, allowing custom events (e.g., from Shopify via webhooks) to be ingested and routed to AWS services or targets. The WGU Cloud Deployment and Operations Study Guide

(Section 4.3, EventBridge) notes that EventBridge is designed for event ingestion from SaaS applications, making it suitable for Shopify integration. CloudTrail, IoT Events, and Service events are not designed for this purpose.

NEW QUESTION #42

(A company is using Route 53 for Domain Name System (DNS) hosting. The company requires a zone that should only be accessible from instances in a Virtual Private Cloud (VPC). Which type of hosted zone should be used?)

- A. DNS Zone
- B. Private Zone
- C. Public Hosted Zone
- D. Lightsail DNS Zone

Answer: B

Explanation:

A Private Hosted Zone in Amazon Route 53 should be used to restrict DNS resolution to instances within a Virtual Private Cloud (VPC), ensuring that the zone is only accessible internally. This isolates DNS services from public internet access. The WGU Cloud Deployment and Operations Study Guide (Section 3.1, Route 53 Hosted Zones) states, "A Private Hosted Zone in Route 53 limits DNS resolution to resources within a specified VPC, preventing external access and enhancing security for internal services." Public Hosted Zones, DNS Zones, and Lightsail DNS Zones do not provide this VPC-specific restriction.

NEW QUESTION #43

(Which two languages are used by CloudFormation to define infrastructure? Choose 2 answers.)

- A. JSON
- B. YAML
- C. C#
- D. XML

Answer: A,B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

AWS CloudFormation uses YAML and JSON languages to define infrastructure as code (IaC) templates, specifying resources, parameters, and configurations. These formats are human-readable and support the creation of stacks for provisioning AWS resources. The WGU Cloud Deployment and Operations Study Guide (Section 5.3, CloudFormation) states, "CloudFormation templates can be written in YAML or JSON, both of which are supported for defining infrastructure resources like EC2 instances and S3 buckets." XML and C# are not supported languages for CloudFormation templates.

NEW QUESTION #44

(A company has implemented multifactor authentication (MFA) for access to its AWS tenant. Which API call is needed to perform MFA before accessing a resource?)

- A. GetSessionToken
- B. GetCallerIdentity
- C. GetFederationToken
- D. DecodeAuthorizationMessage

Answer: A

Explanation:

The 'GetSessionToken' API call is needed to perform MFA before accessing a resource, as it generates temporary security credentials for an IAM user after MFA validation. This ensures secure access to AWS resources. The WGU Cloud Deployment and Operations Study Guide (Section 6.2, IAM and MFA) states,

"The `GetSessionToken` API is used with MFA to obtain temporary credentials, requiring a valid MFA code to authenticate the user before resource access is granted." GetCallerIdentity, GetFederationToken, and DecodeAuthorizationMessage serve different purposes and do not handle MFA authentication.

NEW QUESTION #45

(Which type of support plan provides a technical account manager and full use of Trusted Advisor?)

- A. Standard
- B. Enterprise
- C. Business
- D. Developer

Answer: B

Explanation:

The Enterprise support plan provides a technical account manager (TAM) and full use of Trusted Advisor, offering proactive guidance and comprehensive access to all checks. This plan is designed for large-scale, mission-critical workloads. The WGU Cloud Deployment and Operations Study Guide (Section 6.4, AWS Support Plans) states, "The Enterprise support plan includes a dedicated Technical Account Manager and full Trusted Advisor access, providing 24/7 support and proactive optimization recommendations." Developer, Standard, and Business plans offer limited or no TAM support and partial Trusted Advisor access.

NEW QUESTION #46

....

Now we can say that WGU Cloud Deployment and Operations (Cloud-Deployment-and-Operations) exam questions are real and top-notch WGU Cloud-Deployment-and-Operations exam questions that you can expect in the upcoming WGU Cloud Deployment and Operations (Cloud-Deployment-and-Operations) exam. In this way, you can easily pass the WGU Cloud-Deployment-and-Operations exam with good scores. The countless WGU Cloud-Deployment-and-Operations Exam candidates have passed their dream WGU Cloud-Deployment-and-Operations certification exam and they all got help from real, valid, and updated Cloud-Deployment-and-Operations practice questions, You can also trust on GetValidTest and start preparation with confidence.
