Good opportunities are always for those who prepare themselves well. You should update yourself when you are still young. Our Cloud-Deployment-and-Operations study materials might be a good choice for you. The contents of our Cloud-Deployment-and-Operations learning braindumps are the most suitable for busy people. And we are professional in this field for over ten years. Our Cloud-Deployment-and-Operations Exam Questions are carefully compiled by the veteran experts who know every detail of the content as well as the displays. Just have a try and you will love them!

Customers who purchased our Cloud-Deployment-and-Operations study guide will enjoy one-year free update and we will send the latest one to your email once we have any updating about the Cloud-Deployment-and-Operations dumps pdf. You will have enough time to practice our Cloud-Deployment-and-Operations Real Questions because there are correct answers and detailed explanations in our learning materials. Please feel free to contact us if you have any questions about our products.

New Cloud-Deployment-and-Operations Test Preparation - Study Cloud-Deployment-and-Operations Demo

As the unprecedented intensity of talents comes in great numbers, what abilities should a talent of modern time possess and finally walk to the success? Well, of course it is Cloud-Deployment-and-Operations exam qualification certification that gives you capital of standing in society. Our Cloud-Deployment-and-Operations preparation materials display a brand-new learning model and a comprehensive knowledge structure on our official exam bank, which aims at improving your technical skills and creating your value to your future. You will be bound to pass the Cloud-Deployment-and-Operations Exam with our advanced Cloud-Deployment-and-Operations exam questions.

WGU Cloud Deployment and Operations Sample Questions (Q60-Q65):

NEW QUESTION # 60

(What should be used to monitor estimated AWS charges?)

- A. Pricing Calculator
- **B. Billing alarm**
- C. Forecast
- D. Cognito

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A Billing alarm in Amazon CloudWatch should be used to monitor estimated AWS charges by setting thresholds on cost metrics and triggering notifications when exceeded. This helps manage budgets effectively.

The WGU Cloud Deployment and Operations Study Guide (Section 7.4, Cost Monitoring) states, "Billing alarms in CloudWatch monitor estimated charges against a defined threshold, sending alerts via SNS to prevent cost overruns." Cognito handles user authentication, Pricing Calculator estimates costs pre-deployment, and Forecast predicts usage, none of which monitor real-time charges.

NEW QUESTION # 61

(Which AWS monitoring feature is used to process events using AWS Lambda?)

- A. Logs
- **B. Rules**
- C. Targets
- D. Metrics

Answer: B

Explanation:

The AWS monitoring feature used to process events with AWS Lambda is CloudWatch Events, specifically through the use of rules. Rules define the events to monitor (e.g., based on event patterns) and specify targets like AWS Lambda functions to process those events. The WGU Cloud Deployment and Operations Study Guide (Section 4.3, CloudWatch Events) explains that rules are the core component for event-driven architectures, enabling automation by linking events to Lambda for processing. Metrics, targets, and logs are related but not the primary feature for this function.

NEW QUESTION # 62

(Which two locations can Amazon Inspector publish its findings in when it has detected an anomaly? Choose 2 answers.)

- A. CloudTrail
- **B. CloudWatch**
- **C. SNS**
- D. SQS

Answer: B,C

Explanation:

Amazon Inspector can publish its findings when detecting anomalies to Amazon SNS for real-time notifications and to CloudWatch for metric and event logging, enabling monitoring and response. The WGU Cloud Deployment and Operations Study Guide (Section 6.2, Amazon Inspector) states, "Inspector findings are published to SNS for immediate alerts and to CloudWatch for detailed logging, allowing integration with other AWS services for anomaly response." CloudTrail logs API calls, and SQS is a messaging queue, neither of which are primary destinations for Inspector findings.

NEW QUESTION # 63

(A company that uses five Elastic IP addresses does not want to request more from AWS. Which solution should be used to route requests to a healthy endpoint?)

- A. Adjust the TTL of the IP packets
- **B. Register a DNS name to an auto-assigned public IP address**
- C. Edit the route table for the VPC
- D. Use Systems Manager to update endpoints

Answer: B

Explanation:

To route requests to a healthy endpoint without requesting additional Elastic IP addresses, the company should register a DNS name to an auto-assigned public IP address using a service like Route 53. This leverages dynamic DNS to distribute traffic, reducing reliance on fixed EIPs. The WGU Cloud Deployment and Operations Study Guide (Section 3.1, Route 53) states, "Registering a DNS name with an auto-assigned public IP in Route 53 allows traffic routing to healthy instances, avoiding the need for additional

Elastic IP addresses." TTL adjustment, route table edits, and Systems Manager are not relevant solutions.

NEW QUESTION # 64

(An AWS SysOps administrator needs to configure Amazon Route 53 to load balance customer requests across multiple identically configured websites. The load balancing method must ensure that the customer requests are directed to the website that offers the shortest round-trip time. Which routing policy should be used?)

- A. Latency
- B. Geolocation
- C. Geoproximity
- D. Weighted

Answer: A

Explanation:

The latency routing policy in Amazon Route 53 should be used to direct customer requests to the website with the shortest round-trip time (RTT). This policy routes traffic to the AWS region with the lowest latency based on the user's location, optimizing performance. The WGU Cloud Deployment and Operations Study Guide (Section 3.1, Route 53 Routing Policies) states, "The latency-based routing policy in Route 53 measures RTT to direct users to the region with the lowest latency, improving user experience across multiple websites." Geolocation, geoproximity, and weighted policies do not prioritize RTT in this manner.

NEW QUESTION # 65

.....

As old saying goes, no pains, no gains. You must depend on yourself to acquire what you want. No one can substitute you with the process. Of course, life has shortcut, which can ensure you have a bright future. Our Cloud-Deployment-and-Operations training quiz will become your new hope. As the most popular exam provider in the market, we are warmly praised and we can receive thousands of the grateful feedbacks from our worthy customers on Cloud-Deployment-and-Operations Exam Questions. please trust and buy our Cloud-Deployment-and-Operations study materials!
