You do not worry about that you get false information of Cloud-Digital-Leader guide materials. According to personal preference and budget choice, choosing the right goods to join the shopping cart. The 3 formats of Cloud-Digital-Leader study materials are PDF, Software/PC, and APP/Online. Each format has distinct strength and shortcomings. We have printable PDF format prepared by experts that you can study our Cloud-Digital-Leader training engine anywhere and anytime as long as you have access to download. We also have installable software application which is equipped with Cloud-Digital-Leader simulated real exam environment.

It is not hard to know that Cloud-Digital-Leader study materials not only have better quality than any other study materials, but also have better quality. On the one hand, we can guarantee that you will pass the Cloud-Digital-Leader exam easily if you learn our Cloud-Digital-Leader Study Materials; on the other hand, you will learn a lot of useful knowledge from our Cloud-Digital-Leader learning braindump. Are you ready? You can free download the demo of our Cloud-Digital-Leader study materials on the web first.

Pass Cloud-Digital-Leader Test, Cloud-Digital-Leader Actual Test

As the content of the Cloud-Digital-Leader exam is changing from time to time, you may feel anxious that it seems too hard to know the changes. Now, all complicate tasks have been done by our experts. They have rich experience in predicating the Cloud-Digital-Leader exam. Then you are advised to purchase the study materials on our websites. Also, you can begin to prepare the Cloud-Digital-Leader Exam. You are advised to finish all exercises of our Cloud-Digital-Leader preparation questions and pass the exam by the first attempt very easily.

Google Cloud Digital Leader Sample Questions (Q147-Q152):

NEW QUESTION # 147

Which Google Cloud product or feature makes specific recommendations based on security risks and compliance violations?

- A. Google Cloud firewalls
- B. Cloud Deployment Manager
- C. Google Cloud Armor
- D. Security Command Center

Answer: D

NEW QUESTION # 148

Which of the following options is/are correct about Preemptible VMs?

- A. Preemptible VMs don't have fixed pricing.
- B. You can not use Preemptible VMs at fault-tolerant workloads such as high-performance computing, big data and analytics, continuous integration/continuous delivery (CI/CD), rendering/transcoding, and testing.
- C. Both A & B
- D. None of the Above.

Answer: D

Explanation:

Explanation

Preemptible VMs:

Predictable and low cost

Preemptible VMs are up to 80% cheaper than regular instances. Pricing is fixed so you will always get low cost and financial predictability, without worrying about variable market pricing.

Expand your batch processing

Supplement your regular VMs with lower-cost, preemptible instances to finish your compute-intensive work faster, saving you time and money. Throw preemptible VMs at fault-tolerant workloads such as high performance computing, big data and analytics, continuous integration/continuous delivery (CI/CD), rendering/transcoding, and testing.

Get more from your containers

Containers are naturally stateless and fault tolerant, making them a great fit for preemptible VMs! You save on your containerized workloads today with these affordable compute instances. Take advantage of Google Kubernetes Engine for your containerized workloads and Managed Instance Groups to painlessly and seamlessly recover from preemptions.

Enable it instantly

Simply add --preemptible to the gcloud command line and you're off to the races. There's no bidding to code for, and with per-second billing, just shut down your VMs as soon as you're done.

NEW QUESTION # 149

An organization wants to introduce a new image recognition login system What should the organization do to follow SRE principles?

- A. Roll out the new system to a subset of employees to test it out
- B. Avoid rolling out the new system because it may have security flaws
- C. Roll out the new system to all employees to collect as much data as possible
- D. Avoid rolling out the new system because it may violate privacy policy

Answer: A

Explanation:

To follow Site Reliability Engineering (SRE) principles, the recommended approach when introducing a new system, like an image recognition login system, is to minimize risk and test in a controlled environment. SRE emphasizes progressive rollouts and monitoring to ensure reliability, stability, and security.

Option A: Roll out the new system to a subset of employees to test it out is the correct answer because this aligns with SRE practices, such as:

* Canary Releases: Deploying a new feature to a small group of users (subset of employees) allows the organization to test the system in a real-world environment with minimal risk. This practice helps identify any potential issues, gather feedback, and monitor system behavior without impacting the entire organization.

* Gradual Rollouts: SRE encourages gradual rollouts to detect and mitigate any failures early, reducing the blast radius in case of a malfunction or security issue. This ensures the reliability of the system while maintaining service quality.

* Monitoring and Observability: Rolling out to a subset allows for comprehensive monitoring and collection of metrics to ensure the system performs as expected. If issues arise, they can be quickly identified and resolved before a wider deployment.

Option B: Roll out the new system to all employees to collect as much data as possible is not advisable under SRE principles because it poses a higher risk of widespread failure or security issues.

Option C: Avoid rolling out the new system because it may have security flaws and Option D: Avoid rolling out the new system because it may violate privacy policy are also incorrect in the context of SRE.

While security and privacy are crucial, outright avoidance does not align with SRE practices. Instead, risk is managed through controlled rollouts, testing, and monitoring.

NEW QUESTION # 150

Your organization is releasing its first publicly available application in Google Cloud. The application is critical to your business and customers and requires a 2-hour SLA.

How should your organization set up support to minimize costs?

- A. Enroll in Standard Support
- **B. Enroll in Enhanced Support**
- C. Enroll in Premium Support
- D. Enroll in Basic Support

Answer: B

Explanation:

Reference: <https://www.secureauth.com/enhanced-support-offering/>

SecureAuth is dedicated to providing the ensuring the long term success of your SecureAuth SaaS IAM deployment Text Description automatically generated

NEW QUESTION # 151

Your organization wants to run a container-based application on Google Cloud. This application is expected to increase in complexity. You have a security need for fine-grained control of traffic between the containers.

You also have an operational need to exercise fine-grained control over the application's scaling policies.

What Google Cloud product or feature should your organization use?

- A. App Engine
- B. Cloud Run
- **C. Google Kubernetes Engine cluster**
- D. Compute Engine virtual machines

Answer: C

Explanation:

Google Kubernetes Engine GKE seems a better fit since the requirement is for "security need for fine-grained control of traffic between the containers" and "fine-grained control over scaling policies". Such level of control is easier on GKE than Cloud Run. Text Description automatically generated

When it comes to managed Kubernetes services, Google Kubernetes Engine (GKE) is a great choice if you are looking for a container orchestration platform that offers advanced scalability and configuration flexibility. GKE gives you complete control over every aspect of container orchestration, from networking, to storage, to how you set up observability—in addition to supporting stateful application use cases. However, if your application does not need that level of cluster configuration and monitoring, then fully managed Cloud Run might be the right solution for you.

Fully managed Cloud Run is an ideal serverless platform for stateless containerized microservices that don't require Kubernetes features like namespaces, co-location of containers in pods (sidecars) or node allocation and management.

NEW QUESTION # 152

.....

Now in such a Internet so developed society, choosing online training is a very common phenomenon. BraindumpQuiz is one of many online training websites. BraindumpQuiz's online training course has many years of experience, which can provide high quality learning material for examinee participating in Google Certification Cloud-Digital-Leader Exam and satisfy all the needs of the students.

Pass Cloud-Digital-Leader Test: <https://www.braindumpquiz.com/Cloud-Digital-Leader-exam-material.html>

Online test engine brings users a new experience that you can feel the atmosphere of Cloud-Digital-Leader valid test, Google Cloud-Digital-Leader Valid Study Notes However, if you fail the exam regretfully, we promise you a full refund, According to our center data shown, the pass rate of Pass Cloud-Digital-Leader Test - Google Cloud Digital Leader valid test is up to 95%, Our Pass Cloud-Digital-Leader Test - Google Cloud Digital Leader training vce is affordable, latest and best quality with detailed answers, which can overcome the difficulty of real exam

What hardware and software is required for me Cloud-Digital-Leader to jailbreak my iOS device, Internal investigations sponsored by an organization can be even more lenient, Online test engine brings users a new experience that you can feel the atmosphere of Cloud-Digital-Leader valid test.

Google Cloud Digital Leader Study Guide Provides You With 100% Assurance of Getting Certification - BraindumpQuiz

However, if you fail the exam regretfully, we promise Pass Cloud-Digital-Leader Test you a full refund, According to our center data shown, the pass rate of Google Cloud Digital Leader valid test is up to 95%.

Our Google Cloud Digital Leader training vce is affordable, latest Cloud-Digital-Leader New Test Bootcamp and best quality with detailed answers, which can overcome the difficulty of real exam, We know that if you really want to pass the exam, our Cloud-Digital-Leader Actual Test study materials will definitely help you by improving your hit rate as a development priority.
