

CMAA Construction-Manager Exam | Construction-Manager Exam Actual Tests - Download Demo Free of Valid Construction-Manager Test Questions

Our Construction-Manager exam materials can help you stand out in the fierce competition. After using our Construction-Manager study questions, you have a greater chance of passing the Construction-Manager certification, which will greatly increase your soft power and better show your strength. Our Construction-Manager training guide can bring you something. After you have used our Construction-Manager learning braindump, you will certainly have your own experience. Now let's take a look at why a worthy product of your choice is our Construction-Manager actual exam.

Students are given a fixed amount of time to complete each test, thus CMAA Exam Questions candidate's ability to control their time and finish the CMAA Construction-Manager exam in the allocated time is a crucial qualification. Obviously, this calls for lots of practice. Taking TestInsides Construction-Manager Practice Exam helps you get familiar with the Certified Construction Manager (CCM) (Construction-Manager) exam questions and work on your time management skills in preparation for the real Certified Construction Manager (CCM) (Construction-Manager) exam.

>> Construction-Manager Exam Actual Tests <<

Valid CMAA Construction-Manager Test Questions, Construction-Manager Reliable Exam Papers

The supremacy of TestInsides in the tech sector solely relies on its competency to offer its users updated and real Construction-Manager exam dumps. Our dedicated team takes feedback from experts all around the world to update its Construction-Manager actual dumps. This practice material will make your preparation for the CMAA Construction-Manager examination super easy and effective.

CMAA Certified Construction Manager (CCM) Sample Questions (Q55-Q60):

NEW QUESTION # 55

The contract documents normally require which party/parties to coordinate the transfer of spare parts and warranties to the owner?

- A. Designer
- **B. CM**
- C. CxA
- D. Regulatory agencies

Answer: B

Explanation:

According to the CMAA Construction Management Standards of Practice (SOP), within Contract Administration and Project Closeout, the Construction Manager (CM) is responsible for coordinating all activities related to project turnover, including ensuring that spare parts, warranties, guarantees, and maintenance manuals are transferred properly to the owner.

CMAA states:

"The Construction Manager shall coordinate and verify that all deliverables required by the contract, including spare parts, warranties, record drawings, and operation and maintenance manuals, are received, reviewed, and transmitted to the Owner prior to project closeout." While the contractor is responsible for providing the spare parts and warranties per the contract, the CM is explicitly tasked with coordinating the transfer and verifying completion. Regulatory agencies do not perform this function, commissioning authorities (CxA) focus on system performance, and the designer's role is typically limited to verification or approval of submittals—not physical coordination.

References (CMAA Documents):

CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 5 - Contract Administration, Section: "Project Closeout and Turnover." CMAA CM Study Guide, Contract Administration Domain, Objective 5.6: "Coordinate turnover, documentation, and warranties."

NEW QUESTION # 56

A CM is providing support on a \$150 million construction project. The agency has a well-developed safety program; however, the contractor is planning to use an innovative, high-risk method for constructing the project. To minimize the owner's risk, the CM should recommend that the owner

- A. modify the CM contract to include safety management to protect the owner's interests.
- B. provide a safety coordinator to perform the necessary project safety functions on behalf of the contractor.
- C. ensure they have a contractor-controlled insurance program (CCIP) to cover the safety risk for the project.
- **D. have the contractor submit a safety management plan for review and approval by the owner.**

Answer: D

Explanation:

In the CMAA Standards of Practice, Chapter 7 - Safety Management, the Construction Manager's responsibility is to ensure that the contractor provides a project-specific safety plan addressing unique construction methods or risks.

CMAA guidance specifies:

"When special construction techniques or hazardous methods are proposed, the Construction Manager should require the contractor to submit a project safety plan for review and verification of compliance with contract and regulatory safety requirements." The CM's review confirms that the contractor's plan meets all contractual obligations and regulatory standards. The CM does not take responsibility for safety execution but ensures the plan's adequacy before work begins.

"Contractor Safety Planning and Review," pp. 69-70.

CMAA CM Study Guide, Safety Management Domain, Objective 7.3: "Ensure contractor provides and adheres to an approved safety plan for all high-risk activities."

NEW QUESTION # 57

The chief estimator for a construction company is asked to provide an estimate based on known project characteristics, such as square footage and unit prices. The estimator will MOST likely be employing which technique?

- A. Conceptual Estimating
- B. Bottom Up Estimating
- **C. Parametric Estimating**

- D. Analogous Estimating

Answer: C

Explanation:

The CMAA Cost Management section defines parametric estimating as:

"A method of estimating in which the cost of a project or component is determined by applying cost parameters (such as cost per square foot, cost per unit, or cost per linear foot) to known quantities or measurable project characteristics." This approach is typically used during early design stages when only limited design information is available but project parameters (e.g., size, type, location) are known. It provides a reliable and repeatable estimating method for benchmarking or budgeting.

Conceptual estimating relies on very preliminary data or similar past projects, while bottom-up estimating requires detailed quantity takeoffs and is used at later design stages. Analogous estimating uses direct comparison with a completed project, not specific cost parameters.

Hence, the correct answer is B. Parametric Estimating.

References:

CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 4 - Cost Management, Section: "Estimating Techniques." CMAA CM Study Guide, Cost Management Domain, Objective 4.2: "Apply parametric estimating techniques based on measurable parameters.

NEW QUESTION # 58

The CM is tasked with analyzing the schedule variance of a project on a regular basis. The contractor's recent payment application includes a dramatic increase in earned hours than what was budgeted for the project. This MOST likely indicates

- A. the contractor will be submitting change orders.
- B. the contractor is making more profit than anticipated.
- C. the project is behind schedule.
- D. the project is ahead of schedule.

Answer: C

Explanation:

In earned value or earned hours analysis, "earned hours" represent how much work has actually been completed (in units of schedule effort) compared to what was budgeted over time. If a contractor claims a significantly higher number of earned hours than budget expected at that point, that discrepancy often indicates the contractor is catching up for prior slippage or back-loading progress and may be masking a delay. In other words, the project is likely behind schedule: the contractor is accelerating or shifting resources to show a jump in performance, sometimes to avoid triggering delay claims or escalating scrutiny.

While CMAA's formal SOP does not provide a one-sentence treatment of this particular scenario, standard earned value (EV) and schedule variance (SV) theory (used in CMAA's time management domain) supports that an unexpected inflation in earned hours relative to budget can signal a retrospective correction for lagging progress, rather than true ahead-of-schedule condition.

NEW QUESTION # 59

Lifecycle analysis of a project will provide the greatest impact during which of the following phases?

- A. Construction
- B. Pre-Design
- C. Procurement
- D. Design

Answer: B

Explanation:

According to the CMAA Standards of Practice, lifecycle analysis (LCA) is most effective when applied early in project planning—specifically during the Pre-Design phase—because the ability to influence materials selection, building systems, and operational efficiency is at its highest before design decisions are finalized.

The CMAA defines lifecycle analysis as:

"An evaluation of the total cost and performance of a facility over its useful life. Lifecycle assessment is most effective when conducted during the Pre-Design phase, where project alternatives can be compared, and design direction can be influenced." During later phases, such as design or construction, changes have diminishing cost-benefit potential.

Therefore, the Pre-Design phase is where lifecycle analysis yields the greatest impact on sustainability, cost, and performance.

outcomes.

CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 8 - Sustainability and Environmental Stewardship, Section: "Lifecycle Costing," pp. 78-80.

CMAA CM Study Guide, Sustainability Domain, Objective 8.1.

NEW QUESTION # 60

.....

Do you want to choose a lifetime of mediocrity or become better and pursue your dreams? I believe you will have your own pursuit. Perhaps you do not know how to go better our Construction-Manager learning engine will give you some help. The choice is like if a person is at a fork, and which way to go depends on his own decision. Our Construction-Manager Study Materials have successfully helped a lot of candidates achieve their certifications and become better. Our Construction-Manager learning guide will be your best choice.

Valid Construction-Manager Test Questions: <https://www.testinsides.top/Construction-Manager-dumps-review.html>

And our PDF version of the Construction-Manager training guide can be carried with you for it takes on place, To those time-sensitive exam candidates, our high-efficient Construction-Manager study questions comprised of important news will be best help, Thus at that time, you would not need to afraid of the society and peer pressure with Construction-Manager certification, CMAA Construction-Manager Questions and Answers to make it Easier to Read: The easiest to read lay outs are those which include Construction-Manager Questions and Answers.

OK, maybe you made a rough sketch on a napkin during an after Construction-Manager hours brainstorming session, or maybe you drew a vague site map on a whiteboard during a development meeting.

Once a particular project is completed, simply archive the entire folder to a CD and remove it from your computer, And our PDF version of the Construction-Manager training guide can be carried with you for it takes on place.
