

CMMC-CCA Examcollection Dumps Torrent - Popular CMMC-CCA Exams

P.S. Free 2025 Cyber AB CMMC-CCA dumps are available on Google Drive shared by PDFVCE:
https://drive.google.com/open?id=1pj1yzTy8BhN3P_Op7_EbDRQnZFc3g6Bb

These CMMC-CCA exam questions braindumps are designed in a way that makes it very simple for the candidates. Each and every CMMC-CCA topic is elaborated with examples clearly. Use PDFVCE top rate Cyber AB CMMC-CCA Exam Testing Tool for making your success possible. CMMC-CCA exam preparation is a hard subject. Plenty of concepts get mixed up together due to which student feel difficult to identify them. There is no similar misconception in CMMC-CCA Dumps because we have made it more interactive for you. The candidates who are less skilled may feel difficult to understand the CMMC-CCA questions can take help from these braindumps. The tough topics of CMMC-CCA certification have been further made easy with examples, simulations and graphs. Candidates can avail the opportunity of demo of free CMMC-CCA dumps.

Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	• CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.
Topic 2	• Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
Topic 3	• CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.
Topic 4	• Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.

Pass CMMC-CCA Exam with Reliable CMMC-CCA Examcollection Dumps Torrent by PDFVCE

You will be able to assess your shortcomings and improve gradually without having anything to lose in the actual Certified CMMC Assessor (CCA) Exam exam. You will sit through mock exams and solve actual Cyber AB CMMC-CCA dumps. In the end, you will get results that will improve each time you progress and grasp the concepts of your syllabus. The desktop-based Cyber AB CMMC-CCA Practice Exam software is only compatible with Windows.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q147-Q152):

NEW QUESTION # 147

When assessing a contractor's implementation of CMMC requirements, you realize they have multiple data centers and regional offices, each having its access control mechanisms and security perimeter. The contractor uses a remote access solution to allow external partners and employees to collaborate on projects that involve CUI. The solution requires routing configuration to ensure the remote access to CUI is not compromised.

Why should all traffic be routed through a managed Access Control point?

- A. It provides better performance and lower latency for remote users
- B. It simplifies network architecture and reduces complexity
- C. It enables easier troubleshooting and monitoring of network traffic
- **D. Reduces the susceptibility to unauthorized access to organizational systems**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

AC.L2-3.1.14 - Remote Access Routing requires "routing remote access through managed access control points." This reduces unauthorized access risk (B) by centralizing control and security, per CMMC intent.

Simplification (A), troubleshooting (C), and performance (D) are secondary benefits, not the primary purpose.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), AC.L2-3.1.14: "Route traffic to reduce unauthorized access risk."

* NIST SP 800-171A, 3.1.14: "Examine routing to enhance security."

Resources:

* https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.0_FINAL_202112016_508.pdf

NEW QUESTION # 148

FIPS-validated cryptography is required to meet CMMC practices that protect CUI when transmitted or stored outside the OSC's CMMC enclave. What source does the CCA use to verify that the cryptography the OSC has implemented is FIPS-validated?

- **A. NIST Module Validation Program**
- B. Vendor cryptographic module documentation
- C. Cryptographic section of the OSC's SSP
- D. Cryptographic section of the Shared Responsibility Matrix

Answer: A

Explanation:

The CMMC practices for cryptographic protection (SC.L2-3.13.11, SC.L2-3.13.8, etc.) require that cryptography protecting CUI must be FIPS-validated. The authoritative source for validation is the NIST Cryptographic Module Validation Program (CMVP).

Extract:

"To use cryptography in compliance with CMMC requirements, organizations must use modules validated under the NIST Cryptographic Module Validation Program (CMVP). The CMVP is the authoritative source to verify whether a cryptographic implementation is FIPS-validated." Vendor documentation or SSP claims alone cannot serve as authoritative proof. The CCA must consult the NIST CMVP validation list.

Reference: CMMC Assessment Guide - Level 2; SC.L2-3.13.11, SC.L2-3.13.8; CMVP Guidance.

NEW QUESTION # 149

During an assessment, the OSC IT security team provided documentation on how they use replay-resistant authentication to protect CUI. What can be used as a replay-resistant mechanism?

- A. Biometric techniques
- B. MFA devices to protect access for local users
- **C. Requiring Transport Layer Security (TLS)**
- D. Encrypted messages

Answer: C

Explanation:

* Applicable Requirement: IA.L2-3.5.4 - "Use replay-resistant authentication mechanisms for network access to privileged accounts and for network access to non-privileged accounts."

* Why C is Correct: Transport Layer Security (TLS) is explicitly listed in NIST SP 800-171 Rev. 2 as an acceptable replay-resistant mechanism, as it prevents intercepted credentials from being reused.

Why Other Options Are Insufficient:

* A (Encrypted messages): Provides confidentiality but not inherently replay resistance.

* B (Biometrics): Supports authentication but does not prevent replay of transmitted credentials.

* D (MFA devices): Strong authentication, but not necessarily replay-resistant for transmitted session data.

References (CCA Official Sources):

* NIST SP 800-171 Rev. 2 - IA.L2-3.5.4 (Replay Resistance)

* NIST SP 800-171A - IA.L2-3.5.4 Assessment Objectives

NEW QUESTION # 150

An OSC has contacted your C3PAO organization for a prospective CMMC Level 2 assessment. You have been selected to lead the Assessment Team. When ascertaining the assessment conditions and requirements, you discuss the prospective CMMC assessment scope with the OSC. Before proceeding to Phase 2 of the CMMC assessment process, the OSC must complete the following steps of its high-level scoping process, EXCEPT?

- A. Establish the CMMC Assessment Scope of their networked environment.
- B. Propose the scope of the CMMC assessment that will be evaluated by the Lead Assessor and validated by the C3PAO.
- **C. Evaluate Model Non-Duplication.**
- D. Identify and take inventory of the various categories of CMMC assets contained in the networked environment.

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

The CMMC Assessment Process (CAP) outlines the OSC's scoping steps in Phase 1: identifying assets (Option A), establishing the scope (Option C), and proposing it for validation (Option B). "Evaluate Model Non-Duplication" (Option D) is not a defined step in the CAP or scoping guide, making it the exception. D is correct.

Reference:

CMMC Assessment Process (CAP) v1.0, Section 2.1 (Phase 1: Scoping), p. 8: "OSC steps include asset identification and scope proposal."

NEW QUESTION # 151

Part of effective CUI protection involves knowing which assets process, transmit, or store CUI. This understanding is crucial for defining CUI boundaries within an OSC's systems. To achieve this, an OSC can prepare a logical data flow diagram for their information systems. Which of the following questions does a logical data flow diagram not answer?

- A. How does the data recipient receive the data?
- **B. How is the system implemented?**
- C. What system, process, or individual receives the data?
- D. What data is being transmitted?

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

A logical data flow diagram, per CMMC Level 2, maps CUI flow, answering what data moves (Option C), who/what receives it (Option D), and how it's received (Option A). It doesn't detail physical implementation (Option B), which is a physical diagram's role. Option B is the correct answer.

Reference Extract:

* CMMC AG Level 2, Section 1.3: "Logical data flow diagrams focus on data movement, not system implementation." Resources: https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.0_FINAL_202112016_508.pdf

NEW QUESTION # 152

.....

Our CMMC-CCA exam training material is organized by high experienced IT workers. Our IT elite team offer new version of CMMC-CCA Exam real questions gradually, which aims to ensure examinees pass CMMC-CCA test in one time.
