Nowadays, online shopping has been greatly developed, but because of the fear of some uncontrollable problems after payment, there are still many people don't trust to buy things online, especially electronic products. But you don't have to worry about this when buying our CMMC-CCA Actual Exam. Not only will we fully consider for customers before and during the purchase on our CMMC-CCA practice guide, but we will also provide you with warm and thoughtful service on the CMMC-CCA training guide.

Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.
Topic 2	Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
Topic 3	CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.
Topic 4	CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.

Braindumps CMMC-CCA Torrent, Updated CMMC-CCA Testkings

Our company has authoritative experts and experienced team in related industry. To give the customer the best service, all of our company's CMMC-CCA learning materials are designed by experienced experts from various field, so our CMMC-CCA Learning materials will help to better absorb the test sites. One of the great advantages of buying our product is that can help you master the core knowledge in the shortest time. At the same time, our CMMC-CCA learning materials discard the most traditional rote memorization methods and impart the key points of the qualifying exam in a way that best suits the user's learning interests, this is the highest level of experience that our most authoritative think tank brings to our CMMC-CCA Learning Materials users. Believe that there is such a powerful expert help, our users will be able to successfully pass the qualification test to obtain the qualification certificate.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q137-Q142):

NEW QUESTION # 137

An OSC seeking Level 2 certification wants to develop and launch a website for customers to purchase items online and submit contact forms. The OSC plans to host the web server in their own data center while also maintaining the security of their internal IT environment. Based on this information, what would be the BEST approach?

- A. Relocate the server to a different office location to protect the OSC's LAN
- B. Configure a firewall rule to only allow internal traffic to communicate with the server for an additional layer of security to the OSC's LAN
- C. Configure the server to protect against object reuse and residual information via shared system resources for an additional layer of security to the OSC's LAN
- **D. Configure a DMZ for an additional layer of security to the OSC's LAN to host the publicly accessible server**

Answer: D

Explanation:

Public-facing systems (such as web servers) must be separated from internal enterprise networks to limit exposure. CMMC (aligned with NIST SP 800-171 SC.L2-3.13.5 "Boundary Protection") specifies that placing public servers into a demilitarized zone (DMZ) provides a security buffer and prevents direct access from the internet into the internal LAN.

Exact extracts:

- * "Publicly accessible systems should be placed on separate subnets or in DMZs."
- * "Boundary protection devices should separate public servers from the enterprise network."
- * "DMZs provide layered protection for internet-facing assets."

Why the other options are incorrect:

- * A: Relocating the server physically does not provide network-layer security.
- * C: Firewall rules allowing only internal traffic would prevent public access, defeating the purpose of a public website.
- * D: Object reuse protections are unrelated to network boundary security.

References:

CMMC Assessment Guide - Level 2, SC.L2-3.13.5 "Boundary Protection."
NIST SP 800-171 Rev. 2, 3.13.5.

NEW QUESTION # 138

A CCA is reviewing an OSC's evidence for a CMMC practice and finds that the documentation is in draft form, marked "For Internal Use Only," and lacks final approval. The OSC insists it is actively used. How should the CCA evaluate this evidence?

- **A. Document the lack of final approval as an evidence gap and assess based on all available evidence, including usage confirmation.**
- B. Request the OSC to finalize the documentation before continuing the assessment.
- C. Reject the draft documentation and score the practice as "NOT MET."
- D. Accept the draft documentation as sufficient since it is actively used.

Answer: A

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CAP requires noting deficiencies like lack of approval as gaps while assessing all evidence (Option B).

Options A, C, and D misapply CAP procedures.

Extract from Official Document (CAP v1.0):

* Section 2.2 - Conduct Assessment (pg. 25): "Document lack of final approval as an evidence gap and assess based on all available

evidence." References:
CMMC Assessment Process (CAP) v1.0, Section 2.2.

NEW QUESTION # 139

A CMMC assessment involves testing, examining, and interviewing various assessment objects. The definition of an assessment object is provided in NIST SP 800-171A. Which of the following can an Assessment Object NOT be?

- A. Activities
- B. Individuals
- C. Examine
- D. Specifications

Answer: C

Explanation:

Comprehensive and Detailed in Depth Explanation:

NIST SP 800-171A defines Assessment Objects as items assessed (specifications, mechanisms, activities, individuals). "Examine" (Option D) is an assessment method, not an object, per NIST and CMMC guidelines.

Options A, B, and C are valid objects, making Option D the correct answer.

Reference Extract:

* NIST SP 800-171A, Introduction: "Assessment objects include specifications, mechanisms, activities, and individuals; methods are examine, interview, test." Resources: <https://csrc.nist.gov/pubs/sp/800/171/a/final>

NEW QUESTION # 140

An OSC allows some employees to use their personal devices (laptops, tablets) for work purposes. The OSC enforces a Bring Your Own Device (BYOD) policy that requires employees to install Mobile Device Management (MDM) software on their devices. The MDM allows for remotewiping of lost or stolen devices and enforces access control policies. Employees use VPNs to remotely access the OSC network from their personal devices. What challenges might a CCA face when collecting evidence to assess the OSC's compliance with AC.L2-3.1.12 - Control Remote Access?

- A. The use of MDM software simplifies evidence collection on mobile device security configurations
- B. Privacy concerns arise due to the personal nature of BYOD devices
- C. The CCA can rely solely on employee attestation to verify compliance with the BYOD policy
- D. The use of VPNs ensures a secure connection regardless of the device used for remote access

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

AC.L2-3.1.12 requires OSCs to monitor and control remote access sessions, per NIST SP 800-171 and CMMC Level 2. In a BYOD environment with MDM and VPNs, the CCA must verify the effectiveness of these controls. However, the personal nature of employee devices introduces privacy concerns, limiting the CCA's ability to directly inspect configurations or logs without consent or legal constraints, as noted in the CAP. This complicates evidence collection compared to company-owned devices.

Option A (simplified evidence collection) overlooks privacy barriers. Option B (VPN security) assumes effectiveness without addressing verification challenges. Option D (employee attestation) is insufficient per CAP, which requires objective evidence. Option C correctly identifies privacy as a key challenge, making it the correct answer.

Reference Extract:

* CMMC Assessment Process (CAP) v1.0, Section 4.2: "BYOD environments may limit evidence collection due to privacy concerns associated with personal devices."

* NIST SP 800-171A, AC-3.1.12: "Assessors must verify control of remote access sessions, which may be hindered by device ownership." Resources: <https://cyberab.org/Portals/0/Documents/Process-Documents/CMMC-Assessment-Process-CAP-v1.0.pdf>, <https://csrc.nist.gov/pubs/sp/800/171/a/final>

NEW QUESTION # 141

When assessing an OSC's compliance with IR requirements, you realize they have deployed a system that tracks incidents, documents details, and updates the status throughout the incident response process. Personnel to whom incidents must be reported

are identified and designated. While examining their documentation, you come across an incident response template that they use to capture all relevant information and ensure consistency in reporting to the identified authorities and organizational officials. Interviewing the IR team, you learn there is an escalation process that the contractor's cybersecurity team can use to address more serious incidents. From the scenario, the contractor has met all the required objectives for CMMC practice IR. L2-3.6.2 - Incident Reporting, meaning its implementation of the said practice will be scored MET with a total of 5 points. For how long must the OSC retain the incident records?

- A. 90 days
- B. 90 hours
- C. 72 days
- D. 72 hours

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

IR.L2-3.6.2 requires "tracking and documenting incidents." While CMMC doesn't specify retention, DFARS 252.204-7012 mandates retaining incident records for 90 days (B) to support DoD investigations, a common baseline for CMMC-aligned contractors. Other options (A, C, D) lack regulatory grounding. The CMMC guide references DFARS for practical guidance.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), IR.L2-3.6.2: "Document incidents; retention per applicable regulations."

* DFARS 252.204-7012: "Retain records for 90 days."

NEW QUESTION # 142

.....

It is a truth universally acknowledged that the exam is not easy but the related CMMC-CCA certification is of great significance for workers in this field so that many workers have to meet the challenge, I am glad to tell you that our company aims to help you to pass the examination as well as gaining the related certification in a more efficient and simpler way. During recent 10 years, our CMMC-CCA Exam Questions have met with warm reception and quick sale in the international market. Our CMMC-CCA study materials are not only as reasonable priced as other makers, but also they are distinctly superior in the following respects.
