

CNX-001 Latest Test Vce—Find Shortcut to Pass CNX-001 Exam

Master the CompTIA CNX-001 Exam with Certs4Future Practice Tests

Preparing for the CompTIA CNX-001 exam can be challenging, but with the right study resources, you can boost your confidence and improve your chances of success. One of the most effective ways to prepare is by using practice tests, and Certs4Future offers high-quality [CompTIA CNX-001 Practice Tests](#) designed to help you pass the exam on your first attempt.

The Importance of CompTIA CNX-001 Practice Tests

Practice tests play a crucial role in exam preparation by simulating the real exam environment. They allow you to familiarize yourself with the question format and time constraints, ensuring you know what to expect on test day. Additionally, practice tests help identify knowledge gaps, allowing you to focus on weak areas that need improvement. By regularly taking timed practice exams, you can enhance your time management skills and build the confidence needed to perform well under pressure.

Why Certs4Future's Practice Tests Stand Out

Certs4Future provides updated and verified practice questions that closely align with the latest CompTIA CNX-001 exam objectives. Their practice tests feature real exam-like questions, ensuring you get an accurate representation of the actual test. Each question comes with detailed explanations, helping you understand the reasoning behind correct answers and reinforcing key concepts.

CompTIA CNX-001 Test Prep & Latest CNX-001 Test Practice

Our exam prep material is famous among CompTIA exam candidates which help to polish the knowledge required to pass the CompTIA CloudNetX Certification Exam exam. The certification is organized by CompTIA internationally. Our CompTIA CloudNetX Certification Exam (CNX-001) exam questions are the most cost-effective as we understand that you need low-cost

material but are authentic and updated. DumpsValid provides its CompTIA CNX-001 Exam Questions in three forms, one is PDF eBook, the second is practice exam software for Windows-based systems, and the third is an online practice test.

CompTIA CloudNetX Certification Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25

A network engineer adds a large group of servers to a screened subnet and configures them to use IPv6 only.

The servers need to seamlessly communicate with IPv4 servers on the internal networks. Which of the following actions is the best way to achieve this goal?

- A. Change the servers in the screened subnet from IPv6 addresses to IPv4 addresses.
- B. Add IPv6 to the network cards on the internal servers so they can communicate with the screened subnet.
- C. Implement NAT64 on the router between the screened subnet and the internal network.
- D. Set up a bridge between the screened subnet and internal networks to handle the conversion.

Answer: C

Explanation:

NAT64 provides automatic protocol translation between IPv6-only clients and IPv4-only servers at the router, letting your new IPv6-only servers communicate seamlessly with existing IPv4 resources without changing their addresses.

NEW QUESTION # 26

A company has a 40Gbps network that uses a network tap to inspect the traffic using an IDS. The IDS usually performs normally except when the servers are downloading patches from their local update repository

10.10.10.139 using HTTPS. During the patch windows, the IDS cannot handle the extra load and drops a significant number of packets. Which of the following would allow a network engineer to prevent this issue without compromising the network visibility?

- A. Scheduling a cron job to stop the IDS service during the patch window
- B. Using PF_RING offload to filter out "host 10.10.10.139 and port 443"
- C. Adding a "dst host 10.10.10.139" BPF on the tap
- D. Configuring the IDS to ignore traffic from 10.10.10.139

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

PF_RING is a high-performance packet capture and filtering framework that allows IDS systems to handle large volumes of traffic efficiently. By offloading and filtering out traffic that is known and trusted (such as HTTPS traffic from a patch server), the IDS can focus on analyzing critical traffic and reduce dropped packets.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Traffic Filtering and IDS Performance Optimization": "Advanced filtering solutions like PF_RING allow offloading of known trusted traffic, reducing processing overhead on IDS systems and improving visibility into meaningful events." Other options:

- * A. Directly configuring the IDS to ignore traffic may bypass too much, affecting visibility.
- * C. BPF filters on the tap itself may interfere with other systems using the tap.
- * D. Disabling the IDS temporarily removes all visibility - a poor security practice.

NEW QUESTION # 27

A network architect must ensure only certain departments can access specific resources while on premises.

Those same users cannot be allowed to access those resources once they have left campus. Which of the following would ensure access is provided according to these requirements?

- A. Configuring UEBA to monitor all access to those resources during non-business hours
- B. Implementing a PKI-based authentication system to ensure access
- C. Enabling MFA for only those users within the departments needing access
- D. Configuring geofencing with the IPs of the resources

Answer: D

Explanation:

By defining an IP-based geofence around the on-premises network addresses where those resources reside, you ensure that only users connecting from inside the campus IP ranges can reach them. As soon as the same users leave that network (and thus fall outside the geofenced IP block), access is automatically denied.

NEW QUESTION # 28

A company is transitioning from on premises to a hybrid environment. Due to regulatory standards, the company needs to achieve a high level of reliability and high availability for the connection between its data center and the cloud provider. Which of the following solutions best meets the requirements?

- A. Establish a Direct Connect with the cloud provider and peer to two different VPCs in the cloud network.
- B. Establish a VPN with two tunnels to a transit gateway at the cloud provider.
- C. Establish a Direct Connect with the cloud provider and a redundant connection with a VPN over the internet.
- **D. Establish two Direct Connect connections to the cloud provider using two different suppliers.**

Answer: D

Explanation:

By provisioning two dedicated Direct Connect circuits from separate carriers (diverse physical paths and providers), you achieve a true highly available, fault-tolerant link that meets stringent reliability and regulatory requirements without relying on the public internet.

NEW QUESTION # 29

A company is expanding its network and needs to ensure improved stability and reliability. The proposed solution must fulfill the following requirements:

Detection and prevention of network loops

Automatic configuration of ports

Standard protocol (not proprietary)

Which of the following protocols is the most appropriate?

- **A. STP**
- B. BGP
- C. RTSP
- D. SIP

Answer: A

Explanation:

The Spanning Tree Protocol (IEEE 802.1D) is a non-proprietary standard that automatically detects Layer 2 loops and dynamically places redundant switch ports into a blocking or forwarding state, ensuring loop prevention and automatic port configuration.

NEW QUESTION # 30

.....

What is the selling point of a product? It is the core competitiveness of this product that is ahead of other similar brands. The core competitiveness of the CNX-001 study materials, as users can see, we have a strong team of experts, the CNX-001 study materials are advancing with the times, updated in real time, so that's why we can with such a large share in the market. Through user feedback recommendations, we've come to the conclusion that the CNX-001 Study Materials have a small problem at present, in the rest of the company development plan, we will continue to strengthen our service awareness, let users more satisfied with our CNX-001 study materials, we hope to keep long-term with customers, rather than a short high sale.
