New COBIT-2019 Test Objectives | Best COBIT-2019 Study Material

To pass the COBIT-2019 exam, you must put in a lot of time studying, practicing, and working hard. You will need real ISACA COBIT-2019 Questions and the necessary understanding of the exam's format to pass the COBIT-2019 test. Without preparing with actual COBIT 2019 Foundation (COBIT-2019) questions, applicants find it difficult to get the knowledge essential to pass the ISACA certification exam in a short time.

ISACA COBIT-2019 (COBIT 2019 Foundation) Exam is a certification exam that focuses on the COBIT 2019 framework. COBIT (Control Objectives for Information and Related Technology) is a globally recognized framework for IT governance and management. The COBIT 2019 framework provides a comprehensive and integrated approach to IT governance, management, and assurance. The COBIT 2019 Foundation exam is designed for individuals who want to demonstrate their understanding of the COBIT 2019 framework.

ISACA COBIT 2019 Foundation Sample Questions (Q91-Q96):

NEW QUESTION # 91

When reviewing the risk profile of an enterprise during the governance design phase, what MUST be established prior to conducting a high-level risk analysis?

- A. Risk response strategy
- B. Risk management framework
- **C. Enterprise's risk appetite**
- D. Key risk indicators (KRIs)

Answer: C

Explanation:

Explanation

The risk profile of an enterprise is a design factor that describes how an enterprise identifies, assesses, responds to, monitors, and reports on information and technology risks. The risk profile helps to determine the level of risk appetite and tolerance that an enterprise has for its information and technology activities, as well as the level of control and assurance that is required for its governance framework. When reviewing the risk profile of an enterprise during the governance design phase, one of the prerequisites that must be established prior to conducting a high-level risk analysis is the enterprise's risk appetite. The risk appetite is the amount and type of risk that an enterprise is willing to accept in pursuit of its objectives. The risk appetite provides a basis for defining the risk criteria, thresholds, indicators, and responses that will be used in the risk analysis process. The risk appetite also helps to align the governance framework with the enterprise's strategy and objectives. NEW QUESTION # 92

Which of the following components of the governance system are required for successful completion of all activities?

- **A. People, skills and competencies**
- B. Principles, policies and frameworks
- C. Processes

Answer: A

NEW QUESTION # 93

The enterprise goal titled "Optimization of Business Process Costs" is aligned to which balanced scorecard (BSC) dimension?

- A. Customer
- **B. Internal**
- C. Growth

Answer: B

Explanation:

The enterprise goal titled "Optimization of Business Process Costs" is aligned to the internal dimension of the balanced scorecard (BSC). The internal dimension focuses on the efficiency and effectiveness of the business processes that deliver value to customers and stakeholders. Optimization of business process costs is one of the 17 generic enterprise goals defined by COBIT that supports the internal dimension.12 References:

NEW QUESTION # 94

Which of the following is the FINAL action before completing the design of an IT governance system?

- A. Determining a sourcing model
- B. Resolving inherent priority conflicts
- **C. Selecting an implementation method**

Answer: C

NEW QUESTION # 95

Within the COBIT goals cascade, stakeholder drivers are transformed into:

- A. the enterprise's actionable strategy.
- B. the enterprise's governance framework.
- C. business unit performance metrics.

Answer: A

Explanation:

Within the COBIT goals cascade, stakeholder drivers are transformed into the enterprise's actionable strategy. The COBIT goals cascade is a mechanism that helps enterprises to align their governance objectives with their stakeholder needs. It consists of four levels: stakeholder drivers, enterprise goals, alignment goals, and governance and management objectives. Stakeholder drivers are the needs or expectations of the internal or external stakeholders of the enterprise. Enterprise goals are the specific targets or outcomes that the enterprise sets to achieve its vision and mission. Alignment goals are the intermediate goals that link the enterprise goals with the governance and management objectives. Governance and management objectives are the desired outcomes of the governance system for information and technology. Stakeholder drivers are transformed into enterprise goals through a process of analysis, prioritization, and validation. Enterprise goals form the basis of the enterprise's actionable strategy.12 References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Framework: Governance System

NEW QUESTION # 96

.....

Our COBIT-2019 study materials boost the self-learning and self-evaluation functions so as to let the clients understand their learning results and learning process, then find the weak links to improve them. Through the self-learning function the learners can choose the learning methods by themselves and choose the contents which they think are important. Through the self-evaluation function the learners can evaluate their mastery degree of our COBIT-2019 Study Materials and their learning process. The two functions can help the learners adjust their learning arrangements and schedules to efficiently prepare the exam.
