You will be respected by your colleagues, your boss, your relatives, your

friends and the society. All in all, buying our COF-C02 Test Prep can not only help you pass the exam but also help realize your dream about your career and your future.

Snowflake COF-C02 (SnowPro Core Certification) Exam is a highly sought-after certification for individuals seeking to establish their expertise in using Snowflake's cloud-based data warehousing platform. COF-C02 exam is designed to test the knowledge and skills required to design, configure, and manage Snowflake data warehouses. SnowPro Core Certification Exam certification is recognized globally and is an excellent way for professionals to demonstrate their mastery of Snowflake's cloud data warehousing technology.

Snowflake SnowPro Core Certification Exam Sample Questions (Q95-Q100):

NEW QUESTION # 95

Which actions can be performed using a resource monitor in Snowflake? (Select TWO).

- A. Modify the queries being executed within a virtual warehouse.
- **B. Suspend a virtual warehouse when its credit usage reaches a defined limit.**
- C. Monitor the performance of individual queries in real-time
- **D. Trigger a notification to account administrators when credit usage reaches a specified threshold**
- E. Automatically allocate more storage space to a virtual warehouse

Answer: B,D

Explanation:

Resource monitors in Snowflake can perform actions such as suspending a virtual warehouse when its credit usage reaches a defined limit and triggering a notification to account administrators when credit usage reaches a specified threshold. These actions help manage and control resource usage and costs within Snowflake.

Snowflake Documentation: Resource Monitors

NEW QUESTION # 96

The property mins_to_bypass_network_policy is set at which level?

- A. Organization
- **B. Account**
- C. User
- D. Role

Answer: B

Explanation:

The property mins_to_bypass_network_policy is set at the account level in Snowflake. This setting allows administrators to specify a time frame during which users can bypass network policies that have been set on their account. It is particularly useful in scenarios where temporary access needs to be granted from IPs not covered by the existing network policies. By adjusting this property at the account level, Snowflake administrators can manage and enforce network access controls efficiently across the entire account.

Snowflake Documentation on Network Policies: Network Policies

NEW QUESTION # 97

Which file function provides a URL with access to a file on a stage without the need for authentication and authorization?

- A. BUILD_STAGE_FILE_URL
- B. BUILD_SCOPED_FILE_URL
- C. GET_RELATIVE_PATH
- **D. GET_PREIGNED_URL**

Answer: D

Explanation:

The GET_PREIGNED_URL file function in Snowflake provides a URL with access to a file on a stage without requiring

authentication and authorization. This is particularly useful for sharing data files stored in Snowflake stages with external parties securely and conveniently. The presigned URL generated by this function gives temporary access to the file, which expires after a specified duration.

Example usage of GET_PRESIGNED_URL:

```
SELECT GET_PRESIGNED_URL('<stage_name>', '<file_path>');
```

This function generates a URL that can be used to directly access a file in the stage, making it easier to share data without compromising security.

Reference: Snowflake Documentation on File and Table Functions, specifically the section on GET_PRESIGNED_URL:
https://docs.snowflake.com/en/sql-reference/functions/get_presigned_url.html Top of Form

NEW QUESTION # 98

Which Snowflake objects track DML changes made to tables, like inserts, updates, and deletes?

- A. Pipes
- **B. Streams**
- C. Tasks
- D. Procedures

Answer: B

Explanation:

Explanation

[https://dataterrain.com/how-to-change-tracking-using-table-streams-in-snowflake/#:~:text=A%20stream%20is%](https://dataterrain.com/how-to-change-tracking-using-table-streams-in-snowflake/#:~:text=A%20stream%20is%20)

NEW QUESTION # 99

What happens to the objects in a reader account when the DROP MANAGED ACCOUNT command is executed?

- A. The objects enter the Fail-safe period.
- B. The objects are immediately moved to the provider account.
- **C. The objects are dropped.**
- D. The objects enter the Time Travel period.

Answer: C

Explanation:

When the DROP MANAGED ACCOUNT command is executed in Snowflake, it removes the managed account, including all objects created within the account, and access to the account is immediately restricted.

NEW QUESTION # 100
