

# Complete EMEA-Advanced-Support Exam Dumps - EMEA-Advanced-Support Valid Test Forum

P.S. Free 2025 Fortinet EMEA-Advanced-Support dumps are available on Google Drive shared by LatestCram:  
[https://drive.google.com/open?id=1nnlvcYxgZ\\_ToWxVxsYG4jUemp9OC3il](https://drive.google.com/open?id=1nnlvcYxgZ_ToWxVxsYG4jUemp9OC3il)

If you face any problem while using the offline or online software Fortinet EMEA Advanced Support Exam (EMEA-Advanced-Support) practice exam of LatestCram, contact our customer service team. Our team of experts is available 24/7 for your assistance while using updated EMEA-Advanced-Support Exam Prep material. Many takers of the Fortinet EMEA Advanced Support Exam (EMEA-Advanced-Support) practice test suffer from money loss because it introduces new changes in the content of the test.

Our EMEA-Advanced-Support study questions will update frequently to guarantee that you can get enough test banks and follow the trend in the theory and the practice. That is to say, our product boosts many advantages and to gain a better understanding of our Fortinet EMEA Advanced Support Exam guide torrent. It is very worthy for you to buy our product and please trust us. If you still can't fully believe us, please read the introduction of the features and the functions of our product as follow.

## EMEA-Advanced-Support Valid Test Forum & New EMEA-Advanced-Support Test Camp

If you are still hesitating about whether you can get EMEA-Advanced-Support certification through the exam, we believed that our EMEA-Advanced-Support study materials will be your best choice, it will tell you that passing the exam is no longer a dream for you, and it will be your best assistant on the way to passing the exam. Tens of thousands of our customers have benefited from our EMEA-Advanced-Support Exam Braindumps and got their certifications. So you will as long as you choose to buy our EMEA-Advanced-Support practice guide.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q40-Q45):

### NEW QUESTION # 40

Which FortiGate feature allows for policy-based routing?

- A. Dynamic Routes
- B. SD-WAN Rules
- **C. Policy Routes**
- D. Static Routes

**Answer: C**

Explanation:

Policy Routes in FortiGate allow routing decisions based on criteria like source, destination, or service, overriding the default routing table. SD-WAN Rules (A) are for WAN optimization, Static Routes (C) are fixed, and Dynamic Routes (D) are protocol-based, not policy-based. Exact extract: "Policy Routes allow FortiGate to make routing decisions based on user-defined criteria, such as

source/destination IPs or services, overriding standard routing."

#### NEW QUESTION # 41

Which of these BGP paths will be the preferred one ?

- A. Prefer the path with the highest Local Preference value
- B. Prefer External path (learned via EBGP) over Internal path (IBGP)
- C. Prefer the path with the lowest Multi-Exit Discriminator (MED)
- D. Prefer the path with the shortest AS Path

**Answer: A**

Explanation:

BGP path selection follows a specific order of attributes to determine the best path. The process prefers the path with the highest local preference first, as it is one of the earliest steps in the decision process. Local preference is used within an AS to influence outbound traffic. Only if local preferences are equal does it move to the next criteria, such as shortest AS path. The AS path length is considered after local preference, MED after that, and eBGP over iBGP even later. Therefore, among the options, the highest local preference (D) is the most preferred criterion. The original document's answer B is incorrect based on standard BGP selection rules implemented in Fortinet. Exact extract: This article describes the BGP route selection process. Scope FortiGate. Solution Consider only routes with no AS loops and a valid next hop. BGP makes routing decisions based on path, network policies and rulesets ... select the route with the lowest router ID as the best path. Network. Type. To achieve this, multiple route selection techniques can be used. Some are protocol- agnostic (for example, weight) and others are protocol-specific (for example ...).

#### NEW QUESTION # 42

Which of the below technology(ies) could reduce CPU load and memory utilization used by an IPS engine?

- A. All of the above
- B. Using multiple engines, aligned with load balancing technologies like Turbo that uses round robin algorithms to dispatch traffic up to specific IPS engine
- C. Using regular instead of extended database, to reduce memory footprint
- D. Using IPS sensors and IPS filter to determine which traffic should be examined for which signatures, instead of examine network traffic for all signatures
- E. IPS does not compare traffic to each signature individually. Instead it compiles them into a decision tree

**Answer: C,D,E**

Explanation:

IPS efficiency is improved by: A) Compiling signatures into a decision tree to reduce comparison overhead; B) Using IPS sensors/filters to selectively apply signatures to relevant traffic, reducing unnecessary processing; D) Using a regular database instead of an extended one to lower memory usage. Option C's

"Turbo" and round-robin load balancing is not a standard Fortinet IPS feature. Option E is incorrect as C is not valid. Exact extract: "IPS efficiency is improved by compiling signatures into decision trees to minimize CPU usage... IPS sensors and filters allow selective signature application to reduce processing... Using the regular signature database instead of extended reduces memory footprint."

#### NEW QUESTION # 43

Which command would you use to verify the status of an IPsec VPN tunnel on a FortiGate?

- A. get vpn ipsec status
- B. diagnose ipsec status
- C. diagnose vpn tunnel list
- D. show crypto ipsec sa

**Answer: C**

Explanation:

The 'diagnose vpn tunnel list' command on FortiGate displays detailed status information about IPsec VPN tunnels, including phase 1 and phase 2 states, uptime, and traffic statistics. Options B, C, and D are not valid FortiGate commands for this purpose. Exact

extract: "Use `diagnose vpn tunnel list` to view the status of IPsec VPN tunnels, including phase 1 and phase 2 details, such as SA status, uptime, and traffic counters."

## NEW QUESTION # 44

Firewall is performing stateful inspection for TCP traffic between Client 10.0.0.21 and Server 172.16.1.200.

### Exhibit: 1

10.0.0.21  172.16.1.200

10.0.0.21  172.16.1.200 Result= Pass  
SYN ACK

10.0.0.21  172.16.1.200

## Exhibit 2

10.0.0.21  172.16.1.200  
SYN

10.0.0.21  172.16.1.200 Result = Drop

- A. The ACK was not supposed to be sent to client 10.0.0.21
- B. Traffic is Asymmetric and not allowed by the Firewall
- C. **Three way handshake was not completed**
- D. Traffic should be allowed

**Answer: C**

### Explanation:

Stateful inspection requires a complete TCP three-way handshake (SYN, SYN-ACK, ACK) to establish a session in the firewall's state table. If the handshake is incomplete (e.g., missing ACK), the session is not established, and traffic is dropped. The question implies a stateful firewall scenario where traffic is blocked, likely due to an incomplete handshake. Asymmetric traffic (B) or incorrect ACK (A) are not indicated without further context, and C is incorrect if the handshake fails. Exact extract: "Stateful inspection ensures that a TCP three-way handshake is completed before allowing traffic... If the handshake is not completed, FortiGate drops the packets as invalid."

## NEW QUESTION # 45
