

CompTIA 220-1201 Exam is Easy with Our Valid 220-1201 Latest Questions: CompTIA A+ Certification Exam: Core 1 Certainly

P.S. Free & New 220-1201 dumps are available on Google Drive shared by Prep4sureGuide: <https://drive.google.com/open?id=14lhOtbwTrSrgktTSEdXo4KV-aC4YY4ur>

To improve our products' quality we employ first-tier experts and professional staff and to ensure that all the clients can pass the test we devote a lot of efforts to compile the 220-1201 learning guide. Even if you unfortunately fail in the test we won't let you suffer the loss of the money and energy and we will return your money back at the first moment. After you pass the 220-1201 test you will enjoy the benefits the certificate brings to you such as you will be promoted by your boss in a short time and your wage will surpass your colleagues. In short, buying the 220-1201 exam guide deserves your money and energy spent on them.

In fact, a number of qualifying exams and qualifications will improve your confidence and sense of accomplishment to some extent, so our 220-1201 test practice question can be your new target. When we get into the job, our 220-1201 training materials may bring you a bright career prospect. Companies need employees who can create more value for the company, but your ability to work directly proves your value. Our 220-1201 Certification guide can help you improve your ability to work in the shortest amount of time, thereby surpassing other colleagues in your company, for more promotion opportunities and space for development. Believe it or not that up to you, our 220-1201 training materials are powerful and useful, it can solve all your stress and difficulties in reviewing the 220-1201 exams.

220-1201 Exam Success, 220-1201 Exam Questions Vce

The CompTIA A+ Certification Exam: Core 1 (220-1201) questions have many premium features, so you don't face any hurdles while preparing for 220-1201 exam and pass it with good grades. It will be an easy-to-use learning material so you can pass the CompTIA A+ Certification Exam: Core 1 (220-1201) test on your first try. We even offer a full refund guarantee (terms and conditions apply) if you couldn't pass the CompTIA A+ Certification Exam: Core 1 (220-1201) exam on the first try with your efforts.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which of the following types of connectors does an IDE hard drive use for power?

- A. Lightning
- B. SC
- C. Molex
- D. F type

Answer: C

Explanation:

An IDE hard drive uses a Molex connector for power. This 4-pin connector is a standard for older drives.

Why Not A (F type): F type connectors are used for coaxial cables in video and internet applications.

Why Not B (SC): SC connectors are for fiber optic cables.

Why Not D (Lightning): Lightning connectors are for Apple devices.

CompTIA A+ Exam Reference: Core 1 (220-1201), Section 3.1, cable types and connectors.

NEW QUESTION # 12

A technician observes slow startup times on a laptop. Which of the following is most likely causing the issue?

- A. BIOS
- B. NIC
- C. HDD
- D. RAM

Answer: C

Explanation:

A hard disk drive (HDD), especially if it's older or nearly full, is the most common cause of slow startup times in laptops. HDDs are much slower than SSDs and can significantly bottleneck the boot process.

From CompTIA A+ 220-1101 Official Study Guide, Objective 4.1 - Troubleshoot common hardware problems:

"A slow startup or sluggish system performance is commonly due to a failing or fragmented hard disk drive (HDD). Replacing with an SSD can greatly improve boot times and overall system responsiveness." Verified Source:

* CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 4: Troubleshooting PC Hardware

* CompTIA Exam Objectives 220-1101, Domain 4.1

NEW QUESTION # 13

A user experiences a random BSOD while using a computer, but the operating system recovers as expected. Which of the following symptoms would indicate the issue is related to RAM?

- A. Distended capacitors
- B. Wrong BIOS configurations
- C. Continuous reboots
- D. POST code beeps

Answer: D

Explanation:

D:POST Code Beeps:

During the Power-On Self-Test (POST), the BIOS performs checks on system hardware, including RAM. If the RAM is faulty, POST may produce a series of beep codes indicating memory issues.

These beep codes are often the first sign of RAM-related problems, especially if the BSOD occurs randomly.

Incorrect Options:

A: Wrong BIOS configurations: Incorrect BIOS settings may cause boot errors, but they are less likely to cause random BSODs.

B: Continuous reboots: Continuous reboots could result from multiple hardware or software issues but do not specifically point to RAM.

C: Distended capacitors: Faulty capacitors typically affect the motherboard, not the RAM.

Key Takeaway: POST beep codes are a common diagnostic tool for identifying RAM-related issues.

Reference: CompTIA A+ Core 1 Exam Objectives (220-1201), Domain 5.2 - Troubleshooting RAM and motherboard issues.

NEW QUESTION # 14

When turning on a workstation, a technician observes the following message:

"Bootable device not found."

The technician verifies the correct boot order in the BIOS. Which of the following steps should the technician take next?

- A. Reseat the RAM.
- B. Reformat the HDD.
- C. Run HDD diagnostics.
- D. Replace the HDD.

Answer: C

Explanation:

If the system reports "Bootable device not found", and the BIOS is configured correctly, the next step is to run diagnostics on the hard drive to check for physical or logical failure. It could be a sign of a failing drive or corrupt boot sector.

Option A: Reformatting the drive would erase data - not a diagnostic step.

Option C: RAM does not affect whether a drive is bootable.

Option D: Replacing the drive should only be done after diagnostics confirm failure.

CompTIA A+ Core 1 Exam Objective Reference:

Objective 3.5: Given a scenario, troubleshoot problems related to storage devices.

NEW QUESTION # 15

A third-party contractor recently installed a new switch, router, and cabling for a small corporate office. After the installation, users started experiencing issues connecting to resources over the network.

INSTRUCTIONS

Click on each PC and server to review outputs. From the remediation section on the right, select an issue and solution for each device.

You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.

- ☐ Obtain an IP address automatically

- ☒ Use the following IP address:—

IP address: 192.168.1.1

Subnet mask: 255.255.255.0

Default gateway: 192.168.1.50

- ☐ Obtain DNS server address automatically

- ☒ Use the following DNS server addresses:—

Preferred DNS server: 192.168.1.1

Alternate DNS server: 192.168.1.50

- ☐ Validate settings upon exit

Advanced...

Answer:

Explanation:

See the Explanation and detailed steps below.

Explanation:

Looking at the network configurations and outputs from both PCs and servers, here are the possible issues and solutions:

1. PC 1

Issue: The IP address for PC1 is 192.168.1.1, which conflicts with Server 1 (which also uses 192.168.1.1).

Solution: Change the IP address on PC1 to a unique one within the range, like 192.168.1.3.

2. PC 2

Issue: PC 2 is configured with 192.168.1.2, which conflicts with Server 2 that has the same IP address.

Solution: Update the IP address on PC 2 to something unique, like 192.168.1.4.

3. Server 1

Issue: The IP address for Server 1 is 192.168.1.1, which conflicts with PC1.

Solution: Since Server 1 and PC1 are using the same IP address, change one of them. For Server 1, you could change the IP address to 192.168.1.5.

4. Server 2

Issue: Server 2 is using the IP address 192.168.1.2, which conflicts with PC2.

Solution: Update Server 2 to use a different IP address, such as 192.168.1.6.

General Remediation:

The primary problem here is overlapping IP addresses, leading to connectivity issues. Each device on the network must have a unique IP address. After making these changes, ensure that all devices can communicate properly by testing the connection between devices and verifying they can access shared resources.
