

CompTIA CNX-001 Exam Cost & CNX-001 New Exam Materials

BONUS!!! Download part of Actual4test CNX-001 dumps for free: <https://drive.google.com/open?id=1fN7Hh327HVGwl-K6Fkop8gQ6FPCVoLY7>

Most people spend much money and time to prepare the CNX-001 exam tests but the result is bad. Maybe you wonder how to get the CompTIA certification quickly and effectively? Now let Actual4test help you. It just takes one or two days to prepare the CNX-001 VCE Dumps and real questions, and you will pass the exam without any loss.

CompTIA CNX-001 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Network Operations, Monitoring, and Performance: This section of the exam measures skills of Network Operations Specialists and covers day-to-day operational management of network environments. It involves configuring monitoring tools, analyzing performance data, and responding to alerts. Candidates are evaluated on their ability to maintain network health, optimize throughput, and ensure consistent uptime by applying best practices for proactive performance tuning and operations management.

Topic 2	<ul style="list-style-type: none"> • Network Troubleshooting: This section of the exam measures the skills of Network Support Engineers and covers diagnosing and resolving connectivity and performance issues across various network layers. It focuses on identifying root causes, using diagnostic tools, and applying systematic troubleshooting methodologies. The goal is to ensure that professionals can minimize downtime, restore service quickly, and prevent recurring problems by maintaining a resilient and stable network environment.
Topic 3	<ul style="list-style-type: none"> • Network Architecture Design: This section of the exam measures the skills of Network Architects and covers the ability to design scalable, secure, and efficient network architectures. It focuses on understanding design principles, selecting appropriate network components, and aligning architecture decisions with organizational needs. Candidates are expected to demonstrate a solid grasp of topology planning, high-availability configurations, and integration of cloud and on-premise systems to ensure reliability and performance.
Topic 4	<ul style="list-style-type: none"> • Network Security: This section of the exam measures the skills of Security Engineers and covers core practices for protecting network infrastructure. It includes applying firewall rules, implementing access control measures, and designing secure segmentation strategies. The content emphasizes threat mitigation techniques, secure configuration of networking devices, and adherence to compliance frameworks, preparing professionals to safeguard both internal and external network assets effectively.

CNX-001 New Exam Materials & Reliable CNX-001 Braindumps Questions

Maybe you are still having trouble with the CompTIA CNX-001 exam; maybe you still don't know how to choose the CNX-001 exam materials; maybe you are still hesitant. But now, your search is ended as you have got to the right place where you can catch the finest CNX-001 exam materials. Here you can answer your doubts; you can easily pass the exam on your first attempt. All applicants who are working on the CNX-001 exam are expected to achieve their goals, but there are many ways to prepare for exam. Everyone may have their own way to discover. Some candidates may like to accept the help of their friends or mentors, and some candidates may only rely on some CNX-001 books. But none of these ways are more effective than our CNX-001 exam material. In summary, choose our exam materials will be the best method to defeat the exam.

CompTIA CloudNetX Certification Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35

A network architect is creating a network topology for a global SD-WAN deployment. The business has offices in Asia, Europe, and the United States and makes use of data centers in the United States and Europe.

Most traffic between sites must have the lowest latency possible. Which of the following topologies best meets this requirement?

- A. Star
- B. Hub-and-spoke
- C. Spine-and-leaf
- **D. Mesh**

Answer: D

Explanation:

A full-mesh SD-WAN topology allows each site to establish direct overlays with every other site, minimizing the number of hops and avoiding backhauling through a central hub, thereby delivering the lowest latency paths between Asia, Europe, and the US.

NEW QUESTION # 36

After a malicious actor used an open port in a company's lobby, a network architect needs to enhance network security. The solution must enable:

Security posture check
Auto remediation capabilities
Network isolation
Device and user authentication

Which of the following technologies best meets these requirements?

- A. 802.1X
- B. Microsegmentation
- C. NAC
- D. IPS

Answer: C

Explanation:

NAC solutions perform health and posture assessments before granting network access, authenticate both devices and users, automatically quarantine or remediate noncompliant machines, and enforce dynamic isolation policies, fully satisfying all four requirements.

NEW QUESTION # 37

A company just launched a cloud-based application. Some users are reporting the application will not load. A cloud engineer investigates the issues and reports the following:

- * Not all users are experiencing the issue
 - * The application infrastructure is optimal
 - * Users experiencing the issue belong to the company's remote sales team
- Which of the following is most likely misconfigured?

- A. Geolocation rules
- B. Application load balancers
- C. IP addressing
- D. Ports and protocols

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Because only the remote sales team is experiencing access issues-and the application infrastructure is confirmed to be functioning correctly-it's likely that geolocation-based access control is misconfigured. If geofencing or region-based restrictions are applied incorrectly, traffic from users outside an allowed geographic area may be denied.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Geolocation and Access Controls":

"Geolocation rules filter traffic based on IP geographies. Misconfiguration can unintentionally block legitimate users who access services from disallowed locations." Other options:

- * A. Load balancers distribute traffic and would affect all users, not a specific group.
- * B. Port/protocol misconfiguration would affect all or specific service components, not location-based access.
- * C. IP addressing issues are typically network-wide, not region-specific.

NEW QUESTION # 38

Which of the following helps the security of the network design to align with industry best practices?

- A. Memorandum of understanding
- B. Service-level agreement
- C. Licensing agreement
- D. Reference architectures

Answer: D

Explanation:

Reference architectures provide standardized, vendor-agnostic blueprints that incorporate industry best practices for security, ensuring your network design aligns with proven frameworks.

NEW QUESTION # 39

A network architect is designing a solution to secure the organization's applications based on the security policy. The requirements are:

- * Users must authenticate using one set of credentials.

- * External users must be located in authorized sites.
 - * Session timeouts must be enforced.
 - * Network access requirements should be changed as needed.
- Which of the following best meet these requirements? (Choose two.)

- **A. Single sign-on**
- B. Multifactor authentication
- C. Role-based access
- **D. Conditional access policy**
- E. Risk-based authentication
- F. Static IP allocation

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

B: Single Sign-On (SSO) - SSO enables users to authenticate once using a unified set of credentials and gain access to multiple applications. It improves user experience and simplifies identity management.

E: Conditional Access Policy - This supports dynamic enforcement of access policies based on user location, device, risk level, and session characteristics. It allows administrators to define rules such as only allowing access from authorized geographic regions and automatically enforcing session timeouts or requiring reauthentication.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Identity and Access Management (IAM)":

"SSO provides seamless authentication across services while reducing password fatigue and attack surfaces."

"Conditional Access enforces access controls based on real-time conditions such as location, device compliance, and session context, supporting dynamic security postures." Other options:

- * A. Role-based access defines permissions but does not handle location or session control.
- * C. Static IP allocation does not offer user-based access controls.
- * D. MFA enhances security but is not directly aligned with all the listed requirements.
- * F. Risk-based authentication evaluates threat levels but does not handle session timeout or location enforcement directly.

NEW QUESTION # 40

.....

Currently, if you want to make CNX-001 exam certification more tied to your status in the IT industry with fierce competition, and make professional competence stronger in the IT industry, you can choose our Actual4test's CNX-001 Exam Training materials. With efforts for many years, the passing rate of Actual4test's CNX-001 certification exam has reached as high as 100%. Choosing Actual4test means to choose success.
