

CompTIA SK0-005 Updated Test Cram | Practice Test SK0-005 Pdf

BONUS!!! Download part of VCE4Dumps SK0-005 dumps for free: <https://drive.google.com/open?id=1-4XmZI7AqJM3wzaERPtPpCmMOSli5pbT>

Pass your SK0-005 exam certification with SK0-005 reliable test. The VCE4Dumps SK0-005 practice material can guarantee you success at your first try. When you choose SK0-005 updated dumps, you will enjoy instant downloads and get your SK0-005 study files the moment you have paid for them. In addition, the update is frequent so that you can get the SK0-005 latest information for preparation.

CompTIA SK0-005 Certification Exam is designed to validate the skills and knowledge of IT professionals who are responsible for managing, maintaining, and troubleshooting server infrastructure. SK0-005 exam covers a wide range of topics related to server hardware, software, storage, security, and networking. It is an essential certification for professionals who are working in server administration, IT support, and network engineering roles.

Will you feel that the product you have brought is not suitable for you? One trait of our SK0-005 exam prepare is that you can freely download a demo to have a try. Because there are excellent free trial services provided by our SK0-005 exam guides, our products will provide three demos that specially designed to help you pick the one you are satisfied. We will inform you that the SK0-005 Study Materials should be updated and send you the latest version in a year after your payment. We will also provide some discount for your updating after a year if you are satisfied with our SK0-005 exam prepare.

CompTIA SK0-005 certification exam covers a wide range of topics, including server architecture, storage solutions, networking, virtualization, security, and disaster recovery. CompTIA Server+ Certification Exam certification exam is designed for professionals who work with servers, including system administrators, network administrators, and IT technicians. SK0-005 exam consists of 90 multiple-choice questions, and candidates are given 90 minutes to complete the exam. To pass the exam, candidates must achieve a score of 750 or higher on a scale of 100-900. Overall, the CompTIA SK0-005 Certification Exam is an excellent choice for individuals who want to demonstrate their expertise in server infrastructure and advance their careers in the IT industry.

CompTIA Server+ Certification Exam Sample Questions (Q454-Q459):

NEW QUESTION # 454

A technician is sizing a new server and, for service reasons, needs as many hot-swappable components as possible. Which of the following server components can most commonly be replaced without downtime? (Select three).

- A. Motherboard
- B. Power supplies
- C. Drives
- D. Memory

- E. BIOS
- F. Processor
- G. CMOSIC
- **H. Fans**

Answer: B,C,H

Explanation:

Drives, fans, and power supplies are server components that can most commonly be replaced without downtime if they are hot-swappable. Hot-swappable components can be removed and inserted while the server is running, without affecting its operation or performance. Drives store data and applications, fans cool down the server components, and power supplies provide electricity to the server. Replacing these components can prevent data loss, overheating, or power failure. References: CompTIA Server+ Certification Exam Objectives, Domain 2.0: Hardware, Objective 2.2: Given a scenario, install, configure and maintain server components.

NEW QUESTION # 455

When configuring networking on a VM, which of the following methods would allow multiple VMs to share the same host IP address?

- A. vSwitch
- B. Host only
- C. Bridged
- **D. NAT**

Answer: D

Explanation:

Explanation

The method that would allow multiple VMs to share the same host IP address is NAT. NAT (Network Address Translation) is a technique that allows multiple devices to use a single public IP address by mapping their private IP addresses to different port numbers. NAT can be used for VM networking to enable multiple VMs on the same host to access the internet or other networks using the host's IP address. NAT can also provide security benefits by hiding the VMs' private IP addresses from external networks.

NEW QUESTION # 456

Which of the following should be configured in pairs on a server to provide network redundancy?

- A. MRU
- B. CPU
- C. DLP
- D. SCP
- **E. NIC**

Answer: E

Explanation:

NIC stands for network interface card, which is a hardware component that allows a server to connect to a network. Configuring NICs in pairs on a server would provide network redundancy, meaning that if one NIC fails, the other one can take over and maintain network connectivity. The other options are not related to network redundancy.

NEW QUESTION # 457

A server technician is installing a new server OS on legacy server hardware. Which of the following should the technician do FIRST to ensure the OS will work as intended?

- A. Make sure the case and the fans are free from dust to ensure proper cooling.
- **B. Consult the HCL to ensure everything is supported.**
- C. Low-level format the hard drives to ensure there is no old data remaining.
- D. Migrate the physical server to a virtual server.

Answer: B

Explanation:

Explanation

The first thing that the technician should do before installing a new server OS on legacy server hardware is to consult the HCL (Hardware Compatibility List) to ensure everything is supported. The HCL is a list of hardware devices and components that are tested and certified to work with a specific OS or software product.

The HCL helps to avoid compatibility issues and performance problems that may arise from using unsupported or incompatible hardware. Migrating the physical server to a virtual server may be a good option to improve scalability and flexibility, but it requires additional hardware and software resources and may not be feasible for legacy server hardware. Low-level formatting the hard drives may be a good practice to erase any old data and prepare the drives for a new OS installation, but it does not guarantee that the hardware will work with the new OS. Making sure the case and the fans are free from dust may be a good practice to ensure proper cooling and prevent overheating, but it does not guarantee that the hardware will work with the new OS. NEW QUESTION # 458

A technician needs to install a Type 1 hypervisor on a server. The server has SD card slots, a SAS controller, and a SATA controller, and it is attached to a NAS. On which of the following drive types should the technician install the hypervisor?

- A. SAS drive
- B. SATA drive
- C. NAS drive
- D. SD card

Answer: A

Explanation:

Assuming SD Slots are internal. If so, then Internal SD Slots are recommended.
