# Confluent CCDAK Latest Exam Dumps & Valid Test CCDAK Experience

Customers of Actual4Dumps will also get up to 90 days of Confluent Certified ICT Expert CCDAK free real questions updates as a bonus perk. Actual4Dumps not only provides the updated Confluent CCDAK practice questions but also offers these excellent offers that make them the best option in the market. Don't wait anymore. Buy Actual4Dumps's Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) updated practice material today!

Confluent Certified Developer for Apache Kafka (CCDAK) Certification Exam is a rigorous certification program designed for developers who are interested in validating their skills and understanding of Apache Kafka. Confluent Certified Developer for Apache Kafka Certification Examination certification program is offered by Confluent, a leading data streaming platform that provides enterprise-grade solutions for managing and processing data in real-time. The CCDAK certification program is designed to measure a developer's proficiency in Kafka development and ensures that they have the necessary skills to build and maintain Kafka-based applications.

Confluent Certified Developer for Apache Kafka (CCDAK) Certification Examination is an industry-recognized certification that enables professionals to demonstrate their understanding of Apache Kafka and its ecosystem. CCDAK examination is developed and administered by Confluent, a leading provider of Apache Kafka-based solutions. The CCDAK certification is designed for developers who work with Apache Kafka and want to validate their skills and knowledge of the platform.

CCDAK exam dumps, Confluent CCDAK test cost

In the past ten years, our company has never stopped improving the Confluent Certified Developer for Apache Kafka Certification Examination exam cram. For a long time, we have invested much money to perfect our products. At the same time, we have introduced the most advanced technology and researchers to perfect our Confluent Certified Developer for Apache Kafka Certification Examination exam questions. At present, the overall strength of our company is much stronger than before. We are the leader in the market and master the most advanced technology. In fact, our CCDAK Test Guide has occupied large market shares because of our consistent renovating. We have built a powerful research center and owned a strong team. Up to now, we have got a lot of patents about the CCDAK test guide. In the future, we will continuously invest more money on researching.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q59-Q64):

NEW QUESTION # 59
An application is writing AVRO messages using Schema Registry to topic t1. During this process, the Schema Registry becomes unavailable for a few seconds.
What is the expected impact to the application?

- A. Since messages are cached by the producer, the application will only get an error if the producer is sending the batch at that time.
- B. Since the broker will eventually replicate the message Schema, there will not be an error.
- C. All messages within that time will receive an error.
- D. The application may not have any impact, unless it is writing messages with a new Schema Definition.

Answer: D

NEW QUESTION # 60
What is accomplished by producing data to a topic with a message key?

- A. Kafka brokers allow you to add more partitions to a given topic, without impacting the data flow for existing keys.
- B. Consumers can filter messages in real time based on the message key without processing unrelated messages.
- C. Messages with the same key are routed to a deterministically selected partition, enabling order guarantees within that partition.
- D. It provides a mechanism for encrypting messages at the partition level to ensure secure data transmission.

Answer: C

Explanation:
When a message key is specified in Kafka, the producer uses a partitioner(typically the default hash-based partitioner) todeterministically map all records with the same key to the same partition. Kafka guarantees order within a partition, so this enables per-key ordering.
FromKafka Producer Concepts:
"If a key is present, the producer will always route records with the same key to the same partition. Kafka preserves the order of records within a partition." This is essential for ordered processing and join semantics.
Reference:Kafka Producer Design > Partitions and Keys

NEW QUESTION # 61
How will you find out all the partitions without a leader?

- A. kafka-topics.sh --zookeeper localhost:2181 --describe --unavailable-partitions
- B. kafka-topics.sh --bootstrap-server localhost:2181 --describe --unavailable-partitions
- C. kafka-topics.sh --zookeeper localhost:2181 --describe --under-replicated-partitions
- D. kafka-topics.sh --broker-list localhost:9092 --describe --under-replicated-partitions

Answer: A

Explanation:
Please note that as of Kafka 2.2, the --zookeeper option is deprecated and you can now usekafka-topics.sh --bootstrap-server

localhost:9092 --describe --unavailable-partitions

NEW QUESTION # 62

is KSQL ANSI SQL compliant?

- A. No
- B. Yes

Answer: A

Explanation:
KSQL is not ANSI SQL compliant, for now there are no defined standards on streaming SQL languages

NEW QUESTION # 63

To enhance compression, I can increase the chances of batching by using

- A. linger.ms=20
- B. max.message.size=10MB
- C. batch.size=65536
- D. acks=all

Answer: A

Explanation:
linger.ms forces the producer to wait before sending messages, hence increasing the chance of creating batches that can be heavily compressed.
