Salesforce Consumer Goods Cloud Accredited Professional Consumer-Goods-Cloud-Accredited-Professional Prüfungsfragen mit Lösungen (Q21-Q26):

21. Frage

When creating a new page for the Consumer Goods Cloud mobile application, what components are available to be added?

- **A. Quip Documents, Einstein Predictions, and Custom Object Task List**
- B. DEX Electronic Data Interchange(EDI), Custom Object Task List, and Customer Onboarding
- C. Quip Documents, Einstein Predictions, and Price Optimization
- D. DEX Electronic Data Interchange(EDI), Price Optimization, and Customer Onboarding

Antwort: A

Begründung:

Quip Documents, Einstein Predictions, and Custom Object Task List are three components that can be added to a new page for the Consumer Goods Cloud mobile application. These components provide additional functionality and information for users in the field. They are:

* Quip Documents, which allows users to access and collaborate on Quip documents within the app. Quip documents are cloud-based documents that can include text, images, spreadsheets, charts, and more.

* Einstein Predictions, which allows users to see predictions and recommendations from Einstein AI based on their data and actions. For example, users can see predictions for sales revenue, product demand, or visit outcomes.

* Custom Object Task List, which allows users to create and complete tasks related to custom objects within the app. Custom objects are objects that are defined and configured to suit specific business needs. Verified References: [Salesforce Consumer Goods Cloud Implementation Guide], page 40-41

22. Frage

A Consumer Goods Cloud user wants to create a new custom Task Type to support the auditing of coolers installed at retail store locations. Which Assessment Task Definition Task Type should be used?

- A. Planogram Check
- B. Other
- C. Custom
- **D. Inventory Check**

Antwort: D

23. Frage

Which object is exclusively available to users in setup to perform direct store delivery?

- **A. Shipment**
- B. ProductTransfer
- C. Order
- D. Delivery Task

Antwort: A

Begründung:

The Shipment object is specifically designed for managing direct store delivery processes, tracking the movement of goods from distribution to retail locations.

24. Frage

Northern Trail Outfitters (NTO) would like to know if the high value assets placed in stores are compliant. If not compliant, NTO would like a boolean value generated to trigger an action plan for correction. What is the recommended approach to meet the customer's requirement and limit the amount of custom code?

- A. Use an inventory check task with flow
- **B. Use a custom task with flow**
- C. Use a custom task with apex
- D. Use a promotion check task with apex

Antwort: B

Begründung:

To meet the customer's requirement and limit the amount of custom code, NTO should use a custom task with flow. A custom task is a type of action plan task that can be defined and configured to suit specific business needs. A flow is a tool that automates a business process by collecting data and performing actions. By using a custom task with flow, NTO can create a task that captures the information related to the high value assets placed in stores, such as their location, condition, and compliance. The flow can then generate a boolean value based on the compliance criteria and trigger an action plan for correction if needed. Verified Reference: [Salesforce Consumer Goods Cloud Implementation Guide], page 26.

25. Frage

A member of the Northern Trail Outfitters company has been tasked with setting up planograms for the field team. Which of the following steps is required to ensure an assessment task of planogram check is available to the field?

- **A. The team member must upload an image of the planogram to the assessment task's related documents.**
- B. The team member must associate the In-Store Location to the Planogram for the functionality to work.
- C. The team member must populate the custom context field on the assessment task.
- D. The team member must make sure Einstein Object Detection has been enabled.

Antwort: A

Begründung:

Uploading an image of the planogram is essential for enabling field teams to perform planogram checks, providing a visual reference

for in-store product placement and arrangement.
