TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam
2

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12
Which of the following is included as part of Architecture Governance?

- A. Creating and maintaining the Statement of Architecture Work through the ADM cycle
- B. Interacting with the CxO level on Enterprise Architecture
- C. Managing Stakeholders and their requirements
- D. Ensuring compliance with internal and external standards and regulatory obligations

Answer: D

Explanation:
Ensuring compliance with internal and external standards and regulatory obligations is one of the activities included as part of Architecture Governance. Architecture Governance is the practice and orientation by which enterprise architectures and other architectures are managed and controlled at an enterprise-wide level. It involves establishing processes, roles, responsibilities, policies, and standards to ensure that architectures are aligned with the enterprise's strategy and objectives, and meet the quality and performance requirements. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.6 Architecture Governance.

NEW QUESTION # 13
Complete the sentence Business Transformation Readiness Assessment is _____.

- A. a joint effort between corporate staff lines of business and IT planners
- B. a way to put building blocks into context thereby supporting re-usable solutions
- C. widely used to validate an architecture that is being developed
- D. to ensure the active support of powerful stakeholders

Answer: A

Explanation:
Business Transformation Readiness Assessment is a joint effort between corporate staff lines of business and IT planners to evaluate the readiness of the organization to undergo change. It involves assessing factors such as vision, commitment, capacity, capability, culture, and motivation that may influence the success of a business transformation initiative. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.2 Business Transformation Readiness Assessment.

NEW QUESTION # 14
Consider the following statement:
According to the TOGAF Standard a governed approach of a particular deliverable will ensure a system of continuous monitoring to check integrity changes decision-making and audit of all architecture-related activities Which deliverable is being referred to?

- A. The Architecture Vision
- B. An Architecture Contract
- C. The Architecture Definition Document

Exam OGEA-103 Dumps, OGEA-103 Online Training Materials

P.S. Free 2025 The Open Group OGEA-103 dumps are available on Google Drive shared by BraindumpStudy:
<https://drive.google.com/open?id=1Kh7x3yGIXGEgJJ0NyMDaIwbQSkOYKrvt>

The BraindumpStudy is committed to making the The Open Group OGEA-103 exam practice test question the ideal study material for quick and complete TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) exam preparation. To achieve this objective the "BraindumpStudy" is offering real, valid, and updated OGEA-103 Exam Practice test questions in three different formats. These formats are BraindumpStudy OGEA-103 PDF dumps files, desktop practice test software, and web-based practice test software.

The Open Group OGEA-103 (TOGAF Enterprise Architecture Combined Part 1 and Part 2) Certification Exam is a comprehensive certification program that tests the candidate's proficiency in enterprise architecture concepts, principles, and practices. It is a globally recognized certification that provides a common language, methodology, and framework for enterprise architecture professionals. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification is ideal for professionals who want to advance their careers in enterprise architecture and demonstrate their expertise to employers and clients.

OGEA-103 Latest Test Materials | OGEA-103 Torrent

A growing number of people start to take the OGEA-103 exam in order to gain more intensifying attention in the different field. It is known to us that the knowledge workers have been playing an increasingly important role all over the world, since we have to admit the fact that the OGEA-103 certification means a great deal to a lot of the people, especially these who want to change the present situation and get a better opportunity for development. Our OGEA-103 Exam Questions will help you make it to pass the OGEA-103 exam and get the certification for sure.

The OGEA-103 exam covers both Part 1 and Part 2 of the TOGAF framework, which includes topics such as architecture development methodology, business architecture, data architecture, application architecture, technology architecture, and architecture governance. OGEA-103 exam is designed to test not only a candidate's knowledge of these topics, but also their ability to apply them in practical scenarios.

The Open Group OGEA-103: TOGAF Enterprise Architecture Combined Part 1 and Part 2 exam is a comprehensive assessment designed to test an individual's knowledge and understanding of the concepts and principles of enterprise architecture. It is a combination of two exams, Part 1 and Part 2, which together cover the entire TOGAF framework. OGEA-103 Exam is designed for enterprise architects, IT professionals, and anyone involved in enterprise architecture development.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q101-Q106):

NEW QUESTION # 101

Which of the following best describes the purpose of the Gap Analysis technique?

- A. To allocate resources for architecture projects
- B. To govern the architecture throughout its implementation process
- C. To develop a set of general rules and guidelines for the architecture
- **D. To identify items omitted from the Target Architecture**

Answer: D

Explanation:

Explanation

The purpose of the Gap Analysis technique is similar to the previous question, but with a focus on the Target Architecture. The technique helps to identify the items that are not included or specified in the Target Architecture, such as capabilities, services, components, standards, or technologies. These items may be essential for achieving the vision and goals of the enterprise, or for addressing the stakeholder concerns and requirements. By identifying the items omitted from the Target Architecture, the technique helps to ensure that the architecture is comprehensive, feasible, and realistic.

NEW QUESTION # 102

Which ADM phase focuses on defining the problem to be solved, identifying the stakeholders, their concerns, and requirements?

- A. Phase
- **B. Phase A**
- C. Phase
- D. Preliminary Phase

Answer: B

Explanation:

Phase A: Architecture Vision is the first phase of the Architecture Development Method (ADM) cycle, which is the core of the TOGAF standard. The main purpose of this phase is to define the scope and approach of the architecture development, and to create the Architecture Vision, which is a high-level description of the desired outcomes and benefits of the proposed architecture. To achieve this purpose, this phase focuses on defining the problem to be solved, identifying the stakeholders, their concerns, and requirements, and establishing the business goals and drivers that motivate the architecture work. This phase also involves obtaining the approval and commitment of the sponsors and other key stakeholders, and initiating the Architecture Governance process.

NEW QUESTION # 103

Consider the following statement:

Separate projects may operate their own ADM cycles concurrently, with relationships between the different projects. What does it illustrate?

- A. Iteration
- B. Enterprise Architecture
- C. Requirements management
- D. Implementation governance

Answer: A

Explanation:

Explanation

The statement illustrates iteration and the ADM. Iteration is the technique of repeating a process or a phase with the aim of improving or refining the outcome. Iteration allows for feedback loops and adaptations at any point in the architecture development and transition process. Separate projects may operate their own ADM cycles concurrently, with relationships between the different projects, to address different aspects or levels of the architecture in an iterative manner. Reference: The TOGAF Standard | The Open Group Website, Section 3.1 Introduction to the ADM.

NEW QUESTION # 104

Exhibit:

Consider the image showing basic architectural concepts.

What are items A and B?

- A. A-Stakeholder, B-Concern
- B. A-Candidate Architecture, B-Trade-off
- C. A-User, B-Requirement
- D. A-Base Architecture, B-Target Architecture

Answer: A

Explanation:

In the context of TOGAF, a stakeholder is any individual, team, or organization who has interests in, or concerns relative to, the outcome of the architecture. Concerns are those interests which pertain to any aspect of the system's functioning, development or operation, including considerations such as performance, reliability, and security¹. References:

NEW QUESTION # 105

Please read this scenario prior to answering the question

You are working as an Enterprise Architect at a large supermarket. The company runs many retail stores, as well as an online grocery shop. Many of the stores used to remain open 24/7, but the number has decreased in recent years. Instead, they now focus on fulfilling online orders during the night.

The company has a mature Enterprise Architecture (EA) practice and uses the TOGAF standard for its architecture development method. The EA practice is involved in all aspects of the business, with oversight provided by an Architecture Board with representatives from different parts of the business. The EA program is sponsored by the Chief Information Officer (CIO). Each store uses a standard method to track sales and inventory. This involves sending accurate timely sales data to a central AI-based inventory management system that can predict demand, adjust stock levels and automate reordering. The central inventory management system is housed at the company's central data center.

The company has bought a major rival. The Chief Executive Officer believes that a merger will enable growth through combined offerings and cost savings. The decision has been taken to fully integrate the two organizations, including merging retail operations and systems. This means that duplicated systems will be replaced with one standard retail management system. Also, the company will reduce the number of applications that are used. The CIO expects significant savings will be achieved by implementing these changes across the newly merged company.

One improvement that the rival has successfully implemented is the use of hand-held devices within stores, for both customers and staff. This has increased both customer and staff employee satisfaction due to the time savings this has brought. The CIO has given the go-ahead to roll out the devices in all stores but has stated that training on how to use the hand-held devices should be brief because there are a lot of employees, many of whom are part-time.

The Request for Architecture Work to oversee the merger has been approved. The project has been scoped and you have been assigned to work on it. Your role includes managing the architecture for the retail stores.

Refer to the scenario

You have been asked to confirm the most relevant architecture principles for the transformation.

Based on the TOGAF Standard, which of the following is the best answer?

[Note: The sequence of the principles listed in each answer does not matter. You should assume the company follows the set of principles that are provided in the TOGAF Standard, ADM Techniques, Architecture Principles chapter. You may need to refer to section 2.6 located in ADM Techniques within the reference text to answer this question.]

- A. Maximize Benefit to the Enterprise, Common Use Applications, Data is an Asset, Responsive Change Management, Technology Independence
- B. Common Vocabulary and Data Definitions, Compliance with the Law, Requirements Based Change, Responsive Change Management, Data Security
- C. Control Technical Diversity, Interoperability, Data is an Asset, Data is Shared, Business Continuity
- D. Common Use Applications, Data is an Asset, Data is Accessible, Ease of Use, Business Continuity

Answer: A

Explanation:

Key aspects of the scenario:

Business Objective:

A merger is happening to combine offerings, reduce costs, and achieve operational efficiency.

The goal includes fully integrating retail operations and systems, replacing duplicated systems, and reducing the number of applications used.

Technological Improvements:

A central AI-based inventory system is in place.

Hand-held devices for stores have improved customer and staff satisfaction and increased efficiency.

Scope of Architecture Work:

Integrating the merged systems.

Managing retail architecture to optimize operations.

TOGAF Alignment:

TOGAF principles aim to ensure the architecture supports business transformation effectively while aligning with governance and best practices.

Best answer analysis:

Option 1:

Maximize Benefit to the Enterprise: Aligns with the merger goals of cost reduction and efficiency.

Common Use Applications: Matches the goal to reduce duplicated systems.

Data is an Asset: Central AI system depends on accurate and reliable data.

Responsive Change Management: Necessary to support the transition and manage organizational impacts.

Technology Independence: Encourages selecting flexible, scalable solutions post-merger.

This option comprehensively aligns with the scenario.

Option 2:

Control Technical Diversity: Important but less emphasized than cost reduction and application unification.

Interoperability: Relevant, but less critical compared to principles addressing business value.

Data is an Asset: Relevant.

Data is Shared: Implied in centralized inventory but not directly stated.

Business Continuity: Important but not the main focus here.

This option partially fits but lacks emphasis on business outcomes.

Option 3:

Common Vocabulary and Data Definitions: Indirectly helpful but not central to the transformation.

Compliance with the Law: Always critical, but no explicit legal issues are mentioned.

Requirements-Based Change: General principle but not transformation-specific.

Responsive Change Management: Relevant.

Data Security: Important but not a central concern in the scenario.

This option focuses more on governance and less on merger goals.

Option 4:

Common Use Applications: Relevant to reducing duplicate systems.

Data is an Asset: Relevant.

Data is Accessible: Fits with AI system and handheld devices but is a subset of "Data is an Asset." Ease of Use: Relevant to handheld devices but not a core transformation principle.

Business Continuity: Important but secondary to cost and efficiency.

This option focuses more on usability and accessibility rather than transformation objectives.
