

# CramPDF's Juniper JN0-481 Practice Test Software (Web-Based and Desktop)

You do not require an active internet connection after installation of the Juniper JN0-481 practice exam software. Repetitive attempts of Juniper JN0-481 exam dumps boosts confidence and provide familiarity with the JN0-481 Actual Exam format. A free demo version is also available for satisfaction. This JN0-481 software provides a real Data Center, Specialist (JNCIS-DC) (JN0-481) exam environment to help ease exam anxiety.

The contents of our JN0-481 study materials are all compiled by industry experts based on the examination outlines and industry development trends over the years. JN0-481 exam guide is not simply a patchwork of test questions, but has its own system and levels of hierarchy, which can make users improve effectively. Our JN0-481 Study Materials contain test papers prepared by examination specialists according to the characteristics and scope of different subjects. And if you study with our JN0-481 exam questions, you are bound to pass the JN0-481 exam.

## JN0-481 latest dumps

The CramPDF wants to win the trust of Juniper JN0-481 exam candidates at any cost. To fulfill this objective the CramPDF is offering top-rated and real JN0-481 exam practice test in three different formats. These JN0-481 Exam Question formats are PDF dumps, web-based practice test software, and web-based practice test software.

## Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q15-Q20):

### NEW QUESTION # 15

Referring to the exhibit, how many broadcast domains will an Ethernet frame pass through when traversing the IP fabric from Server A to Server B?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

Referring to the exhibit, the image shows a simplified diagram of an IP fabric network connecting two servers, labeled as Server A and Server B. The IP fabric is a network architecture that uses a Clos topology to provide high bandwidth, low latency, and scalability for data center networks.

The IP fabric consists of spine and leaf devices that use BGP as the routing protocol and VXLAN as the overlay technology.

A broadcast domain is a logical portion of a network where any device can directly transmit broadcast frames to other devices at the data link layer (OSI Layer 2). A broadcast frame is a frame that has a destination MAC address of all ones (FF:FF:FF:FF:FF:FF), which means that it is intended for all devices in the same broadcast domain. A broadcast domain is usually bounded by a router, which does not forward broadcast frames to other networks.

In the exhibit, there are two broadcast domains that an Ethernet frame will pass through when traversing the IP fabric from Server A to Server B. The first broadcast domain is the one that contains Server A and the leaf device that it is connected to. The second broadcast domain is the one that contains Server B and the leaf device that it is connected to. The IP fabric itself is not a broadcast domain, because it uses IP routing and VXLAN encapsulation to transport the Ethernet frames over the Layer 3 network.

#### NEW QUESTION # 16

Which two statements are correct about probes? (Choose two.)

- A. All default probes are enabled for all blueprints.
- B. Default probes can be cloned, modified, and saved.
- C. Only the variable parameters for default probes can be edited and saved.
- D. Default probes are enabled, based on the intent for a blueprint.

**Answer: B,D**

Explanation:

Probes are the basic unit of abstraction in Intent-Based Analytics (IBA). They are used to collect, process, and analyze data from the network and raise anomalies based on specified conditions.

Probes are composed of processors and stages that form a directed acyclic graph (DAG) of data flow.

### NEW QUESTION # 17

What is one indicator in the Apstra UI that implies that changes to a blueprint are ready to be committed?

- A. Each assigned device has been set to Deploy mode.
- B. Interface maps have been assigned through Device Profiles.
- C. The Staged tab turns yellow
- **D. The Staged tab turns green**

**Answer: D**

### NEW QUESTION # 18

You are receiving cable, interface, and BGP anomalies from several devices within the data center fabric. In Juniper Apstra, how would you troubleshoot these types of errors?

- A. In the UI, access the console to the devices and review the interface states.
- B. In the UI, go to Time Voyager and revert to the last working version.
- **C. In the UI, verify device connectivity by consulting the cable map.**
- D. In the UI, go to Devices and confirm that agent connectivity is fine.

**Answer: C**

Explanation:

The cable map is a graphical representation of the physical connections between the devices in the data center fabric. It shows the status of the cables, interfaces, and BGP sessions for each device. You can use the cable map to identify and troubleshoot any cable, interface, or BGP anomalies that may occur in the fabric. You can also filter the cable map by device name, device type, device role, device state, cable state, interface state, or BGP state.

### NEW QUESTION # 19

Multitenancy for applications is achieved by creating virtual networks (VNs) within which construct?

- A. connectivity template
- B. security policy
- C. routing table
- **D. routing zone**

**Answer: D**

Explanation:

A routing zone is an L3 domain, the unit of tenancy in multi-tenant networks. You create routing zones for tenants to isolate their IP traffic from one another, thus enabling tenants to re-use IP subnets. In addition to being in its own VRF, each routing zone can be assigned its own DHCP relay server and external system connections. You can create one or more virtual networks within a routing zone, which means a tenant can stretch its L2 applications across multiple racks within its routing zone.

### NEW QUESTION # 20

.....

All our regular candidates have impulse to choose again when they have the similar JN0-481 exam. So they totally trust us. All exams are not insuperable obstacle anymore with our JN0-481 training materials. Our credibility is unquestionable. In the course of obtaining success, we need a number of helps, either external or internal, but to the exam, the quality of JN0-481 practice materials are of great importance. So our JN0-481 learning dumps are acclaimed as masterpieces.

**JN0-481 Valid Exam Voucher:** <https://www.crampdf.com/JN0-481-exam-prep-dumps.html>

Most candidates prefer JN0-481 network simulator review to Prep4sure pdf, Juniper JN0-481 Valid Exam Voucher JN0-481 Valid Exam Voucher certification is a quite outstanding advantage in you resume, We see to it that our assessment is always at par with what is likely to be asked in the actual EXIN JN0-481 Materials examination, As the rapid development of the science and

technology and the fierce competition of market, it is urgent for many people to get JN0-481 certification.

Letters: email, memos, The goal of this chapter is to show you how to create your own objects, Most candidates prefer JN0-481 network simulator review to Prep4sure pdf.

Juniper JNCIS-DC certification is a quite outstanding advantage in you resume, We see to it that our assessment is always at par with what is likely to be asked in the actual EXIN JN0-481 Materials examination.

## Providing You Pass-Sure JN0-481 Test Pass4sure with 100% Passing Guarantee

As the rapid development of the science and technology and the fierce competition of market, it is urgent for many people to get JN0-481 certification, Rest assured that our questions and answers, you will be completely ready for the Juniper JN0-481 certification exam.
