- A. Allow multiple forecasts for each user.
- B. Allow visibility into direct reports' records for management.
- C. Grant access to records regardless of ownership.
- D. Grant access to related records based on account sharing.

Answer: A,D

NEW QUESTION # 164

An administrator would Like to know If any other administrators or delegated administrators are using the Log In As a User feature. Where the administrators should are using the Log in As a User feature.

- A. Login History
- B. Grant Account Login Access
- C. Connected App Usage
- D. Setup Audit Trail

Answer: D

Explanation:

The Setup Audit Trail is a tool that allows you to view and download a log of changes made in your org's Setup area. The log shows up to 20 fields of information for each change, such as who made it, when it was made, what type of change it was, and what values were changed. You can use the Setup Audit Trail to track configuration changes directly in production and identify any unauthorized or problematic changes. One of the changes that the Setup Audit Trail tracks is when a user grants login access to another user. This means that you can use the Setup Audit Trail to see if any other administrators or delegated administrators are using the Log In As a User feature. NEW QUESTION # 165

Users report that the industry picklist field is no longer visible on account records. What test can an administrator use to troubleshoot the issue?

- A. Debug log
- B. Field audit history
- C. Field history tracking
- D. Setup audit trail

Answer: D

Explanation:

The setup audit trail tracks the recent setup changes that you and other administrators have made to your org. It can help you troubleshoot issues by showing you what changes were made, who made them, and when. In this case, the setup audit trail can help the administrator identify if someone changed the field-level security, page layout, or profile settings for the industry picklist field.
