An organisation's administrator is tasked with setting up and configuring Reputation within a new community.
Per the provided requirements, there should be 5 (five) total reputation levels and the point range of the highest level must start at 5001 points. Which three tasks must occur in order to successfully deploy Reputation, per the requirements?
Choose 3 answers
Select one or more of the following:

- A. Enable setup and display of reputation levels
- B. Provide a custom name for each reputation level
- C. Configuration point ranges for the levels
- D. Remove and add reputation levels as required
- E. Upload a badge image for each reputation level

Answer: A,C,D

NEW QUESTION # 254
Universal Containers' Community is built on the Napili template. The community lets members access their Account page. The project manager needs to customize the Account record detail page and only show the record details.
What two things should the Salesforce Admin do to perform this task in Community Builder? Choose 2 answers.

- A. Make a copy of the Account detail object, remove the components NOT needed, and publish.
- B. Create a standard page, add the Account record detail component, and publish.
- C. Edit the Account record detail page, remove the components NOT needed, and publish.
- D. Add a page variation to Account detail page, add the record detail component, set the page variation as Active, and publish.

Answer: D

NEW QUESTION # 255

What is the most efficient way for the Salesforce Admin to fulfill these requirements?

Universal Containers use Community to grant business customers secure access to accounts, orders, and invoices. All customers are on a Customer Community License. Universal Containers plans to launch a project management module with the following requirements:* Leverage Chatter for collaboration.* Private project collaboration between the customer and Universal Containers.* Leverage documents, tasks, and events in the project space.* Customers can only see and access their projects.

- A. Add private groups and add project records to the group.
- B. Build a custom Visualforce project space and control access through sharing.
- C. Use custom objects, record feeds, and control access through sharing.
- D. Create unlisted groups and add project records to the group.

Answer: C

NEW QUESTION # 256

......
