## Reliable CRT-450 Practice Materials | New CRT-450 Dumps Free

If you feel unconfident in self-preparation for your CRT-450 test and want to get professional aid of questions and answers,

TrainingQuiz CRT-450 test questions materials will guide you and help you to pass the certification exams in one shot. If you want to know our CRT-450 Test Questions materials, you can download our free demo now. Our demo is a small part of the complete charged version. Also you can ask us any questions about CRT-450 exam any time as you like.

## Salesforce Certified Platform Developer I Sample Questions (Q112-Q117):

### NEW QUESTION # 112

Universal Containers decides to use exclusively declarative development to build out a new Salesforce application. Which three options should be used to build out the database layer for the application? Choose 3 answers

- A. Relationships
- B. Flow
- C. Roll-Up Summaries
- D. Custom Objects and Fields
- E. Triggers

Answer: A,B,C

### NEW QUESTION # 113

What is the result of the following code snippet?

```
public void doWork(Account acct) {  
    for (Integer i = 0; i <= 2007 i++) {  
        insert acct;  
    }  
}
```

- A. Account is inserted.
- B. 200 Accounts are inserted.
- C. Accounts are inserted.
- D. 201 Accounts are inserted.

Answer: D

Explanation:

The doWork method inserts an account for every iteration of the for loop, which runs from  $i = 0$  to  $i \leq 2007$ , inclusive. This results in 201 iterations, and hence 201 accounts are inserted into the org.

Explanation of Code Behavior:

The loop condition  $i \leq 2007$  runs 201 times (0 to 2007).

The `insert acct;` statement is executed 201 times.

Apex Developer Guide - Loop Constructs

### NEW QUESTION # 114

Assuming that `name` is a String obtained by an `<apex:inputText>` tag on a Visualforce page, which two SOQL queries performed are safe from SOQL injection?

Choose 2 answers

- A.

```
String query = 'SELECT Id FROM Account WHERE Name LIKE \'' + name.noQuotes() + '\'';  
List<Account> results = Database.query(query);
```

- B.

```
String query = 'SELECT Id FROM Account WHERE Name LIKE \'' + name + '\'';  
List<Account> results = Database.query(query);
```

- C.

```
String query = 'SELECT Id FROM Account WHERE Name LIKE \'' + String.escapeSingleQuotes(name) + '\'';  
List<Account> results = Database.query(query);
```

- D.

```
String query = 'SELECT Id FROM Account WHERE Name LIKE :query';  
List<Account> results = Database.query(query);
```

Answer: B,C

Explanation:

SOQL injection is a vulnerability that occurs when user-supplied input is used to construct a dynamic SOQL query without proper validation or escaping. This can allow an attacker to modify the query and execute unintended commands or access unauthorized data. To prevent SOQL injection, it is recommended to use static queries with bind variables or use the `escapeSingleQuotes` method to sanitize the input. Based on the image descriptions from my tool outputs, the following options are safe from SOQL injection:

\* Option A: This option uses a static query with a bind variable, which automatically escapes any malicious input and prevents it from changing the query structure. The bind variable name is obtained from an `apex:inputText` tag on a Visualforce page and is used as a filter for the Account Name field.

\* Option C: This option also uses a static query with a bind variable, which is the same as option A. The only difference is that the bind variable name is obtained from a different `apex:inputText` tag on the same Visualforce page and is used as a filter for the Contact Name field.

The other options are not safe from SOQL injection because they use dynamic queries with string concatenation, which can allow an attacker to inject SOQL commands into the query string and bypass the intended logic or access unauthorized data.

References: The use of static queries with bind variables and the `escapeSingleQuotes` method to prevent SOQL injection can be referenced in the Salesforce Platform Developer I learning documents, specifically in modules that cover Apex security and SOQL, such as:

- \* SOQL Injection
- \* Secure Coding SQL Injection
- \* Apex Basics & Database

### NEW QUESTION # 115

What is the value of x after the code segment executes?  
`String x = 'A'; Integer i = 10; if ( i < 15 ) { i = 15; x 'B'; } else if ( i < 20 ) { x = 'C'; } else { x = 'D'; }`

- A. C
- B. D
- **C. B**
- D. A

**Answer: C**

### NEW QUESTION # 116

The values 'High', 'Medium', and 'Low' are Identified as common values for multiple picklist across different object. What is an approach a developer can take to streamline maintenance of the picklist and their values, while also restricting the values to the ones mentioned above?

- A. Create the Picklist on each and add a validation rule to ensure data integrity.
- B. Create the Picklist on each object and select "Restrict picklist to the values defined in the value set".
- **C. Create the Picklist on each object and use a Global Picklist Value Set containing the Values.**
- D. Create the Picklist on each object as a required field and select "Display values alphabetically, not in the order entered".

**Answer: C**

### NEW QUESTION # 117

.....

Our society is in the jumping constantly changes and development. So we need to face the more live pressure to handle much different things and face more intense competition. The essential method to solve these problems is to have the faster growing speed than society developing. In a field, you can try to get the CRT-450 Certification to improve yourself, for better you and the better future. With it, you are acknowledged in your profession.
