Therefore, we can guarantee that our CSA test torrent has the latest knowledge and keep up with the pace of change.

ServiceNow Certified System Administrator Sample Questions (Q136-Q141):

NEW QUESTION # 136
A User is stored in which table?

- A. User [user_profile]
- B. User [sys_user]
- C. User [syst_user_profile]
- D. User [sys_user_group]

Answer: B

Explanation:
In ServiceNow, user records are stored in the User [sys_user] table. This table contains all user-related data, including usernames, email addresses, roles, department affiliations, and more.
Key Fields in the sys_user Table:
User ID (user_name) - Unique identifier for the user.
First Name & Last Name (first_name, last_name) - User's full name.
Email (email) - The user's email address.
Department (department) - The department to which the user belongs.
Roles (roles) - List of assigned roles that determine access permissions.
Active (active) - Indicates whether the user account is active or inactive.
Explanation of Incorrect Options:
B . User [sys_user_group] - Incorrect. This table stores groups, not individual users.
C . User [syst_user_profile] - Incorrect. This table does not exist in ServiceNow.
D . User [user_profile] - Incorrect. There is no such table in ServiceNow.
Reference from Certified System Administrator (CSA) Documentation:
ServiceNow Docs: User Administration - sys_user Table
ServiceNow CSA Study Guide - User and Group Administration

NEW QUESTION # 137
What is a way that you can mark a knowledge article for review?

- A. Bookmark
- B. On Hold
- C. Flag article
- D. Review

Answer: C

Explanation:
In ServiceNow, knowledge articles can be marked for review using the "Flag article" feature. This allows users to indicate issues such as outdated content, incorrect information, or necessary updates.
Users can flag an article if they believe it needs review or corrections.
The flagged article appears in the Knowledge Management Dashboard, where knowledge managers can track flagged articles.
Knowledge managers or owners can review flagged articles and make necessary updates or retire them if needed.
How the "Flag Article" Feature Works:
B: Review# No such option exists in ServiceNow for marking an article for review. However, knowledge managers can schedule article reviews manually.
C: Bookmark# Used to save frequently accessed articles for personal reference but does not indicate that the article needs a review.
D: On Hold# Applies to workflows or approvals but is not a method for marking an article for review.
Why Other Options Are Incorrect:
ServiceNow Documentation:Flagging a Knowledge Article
CSA Exam Guide:Covers theFlag Articlefunction as a key feature in Knowledge Management.
Reference from CSA Documentation:Thus, the correct answer is:
A: Flag article

NEW QUESTION # 138
On a list, what does each row show?

- A. A field
- B. A table
- C. A filter
- D. A record

Answer: D

Explanation:
A list is a collection of records from a table. Each row in a list represents a record in that table1.

NEW QUESTION # 139
When using the Load Data and Transform Map process, what is the Mapping Assist used for?

- A. Mapping fields using an SLA
- B. Mapping fields using the Import Log
- C. Mapping fields using a Field Map
- D. Mapping fields using Transform History

Answer: C

Explanation:
InServiceNow, theLoad Data and Transform Mapprocess is used toimport data from external sources(e.g., CSV, Excel, XML) into the ServiceNow platform. TheMapping Assisttool is a feature within this process that helps administrators visually map fields between thesource data(imported file) and thetarget tablein ServiceNow.
Load Data:
Data is imported from an external source (e.g., CSV file, Excel spreadsheet, XML data).
The imported data is temporarily stored in astaging table(Import Set Table).
Transform Map:
ATransform Mapdefines how fields in the import set should be mapped to the target table in ServiceNow.
It allows datatransformation, filtering, and scriptingduring the import process.
Mapping Assist:
Mapping Assistis avisual toolthat helps administrators easily map fields between the import set and the target table.
It provides adrag-and-drop interfaceto connect fields.
Helps preventerrors in field mapping, ensuring data integrity.
Understanding the Load Data and Transform Map Process
Why Answer "D" is Correct:##"Mapping fields using a Field Map."
TheField Mapis created in theTransform Mapto define how fields from the import set match fields in the target table.
Mapping Assistis used tovisually linkthese fields, making it easier to set up the transformation process.
Why the Other Answers Are Incorrect:A. "Mapping fields using the Import Log." Incorrectbecause theImport Logtracks the progress of an import job but does not provide field mapping.
The Import Log is used fortroubleshooting errors, not for mapping fields.
B: "Mapping fields using Transform History."
IncorrectbecauseTransform Historytracks past transformations and changes made during imports, but it isnot used for mapping fields.
It is used forauditing and debugging transformations, not field mapping.
C: "Mapping fields using an SLA."
IncorrectbecauseSLAs (Service Level Agreements)are used for tracking and enforcing deadlines on tasks,not for data mapping.
SLAs have no role in theLoad Data and Transform Mapprocess.
