CSI Canadian Securities Course Exam 1 Sample Questions (Q92-Q97):

NEW QUESTION # 92

When shares of GHI Inc. (GHI) traded at \$50, an investor wrote five "GHI December 45" puts for a premium of \$1.20. How much cash must the investor have in their account to be a cash-secured out writer?

- A. \$22,500
- B. \$24,400
- C. \$21,900
- D. \$25,000

Answer: C

Explanation:

The investor wrote 5 put options ("GHI December 45") at a strike price of \$45 with 100 shares per contract ($5 \times 100 = 500$ shares). The cash-secured amount ensures the writer can cover the purchase if exercised:

* Obligation Amount: $500 \text{ shares} \times \$45 = \$22,500$.

* Premium Received: $\$1.20 \times 500 = \600 .

* Net Cash Requirement: $\$22,500 - \$600 = \$21,900$.

This ensures the investor has enough funds to purchase the shares if the put options are exercised.

NEW QUESTION # 93

An emerging Canadian company is exploring the possibility of using hotwater springs to produce clear energy for remote rural communities. The company has strong human resource capital and few assets, and raised \$120,000 through the Capital Pool Company program. Which option is best for this company to continue maximizing public exposure and raising capital?

- A. offering a greenshoe option
- **B. Crowdfunding**
- C. Filing disclosure documents with SEDAR+.
- D. Escrowing shares

Answer: B

Explanation:

For an emerging company with limited assets and innovative goals, crowdfunding is an excellent option to maximize public exposure and raise capital. Crowdfunding involves soliciting small investments from a large number of people, typically through online platforms, making it ideal for startups or innovative ventures like the use of hot water springs for clean energy.

Other options:

* Escrowing shares: Typically used to restrict the sale of shares for a certain period, not for raising capital.

* Offering a greenshoe option: Applies to stabilizing stock prices in an IPO or follow-on offering, not raising initial capital.

* Filing disclosure documents with SEDAR+: Necessary for public companies but does not directly raise capital or increase exposure.

References:

* Volume 1, Chapter 12: Financing and Listing Securities, section on "Capital Raising Options" covers crowdfunding as a method for startups to raise funds.

NEW QUESTION # 94

Billy owns shares of 143 Financing Inc. in a discretionary account. He wants to exercise his right to vote at the company's annual general meeting, but will be away on a business trip. Who can vote on Billy's behalf?

- A. His dealer as long as there is a signed consent on file
- B. His Investment advisor who has discretionary Investment duties
- C. Only by Billy
- **D. Any person whom he has designated Through a proxy**

Answer: D

Explanation:

A shareholder can exercise their voting rights at an annual general meeting either in person or by designating another person to act on their behalf through a proxy. A proxy is a legal document where the shareholder appoints someone else to vote on their behalf. This is critical for shareholders who cannot attend the meeting themselves, as it ensures their voting power is not lost.

NEW QUESTION # 95

A large corporation has issued the following securities: commercial paper, first mortgage bonds, and equipment trust certificates. Which ranking of the securities is correctly seated from most secure to least secure?

- A. First mortgage bonds, equipment trust certificates, commercial paper.
- **B. Equipment trust certificates, first mortgage bonds, commercial paper.**
- C. First mortgage bonds, commercial paper, equipment trust certificates.
- D. Commercial paper, first mortgage bonds, equipment trust certificates

Answer: B

Explanation:

The ranking of securities in terms of security is determined by the collateral backing each type of instrument and the priority of claims in the event of default. The correct order is as follows:

* Equipment Trust Certificates: These are backed by specific physical assets, such as equipment or machinery. The certificate holders have a direct claim on these assets, making them the most secure.

* First Mortgage Bonds: These are secured by the corporation's real estate assets. They represent a claim on the property, ensuring a high level of security, but less secure than equipment trust certificates as real estate may fluctuate in value or face delays in

liquidation.

* Commercial Paper: This is unsecured short-term debt issued by corporations. As it lacks collateral, it is the least secure of the three securities. Investors rely on the issuing corporation's creditworthiness and financial stability.

The distinction in security levels reflects the degree of collateralization and claim priority, ensuring investors are compensated for the relative risk levels.

NEW QUESTION # 96

Under which circumstance is an option considered to be in-the-money?

- A. When a put option with the price of the underlying asset is higher than the strike price.
- **B. When a put option with the price of the underlying asset is higher than the strike price.**
- C. When a call option with the price of the underlying asset is lower than the strike price.
- D. When a put option with the price of the underlying asset is higher than the strike price.

Answer: B

Explanation:

An option is "in-the-money" when it has intrinsic value:

* For a put option, it is in-the-money when the underlying asset's price is below the strike price, allowing the holder to sell the asset at a higher price (strike price).

Incorrect options clarify the following:

* A call option is in-the-money when the underlying asset's price is above the strike price.
