And you can get the downloading link and password in ten minutes after your payment, therefore you can start your learning immediately. We also provide free update for one year after you purchase CSC1 Exam Dumps. After you have purchased the exam dumps, we also have the after-service to solve any problems you have. You can consult your question about CSC1 exam dumps to our online and offline service staff.

## CSI Canadian Securities Course Exam 1 Sample Questions (Q78-Q83):

### NEW QUESTION # 78

Which type of bond offers the investor a choice of interest payments in either of two currencies?

- A. Eurobonds
- B. Foreign pay bonds

- C. Subordinated debentures
- D. Floating-rate securities

**Answer: B**

Explanation:

A foreign pay bond is a type of bond that allows the investor to choose the currency in which to receive interest payments, usually between the currency of the issuer's country and a foreign currency. This feature provides flexibility for investors who may want to manage currency risk or take advantage of fluctuations in exchange rates.

Review of Other Options:

A . Eurobonds:

Eurobonds are international bonds issued in a currency other than the currency of the country where they are issued. However, they do not provide the investor with a choice of interest payments in different currencies.

C . Subordinated Debentures:

These are unsecured bonds that rank below other debts in terms of repayment priority in case of liquidation.

They do not involve currency options for interest payments.

D . Floating-Rate Securities:

These bonds have variable interest rates that adjust periodically based on a benchmark interest rate, such as LIBOR or prime rate, but they do not allow investors to choose the currency of interest payments.

Why B is Correct:

Foreign pay bonds are explicitly designed to offer investors a choice of interest payments in two currencies, making them unique among fixed-income securities. This feature provides added flexibility for investors dealing with foreign exchange considerations.

References:

Canadian Securities Course (CSC), Volume 1, Chapter 6: Fixed-Income Securities - Features and Types.

Detailed explanation of foreign pay bonds and their distinguishing features.

Discussion of bond types and their characteristics, including Eurobonds and floating-rate securities, in Chapter 6.

**NEW QUESTION # 79**

What event is considered true inflation?

- A. The introduction of a new tax which causes a one-time increase of all prices..
- B. A jump in call prices which causes the cost of transported goods to increase.
- **C. The sustained trend of rising prices on goods and services across the economy.**
- D. A general and sustained decrease in prices across the economy due to a recession

**Answer: C**

Explanation:

True inflation is defined as a general and sustained increase in the prices of goods and services throughout an economy over time.

\* A (Jump in call prices) and D (one-time price increase due to tax) are isolated events and not inflation.

\* B (Sustained decrease in prices) describes deflation, not inflation.

References: Volume 1, Chapter 4 ("The Impact of Inflation").

**NEW QUESTION # 80**

Which investment dealer category do discount brokers belong to?

- A. Integrated firm
- B. Boutique firms
- **C. Retail firms**
- D. Institution firms

**Answer: C**

Explanation:

Discount brokers fall under the category of retail firms. Retail firms cater to individual investors and often provide services such as executing trades at reduced commission rates, but they typically do not offer financial advice or portfolio management. Discount brokers provide online platforms for self-directed investors.

\* A. Institutional firms: These firms serve large-scale investors such as pension funds or mutual funds, not individual investors.

\* C. Integrated firms: These firms operate in both retail and institutional markets, but discount brokers are specifically associated

with retail services.

\* D. Boutique firms: These firms specialize in niche markets or services, such as wealth management or specific industry securities, rather than general retail brokerage.

### NEW QUESTION # 81

What will happen if a country's central government is at risk of defaulting on its debt?

- A. The exchange rate relative to other currencies will remain stable.
- **B. Lenders will increase interest rates for everyone**
- C. The exchange rate relative to other currencies will increase
- D. Lenders will decrease interest rates for everyone

**Answer: B**

Explanation:

When a country's central government is at risk of defaulting on its debt, lenders perceive higher risks and demand higher interest rates as compensation. This results in:

- \* An increase in interest rates for borrowing by all entities in the country.
- \* Options A and B are incorrect because exchange rates usually decline (currency devalues) when default risk rises.
- \* D. Decrease in interest rates is the opposite of what happens in such scenarios.

References: Volume 1, Chapter 4 ("Sovereign Risk and Interest Rates").

### NEW QUESTION # 82

Which trend affecting the financial services industry has resulted in the significant use of ETFs?

- A. The rise of financial technology companies
- B. The popularity of robo-advisors
- **C. The shift towards defined contribution plans**
- D. The emergence of cryptocurrency

**Answer: C**

Explanation:

Defined contribution (DC) plans have driven the demand for cost-effective, diversified, and easily tradeable investment products like exchange-traded funds (ETFs). Unlike defined benefit plans, where the employer guarantees payouts, DC plans place the responsibility for investment decisions and risks on individuals, who increasingly opt for ETFs for their low costs and broad market exposure.

- \* A. The rise of financial technology companies: While fintech has contributed to the growth of investment products, it is not a primary driver of ETF usage.
- \* C. The emergence of cryptocurrency: Cryptocurrencies are separate financial products and are not directly tied to the use of ETFs.
- \* D. The popularity of robo-advisors: Robo-advisors use ETFs extensively, but this is a result of their popularity rather than a cause of ETF growth.

### NEW QUESTION # 83

.....

Our CSC1 exam torrent boosts 3 versions and they include PDF version, PC version, and APP online version. The 3 versions boost their each strength and using method. For example, the PC version of CSC1 exam torrent boosts installation software application, simulates the real exam, supports MS operating system and boosts 2 modes for practice and you can practice offline at any time.
