TOP CSC2 Reliable Exam Pattern: Canadian Securities Course Exam2 -

High-quality CSI CSC2 Prep Guide

After you enter the examination room and get the exam paper, you must be sighed that the gold content of our CSC2 learning guide is too high. Our CSC2 study materials are really magic weapon for you to quickly pass the exam. Just come and buy our CSC2 Exam Questions, then you can pass the exam by 100% success guarantee after you prepare with them for 20 to 30 hours. This data is created by our loyal customers who had bought our CSC2 training engine and passed the exam.

CSI CSC2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• The Canadian Investment Marketplace: This section of the exam measures the skills of a Securities Industry Professional and covers the structure and operation of Canada's investment marketplace. It includes the roles of investment dealers and financial intermediaries, capital market functions, financial instruments, and the complete Canadian regulatory environment with its regulatory bodies, principles of regulation, client remediation options, and ethical standards for financial services professionals.
Topic 2	<ul style="list-style-type: none">• Additional Topics: This section of the exam measures the skills of a Wealth Management Professional and covers Canadian taxation systems, tax-advantaged accounts, fee-based account structures, retail client financial planning and estate planning, institutional client management, and ethical standards for financial advisors serving both individual and institutional clients.
Topic 3	<ul style="list-style-type: none">• Investment Products: This section of the exam measures the skills of an Investment Products Analyst and covers fixed-income securities features, pricing, and trading; equity securities including common and preferred shares; derivatives including options, forwards, futures, rights and warrants; and the characteristics and uses of all these investment instruments in Canadian markets.
Topic 4	<ul style="list-style-type: none">• Portfolio Analysis: This section of the exam measures the skills of a Portfolio Manager and covers portfolio management approaches including risk and return measurement, portfolio optimization strategies, management styles, and the complete portfolio management process from objective setting to performance evaluation and rebalancing.
Topic 5	<ul style="list-style-type: none">• The Economy: This section of the exam measures the skills of an Economic Analyst and covers fundamental economic concepts including microeconomics and macroeconomics, economic growth measurement, business cycles, labor markets, interest rates, inflation, international trade, and both fiscal and monetary policy with emphasis on the Bank of Canada's role and government policy challenges.
Topic 6	<ul style="list-style-type: none">• The Corporation: This section of the exam measures the skills of a Corporate Finance Analyst and covers corporate structures, financial statements, disclosure requirements, investor rights, financing methods, capital raising processes, prospectus requirements, securities distribution, and exchange listing procedures for corporations.
Topic 7	<ul style="list-style-type: none">• Analysis of Managed and Structured Products: This section of the exam measures the skills of an Investment Products Specialist and covers mutual funds, exchange-traded funds, alternative investments, structured products, and other managed products including their structures, regulations, features, risks, strategies, performance measurement, and tax implications within the Canadian investment landscape.

CSI Canadian Securities Course Exam2 Sample Questions (Q182-Q187):

NEW QUESTION # 182

For institutional trading, when does the investor need to provide trade-matching elements?

- A. Once the trade clears.
- B. One the custodian confirms the trade.
- C. With the initial order.
- D. After the dealer issues a trade execution notice.

Answer: D

Explanation:

Trade-matching is a critical process in institutional trading, ensuring that details of a trade (e.g., price, quantity, and settlement terms) align among the involved parties, including the investor, dealer, and custodian.

In Canada, institutional trade matching must occur within a specific timeline, and the investor is responsible for providing trade-matching elements after the trade execution notice is issued by the dealer.

Step-by-Step Explanation:

- * What is Trade Matching? Trade matching involves the comparison of trade details between the buyer and seller (and their intermediaries) to confirm accuracy and reduce settlement risks.
- * When Does the Investor Provide Trade-Matching Elements?
 - * After the dealer executes the trade, the dealer issues a trade execution notice to the investor.
 - * The investor must then provide the necessary trade-matching details, such as account information, settlement instructions, and any other required confirmations.
 - * This process ensures that the trade can move seamlessly through to settlement.
- * Why Not Other Options?
 - * Option B (Once the custodian confirms the trade): Incorrect. The custodian's role is typically involved in the final settlement process and not in providing trade-matching details.
 - * Option C (With the initial order): Incorrect. Trade-matching details are provided after the trade is executed, not at the time the order is placed.
 - * Option D (Once the trade clears): Incorrect. Trade matching occurs before the trade clears to ensure settlement.

References to Canadian Securities Course Exam 2 Study Materials:

- * Volume 2, Chapter 27 - Institutional Clearing and Settlement
- * Highlights the process of institutional trade matching, the roles of the investor, dealer, and custodian, and the required timelines.
- * Volume 2, Chapter 27 - The Sell Side and the Buy Side of the Market
- * Explains trade execution and the responsibilities of institutional clients and their intermediaries in completing trades.

Final answer:

- * Option A (After the dealer issues a trade execution notice): Correct.
- * Other options are incorrect based on the standard processes for institutional trade matching in Canada.

NEW QUESTION # 183

The following financial information is available for fund SKE:

Total liabilities	\$100,000
Assets under management	\$1,000,000
Share value of fund	\$10,000,000
Current market value of assets	\$12,000,000

What is SKE fund's net asset value per share?

- A. \$12,00
- B. \$10, 00
- C. \$11, 90
- D. \$9,90

Answer: C

Explanation:

A white sheet with black text Description automatically generated

To calculate the **Net Asset Value (NAV)** per share of the SKE Fund, use the following formula:

$$\text{NAV per share} = \frac{\text{Current Market Value of Assets} - \text{Liabilities}}{\text{Units Outstanding}}$$

Step-by-step Calculation:

1. **Current Market Value of Assets:** \$12,000,000
2. **Liabilities:** \$100,000
3. **Net Asset Value (NAV)** = \$12,000,000 - \$100,000 = \$11,900,000
4. **Units Outstanding:** 1,000,000

Now calculate NAV per share:

$$\text{NAV per share} = \frac{\text{NAV}}{\text{Units Outstanding}} = \frac{11,900,000}{1,000,000} = 11.90$$

Thus, the **NAV per share** is **\$11.90**.

Explanation of Answer Options:

- * Option A (\$9.90): Incorrect; this value does not reflect the subtraction of liabilities.
- * Option B (\$11.90): Correct; it accounts for the subtraction of liabilities and proper division by outstanding units.
- * Option C (\$12.00): Incorrect; it represents the market value of assets per unit without deducting liabilities.
- * Option D (\$10.00): Incorrect; this value does not align with the given data or calculations.

References to Canadian Securities Course Exam 2 Study Materials:

- * Volume 2, Chapter 17 - Mutual Funds: Structure and Regulation, Pricing Mutual Fund Units:
- * Discusses the formula for calculating NAV per share, including the treatment of liabilities and market value of assets.
- * Volume 2, Chapter 22 - Other Managed Products:
- * Covers the concept of valuation for managed funds and its importance for accurate pricing.
- * Volume 1, Chapter 11 - Corporations and Their Financial Statements:
- * Provides foundational knowledge about book and market values used in calculations.

NEW QUESTION # 184

What bond should an advisor recommend to someone who wants to hold bonds and maximize potential capital gains when interest rates are expected to fall?

- **A. A long-term bond with a low coupon.**
- B. A long-term bond with a high coupon.
- C. A short-term bond with a high coupon.
- D. A short-term bond with a low coupon.

Answer: A

Explanation:

Along-term bond with a low coupon will maximize capital gains when interest rates fall. Here's why:

- * Long-term bonds are more sensitive to interest rate changes due to their longer duration, which amplifies the price movement.
- * Low coupon bonds are more affected by changes in interest rates compared to high coupon bonds because more of their value comes from the principal repayment rather than periodic interest payments.

Other options:

- * Short-term bonds: Have lower duration and less sensitivity to interest rate changes, so they do not maximize capital gains.
- * High coupon bonds: Are less sensitive to interest rate changes because of their higher periodic cash flows.

References:

- * Volume 1, Chapter 7: Fixed-Income Securities: Pricing and Trading, section on "Impact of Maturity and Coupon on Bond Prices" explains the relationship between interest rate changes, bond duration, and price sensitivity.

NEW QUESTION # 185

Which factors tends to increase when inflation increases?

- A. Corporate bond prices.
- **B. Labour costs for manufactures.**
- C. Common share prices.
- D. Corporation price-earnings multiples.

Answer: B

Explanation:

Inflation represents the overall rise in prices across the economy. As inflation increases, the costs of raw materials and wages typically rise. Labour costs for manufacturers increase because employees demand higher wages to compensate for the loss of purchasing power caused by inflation. Additionally, higher labour costs directly impact the profit margins of companies, particularly in manufacturing industries.

Other options are incorrect because:

- * A. Price-earnings multiples tend to decrease as inflation rises due to reduced earnings growth expectations and higher discount rates.
- * C. Common share prices may decline as inflation reduces consumer spending and corporate earnings.
- * D. Corporate bond prices tend to fall as inflation erodes the fixed interest payments and leads to higher interest rates.

NEW QUESTION # 186

A client who seeks advice from an investment advisor but does not require financial planning guidance.

Which platform is most appropriate for this client?

- A. Exchanged-traded fund.
- **B. Discount brokerage.**
- C. Self-directed brokerage.
- D. Family office

Answer: B

Explanation:

A discount brokerage is an ideal platform for clients who seek professional advice but do not require comprehensive financial planning. Discount brokers allow clients to trade securities with minimal fees, offering tools and resources for investment decision-making without the cost of full-service advisory.

* Why This Platform is Appropriate:

- * Clients retain control over their portfolios but can access limited advisory services when needed.
- * Suitable for investors who are comfortable with self-directed investing and require occasional guidance.

* Why Other Options Are Incorrect:

- * A: A family office provides high-end services, including financial planning, making it excessive for this client.
- * B: A self-directed brokerage is entirely self-managed, without access to advisory support.
- * C: ETFs are an investment product, not a platform.
