Our printable CSC2 real exam dumps, online engine and windows software are popular among candidates. So you will never feel bored when studying on our CSC2 study tool.

CSI CSC2 Exam Syllabus Topics:

Topic	Details
Topic 1	Investment Products: This section of the exam measures the skills of an Investment Products Analyst and covers fixed-income securities features, pricing, and trading; equity securities including common and preferred shares; derivatives including options, forwards, futures, rights and warrants; and the characteristics and uses of all these investment instruments in Canadian markets.
Topic 2	Investment Analysis: This section of the exam measures the skills of a Research Analyst and covers both fundamental and technical analysis methods, including macroeconomic, industry and company analysis techniques, financial statement interpretation, ratio analysis, and security valuation approaches.

Topic 3	Analysis of Managed and Structured Products: This section of the exam measures the skills of an Investment Products Specialist and covers mutual funds, exchange-traded funds, alternative investments, structured products, and other managed products including their structures, regulations, features, risks, strategies, performance measurement, and tax implications within the Canadian investment landscape.
Topic 4	The Corporation: This section of the exam measures the skills of a Corporate Finance Analyst and covers corporate structures, financial statements, disclosure requirements, investor rights, financing methods, capital raising processes, prospectus requirements, securities distribution, and exchange listing procedures for corporations.
Topic 5	Additional Topics: This section of the exam measures the skills of a Wealth Management Professional and covers Canadian taxation systems, tax-advantaged accounts, fee-based account structures, retail client financial planning and estate planning, institutional client management, and ethical standards for financial advisors serving both individual and institutional clients.
Topic 6	Portfolio Analysis: This section of the exam measures the skills of a Portfolio Manager and covers portfolio management approaches including risk and return measurement, portfolio optimization strategies, management styles, and the complete portfolio management process from objective setting to performance evaluation and rebalancing.

CSI Canadian Securities Course Exam2 Sample Questions (Q34-Q39):

NEW QUESTION # 34

Jenny contributed \$5,000 each year for five years to a spousal RRSP in Albert's name. In the calendar year immediately following Jenny's last contribution, Albert withdrew \$25,000 from the RRSP. What are the tax implications of the withdrawal for Albert and Jenny?

- A. Jenny includes \$10,000 in her taxable income and Albert includes \$15,000 in his taxable income.
- B. Albert includes \$10,000 in his taxable income and Jenny includes \$15,000 in her taxable income.**
- C. No effect on Jenny's taxable income and Albert includes \$25,000 in his taxable income.
- D. Jenny includes \$25,000 in her taxable income and Albert includes \$0 in his taxable income.

Answer: B

NEW QUESTION # 35

Which derivatives transaction has the greatest default risk?

- A. Individual investor buying shares on an exchange during the ex-rights period.
- B. Exchange-traded equity option contract between an individual investor and a dealer.
- C. Interest rate forward agreement between an investment dealer and a corporation.**
- D. Individual investor entering future contract with an institutional investor.

Answer: C

Explanation:

An interest rate forward agreement (FRA) is an over-the-counter (OTC) derivative contract. Unlike exchange-traded derivatives, OTC contracts are not centrally cleared, meaning there is no intermediary to guarantee performance. This increases counterparty (default) risk, making FRAs inherently riskier than exchange-traded contracts.

* A. Individual investor buying shares on an exchange during the ex-rights period: This is a standard transaction involving equity securities, not derivatives, and carries no default risk.

* C. Exchange-traded equity option contract between an individual investor and a dealer: Exchange-traded derivatives are backed by a clearinghouse, which mitigates default risk.

* D. Individual investor entering a futures contract with an institutional investor: Futures contracts are also exchange-traded and centrally cleared, reducing default risk.

NEW QUESTION # 36

What is name of the procedure used to calculate the income deemed to have been earned by segregated fund contract holders?

- A. Distribution.
- B. Redemption.
- **C. Allocation.**
- D. Payout.

Answer: C

NEW QUESTION # 37

What is unique to responsible investment?

- **A. A combination of a values and valuation-based approach to investing**
- B. ESG factors are standardized across the investment no industry.
- C. It is unavailable with certain asset classes like segregated funds
- D. It bases investment decisions exclusively on environmental factors.

Answer: A

Explanation:

Responsible investing (RI) incorporates environmental, social, and governance (ESG) factors into investment decisions. This approach combines values-based investing (aligning investments with personal or institutional ethics) and valuation-based investing (analyzing ESG factors to assess potential risks and returns).

* A. It is unavailable with certain asset classes like segregated funds: RI is increasingly available across various asset classes, including segregated funds.

* B. ESG factors are standardized across the investment industry: ESG standards vary and are not uniformly applied.

* D. It bases investment decisions exclusively on environmental factors: RI considers environmental, social, and governance factors, not just environmental concerns.

NEW QUESTION # 38

Anwar is placing a market order to purchase 100 shares of AJL when the bid/ask is \$10.25/\$10.75. Before the trade is complete, the bid/ask moves to \$10.20/\$10.70. What is the share price that Anwar will pay on the purchase transaction?

- A. \$10.20
- B. \$10.29
- C. \$10.75
- **D. \$10.70**

Answer: D

Explanation:

A market order executes immediately at the best available ask price for a purchase transaction. In this case, the bid/ask initially was \$10.25/\$10.75. However, before execution, the ask price updated to \$10.70, meaning Anwar will pay \$10.70 per share.

* B. \$10.75: This was the previous ask price but is no longer valid after the update.

* C. \$10.29: This value is not relevant to the current bid/ask spread.

* D. \$10.20: This represents the updated bid price, which applies to sell orders, not buy orders.

NEW QUESTION # 39

.....

ExamsTorrent is an excellent platform where you get relevant, credible, and unique CSI CSC2 exam dumps designed according to the specified pattern, material, and format as suggested by the CSI CSC2 exam.
