CSM Test Cram Review | VCE CSM Dumps

You can use your smart phones, laptops, the tablet computers or other equipment to download and learn our CSM study materials. Moreover, our customer service team will reply the clients' questions patiently and in detail at any time and the clients can contact the online customer service even in the midnight. The clients at home and abroad can purchase our CSM Study Materials online. Our service covers all around the world and the clients can receive our CSM study materials as quickly as possible.

Scrum Alliance Certified ScrumMaster Exam Sample Questions (Q33-Q38):

NEW QUESTION # 33

In which event are impediments to the Sprint Goal shared?

- A. Sprint Planning

- B. Daily Scrum
- C. Sprint Retrospective
- D. Sprint Review

Answer: B

Explanation:

The Daily Scrum is the event where impediments to achieving the Sprint Goal are shared. It is a time-boxed event (15 minutes) held every day during the Sprint. During this event, the Developers inspect their progress toward the Sprint Goal and identify any blockers or impediments that need to be addressed.

According to the 2020 Scrum Guide:

- * The Developers use the Daily Scrum to inspect progress and adapt their plan to achieve the Sprint Goal.
- * Impediments are raised and addressed by the Scrum Master if they cannot be resolved by the team.

Why the other options are incorrect:

- * B. Sprint Planning: Sprint Planning is focused on creating the Sprint Goal and selecting Product Backlog items for the Sprint, not sharing impediments.
- * C. Sprint Retrospective: The Retrospective focuses on process improvements and team dynamics, not day-to-day impediments during the Sprint.
- * D. Sprint Review: The Sprint Review is about presenting the Increment and gathering feedback, not resolving impediments.

NEW QUESTION # 34

Which one of the following statements is true regarding the Increment?

- A. Is not releasable until the Product Owner determines it is done.
- B. It must have all of the requirements that need to be in the product before the Product Owner will release it.
- C. It must be in a usable condition and meet the Definition of Done.
- D. Is not releasable until it has all of the features to be a Minimally Viable Product.

Answer: C

Explanation:

The correct statement is: An Increment must be in a usable condition and meet the Definition of Done.

Each Increment builds upon previous Increments and must be complete, usable, and meet the agreed-upon Definition of Done so it can be inspected during the Sprint Review. Whether or not the Increment is released is a separate decision made by the Product Owner.

According to the 2020 Scrum Guide:

- * An Increment is the result of work done during a Sprint and must meet the Definition of Done.
- * The Increment is usable, even if the Product Owner decides not to release it.

Why the other options are incorrect:

- * A. It must have all of the requirements that need to be in the product before the Product Owner will release it: Increments do not require all requirements to be complete before being usable or inspectable. Scrum is iterative, delivering value incrementally.
- * B. Is not releasable until the Product Owner determines it is done: The Product Owner does not determine whether the Increment is "done"; the team's adherence to the Definition of Done determines this.
- * D. Is not releasable until it has all of the features to be a Minimally Viable Product: Each Increment must meet the Definition of Done, regardless of whether it meets all features for an MVP.

NEW QUESTION # 35

When Scrum Team members meet and collaborate with each other to find the best way to build and deliver the software to the customer, which of the following Agile Values is being practiced?

- A. Individuals and Interactions over Processes and Tools
- B. Individuals and Interactions over Working Software
- C. Individuals and Interactions over Contract Negotiation
- D. Individuals and Interactions over Customer Collaboration

Answer: A

Explanation:

The described scenario aligns with "Individuals and Interactions over Processes and Tools", one of the four core Agile Values from

the Agile Manifesto. This value emphasizes the importance of collaboration, communication, and teamwork over reliance on rigid processes or tools. Scrum encourages team members to work together closely to solve problems and deliver high-quality software. Why the other options are incorrect:

- * A. Individuals and Interactions over Working Software: While this value mentions "Working Software," the scenario focuses on collaboration among team members, which relates more to prioritizing individuals and interactions.
- * C. Individuals and Interactions over Contract Negotiation: This value applies to collaboration with stakeholders and customers rather than collaboration within the team.
- * D. Individuals and Interactions over Customer Collaboration: While customer collaboration is essential, the scenario specifically highlights collaboration among team members.

NEW QUESTION # 36

How often are Sprint Reviews conducted or held?

- A. One in the middle and one at the end of every Sprint
- B. Once at the beginning of the Sprint
- C. Daily
- D. Once at the end of every Sprint

Answer: D

Explanation:

The Sprint Review is held once at the end of every Sprint. It is a time-boxed event where the Scrum Team and stakeholders collaborate to inspect the Increment, review progress toward the Product Goal, and adapt the Product Backlog as needed. According to the 2020 Scrum Guide:

* The purpose of the Sprint Review is to discuss what was completed during the Sprint and what could be done next to optimize value delivery.

* It occurs once at the end of every Sprint, ensuring transparency and stakeholder involvement.

Why the other options are incorrect:

- * B. One in the middle and one at the end of every Sprint: The Sprint Review is not conducted multiple times within a Sprint.
- * C. Once at the beginning of the Sprint: The Sprint Review is held at the end of the Sprint, not the beginning.
- * D. Daily: The Sprint Review is not a daily event. The Daily Scrum occurs daily.

NEW QUESTION # 37

Which of the following is a Scrum Artifact?

- A. Sprint Backlog
- B. Definition of Done
- C. Sprint Burndown Chart
- D. Sprint Goal

Answer: A

Explanation:

Scrum Artifacts represent work or value, providing transparency and opportunities for inspection and adaptation. The Sprint Backlog is one of the three primary Scrum Artifacts defined in the 2020 Scrum Guide:

* Product Backlog: The ordered list of everything that is needed in the product.

* Sprint Backlog: The plan for the Sprint, including the Sprint Goal, selected Product Backlog items, and the work plan for delivering the Increment.

* Increment: The sum of all work completed during a Sprint that meets the Definition of Done.

Why the other options are incorrect:

- * A. Definition of Done: While critical to ensuring quality, the Definition of Done is not an Artifact but rather a standard that applies to the Increment.
- * C. Sprint Goal: The Sprint Goal is part of the Sprint Backlog but is not a standalone Artifact.
- * D. Sprint Burndown Chart: This is a complementary tool used for tracking progress but is not an official Artifact in Scrum.

NEW QUESTION # 38

.....

CSM Test Cram Review: <https://www.examsreviews.com/CSM-pass4sure-exam-review.html>

Viewpoint Markdowns Do you need to plan for price adjustments, This CSM section focuses on general show and debug commands and their usage, as well as physical structures within almost all Cisco equipment.
