CTAL_TM_001 Pass4sure Study Materials - Exam Dumps CTAL_TM_001 Provider

Do you have registered for the ISTQB CTAL_TM_001 exam and are worried about ISTQB CTAL_TM_001 exam preparation? Try ISTQB CTAL_TM_001 PDF Questions and practice tests which help you prepare the whole course in less duration. The ISTQB CTAL_TM_001 practice test material gives you a clear idea to prepare for the ISTQB CTAL_TM_001 Exam and saves you preparation time. An CTAL_TM_001 exam is a time-based exam, and the candidate must be fast enough to solve the problems in a limited time.

ISTQB Certified Tester Advanced Level - Test Manager Sample Questions (Q160-Q165):

NEW QUESTION # 160

What is the purpose of process improvement assessment models?

- A. Assist in the hiring of new testers
- B. Identify the test tools needed for testing
- C. Ensure a consistent approach is used
- D. Model the failure modes of the product

Answer: C

Explanation:

Process improvement assessment models are designed to ensure a consistent approach is used in evaluating and improving processes within an organization. They provide a structured framework for assessing the current state of processes, identifying areas for improvement, and implementing changes in a systematic manner.

References: The purpose of process improvement assessment models is outlined in ISTQB documentation, which emphasizes the importance of a consistent and structured approach to process improvement¹. For detailed references, please consult the official ISTQB Advanced Level Test Manager documents and study guides available on the ISTQB website.

NEW QUESTION # 161

Your manager has decided that your team of manual testers should all become test automation engineers. Your team is much stronger in analysis than in technical testing so you are concerned about their ability to adapt. What tool capabilities could help with this transition?

- A. Remote storage of the test automation scripts
- B. Good reporting
- C. **High usability with AI-assisted object capture**
- D. Low license costs

Answer: C

Explanation:

Challenges for Manual Testers Transitioning to Automation:

Manual testers often lack strong technical skills required for scripting. Tools with high usability and AI-assisted features simplify script creation and reduce the technical expertise needed.

Evaluation of Options:

A (Low license costs) is unrelated to aiding testers' technical capabilities.

B (Remote storage) is beneficial but does not address skill gaps.

C (High usability with AI-assisted object capture) directly helps by simplifying automation tasks.

D (Good reporting) is valuable but not relevant to skill transition.

Reference and Syllabus Alignment:

This matches tool evaluation criteria outlined in the ISTQB syllabus under "Test Tools" (TM-1.6.1).

NEW QUESTION # 162

Your Project Manager has challenged you to come up with a process improvement strategy using the IDEAL model.

Which step within the process defines the success criteria? [2]

- A. Entrance
- **B. Diagnosing**
- C. Analysis
- D. Initiation

Answer: B

Explanation:

In the IDEAL model, the Diagnosing step is where the success criteria are defined. This step involves understanding the current state and identifying gaps between the current and desired states. It sets the stage for creating action plans to address these gaps and defines the metrics for success.

NEW QUESTION # 163

You have been asked to make a recommendation on deployment readiness on the software your team has been testing. You have the following metrics:

Given this information what is a critical metric you are missing?

- A. Planned vs actual cost of testing
- B. Number of tests passed
- C. Number of defects outstanding
- D. **Residual risk**

Answer: D

Explanation:

Context Analysis:

Deployment readiness depends on understanding the risk of releasing the software. The metrics provided include execution, design, defect counts, and coverage but do not quantify residual risk, which reflects remaining risks post-testing.

Evaluation of Options:

A . Number of tests passed:

Incorrect. While important, it doesn't directly provide insight into the remaining risk.

B . Number of defects outstanding:

Incorrect. Though critical, it's only one aspect of assessing readiness and doesn't provide the full picture of residual risk.

C . Residual risk:

Correct. Residual risk quantifies untested areas and unresolved issues, vital for decision-making.

D . Planned vs actual cost of testing:

Incorrect. While useful for process evaluation, it's not directly tied to deployment readiness.

Syllabus Alignment:

The syllabus emphasizes risk-based approaches, highlighting residual risk as a critical deployment readiness metric (TM-1.3.4).

Reference:

ISTQB Advanced Level Test Management Syllabus (TM-1.3.4)

NEW QUESTION # 164

Continuing with the Scenario described in the previous question, which of the following topics would you need to address in detail in the master test plan? 3 credits

- A. **An approach to regression testing**
- B. A description of dependencies between test cases
- C. A list of boundary values for "advance amount"
- D. A logical collection of test cases

Answer: A

NEW QUESTION # 165

.....

Everybody wants success, but not everyone has a strong mind to persevere in study. If you feel unsatisfied with your present status, our CTAL_TM_001 actual exam can help you out. Our products always boast a pass rate as high as 99%. Using our CTAL_TM_001 study materials can also save your time in the exam preparation. If you choose our CTAL_TM_001 Test Engine, you are going to get the CTAL_TM_001 certification easily. Just make your choice and purchase our study materials and start your study right now!
