Latest CTFL-AT Test Objectives | CTFL-AT Actual Questions

you can stand out in your work and impress others with professional background certified by CTFL-AT exam and feel self-fulfillment, get sense of satisfaction in personal perspective, and have stand a better chance of getting better working condition with the CTFL-AT Certification. Therefore, our affordable CTFL-AT study guide will definitely be a gainful opportunity. Come and buy our CTFL-AT exam materials, and you will be grateful for your wise decision.

ISQI ISTQB Certified Tester - Foundation Level Extension - Agile Tester Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which of the following would you expect most likely to be an advantage of the whole-team approach?

- A. Providing constant availability of executable software throughout the iteration for testing, demonstration, or education purposes
- B. Eliminating the schedule risks associated with big-bang integration
- C. Improved quality of the requirements specification (through examples and automatable tests) when adopting the

Acceptance Test-Driven Development practice

- D. Improved code quality produced as the result of the refactoring step performed as part of the test-driven- development technique

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From the CTFL-AT Syllabus v4.0, Section 1.3 The Whole-Team Approach, the benefit of the whole-team approach is:

"All team members, including testers, work together in all project phases. This encourages collaboration and shared responsibility, which leads to the availability of working software and immediate feedback on changes." Specifically, it is noted:

"One benefit of the whole-team approach is the continuous availability of working, executable software, which can be tested at any point in the iteration." This makes Option A the correct answer.

Let's analyze the others:

* Option B relates to Acceptance Test-Driven Development (ATDD), not the whole-team approach specifically.

* Option C is a benefit of TDD, not of the whole-team approach.

* Option D refers to continuous integration, not directly tied to the whole-team concept.

Learning Objective (K2) - Understand benefits of the whole-team approach in Agile

NEW QUESTION # 13

Which two of the following statements are CORRECT with regards to test automation on agile projects?

- 1) Every test developed for past iterations is kept and executed as part of a regression suite for each new release of code.
- 2) It would be very difficult to ensure high quality in an agile project without test automation.
- 3) Automated acceptance tests are run regularly as part of the continuous integration full system build.
- 4) Automated regression suites are only run for the final release of code.
- 5) In agile projects, the results from automated acceptance tests provide feedback on the overall product quality.

- A. 2, 5
- B. 2, 3
- C. 1, 3
- D. 3, 4

Answer: A

Explanation:

Explanation

Test automation is essential for agile projects, as it enables fast and frequent feedback on the quality of the product. Without test automation, it would be very difficult to ensure high quality in an agile project, as manual testing would be too slow and costly to keep up with the pace of development¹². Automated acceptance tests are one of the key types of test automation on agile projects, as they verify that the user stories are implemented correctly and that the product meets the customer's expectations. Automated acceptance tests are run regularly as part of the continuous integration full system build, and the results provide feedback on the overall product quality¹². Therefore, statements 2 and 5 are correct with regards to test automation on agile projects. References: 1:

NEW QUESTION # 15

Which ONE of the following is an example of a typical "Business-oriented work product"?

- A. Usability testing test results.
- B. The released product.
- C. A user manual.
- **D. Acceptance testing entry criteria.**

Answer: D

NEW QUESTION # 16

Which of the following statements about the Planning poker test estimate technique are CORRECT?

- 1) Planning poker is a consensus based technique using a deck of cards.
- 2) A low test estimate usually means the story should be broken down into multiple smaller stories.
- 3) A high test estimate usually means the story should be broken down into multiple smaller stories.
- 4) One poker round is played and then consensus has to be reached.
- 5) The risk level of each backlog item should be decided before the poker session.

- A. 1, 2, 4
- B. 2, 3, 4
- **C. 1, 3, 5**
- D. 1, 2, 3

Answer: C

NEW QUESTION # 17

.....

Would you like to register ISQI CTFL-AT certification test? Would you like to obtain CTFL-AT certificate? Without having enough time to prepare for the exam, what should you do to pass your exam? In fact, there are techniques that can help. Even if you have a very difficult time preparing for the exam, you also can pass your exam successfully. How do you do that? The method is very simple, that is to use Real4exams ISQI CTFL-AT Dumps to prepare for your exam.
