

# CTFL-AT Valid Mock Test, CTFL-AT Vce Format

<p>Agile Tester, Foundation Level Exam ID: A Sample Exam – Questions</p>	 <p>International Software Testing Qualifications Board</p>
--	--

---

**Question #24 (1 Point)**  
Which of the following is NOT a typical task performed by the tester within an agile team?

- a) To automate tests and maintain them
- b) To mentor and coach other team members
- c) To produce and update burndown charts
- d) To participate in code analyzing activities

Select ONE option.

**Question #25 (1 Point)**  
The term "burndown" refers to which of the following?

- a) A chart showing which team members are working the most, and are likely to be under stress
- b) A chart showing the progress of each user story, and when they are likely to be completed
- c) A chart showing the amount of work left to be done, versus the time allocated for the iteration
- d) A chart showing defects that have been fixed, and when the remaining defects are likely to be fixed

Select ONE option.

**Question #26 (1 Point)**  
Which of the following statements about Test Driven Development (TDD) is FALSE?

- a) TDD is a "test first" approach to develop reusable automated tests
- b) The TDD cycle is continuously used until the software product is released
- c) TDD helps to document the code for future maintenance efforts
- d) The result of TDD are test classes used by the developer to develop test cases

Select ONE option.

**Question #27 (1 Point)**  
What does the term "Test Pyramid" refer to and illustrate situations for?

- a) The team's testing workload increases from sprint to sprint
- b) The backlog size, and thus the number of tests, decreases
- c) The number of automated unit tests is higher than the number of automated tests for higher test levels
- d) The number of automated tests in place increases from sprint to sprint

Select ONE option.

P.S. Free & New CTFL-AT dumps are available on Google Drive shared by Test4Engine: <https://drive.google.com/open?id=1quR2ZpNBJunq7C50vY6x4qahTMIVNugi>

One of the best things about Test4Engine is the convenience it offers. You can access our ISQI CTFL-AT dumps PDF format from anywhere and fit you're studying into your busy schedule. No more traveling to a physical classroom, wasting time and money on gas or public transportation. With the ISTQB Certified Tester - Foundation Level Extension - Agile Tester (CTFL-AT) PDF questions, you can study on your own time, in your own place, and at your own pace.

Learning knowledge is not only to increase the knowledge reserve, but also to understand how to apply it, and to carry out the theories and principles that have been learned into the specific answer environment. The ISTQB Certified Tester - Foundation Level Extension - Agile Tester exam dumps are designed efficiently and pointedly, so that users can check their learning effects in a timely manner after completing a section. Our CTFL-AT test material is updating according to the precise of the real exam. Our ISTQB Certified Tester - Foundation Level Extension - Agile Tester exam dumps will help you to conquer all difficulties you may encounter.

## CTFL-AT Vce Format, CTFL-AT Reliable Study Notes

Test4Engine is a learning website which provides CTFL-AT latest dumps and answers, and almost covers every knowledge of CTFL-AT exam questions. Using our learning textbooks to prepare CTFL-AT test is your best choice. Test4Engine with latest CTFL-AT exam simulations will help you Pass CTFL-AT Exam in a short time in a fast way. We promise that we will refund fully if the CTFL-AT vce dumps and training materials have any problems or you fail the CTFL-AT exam with our CTFL-AT braindumps.

ISQI CTFL-AT (ISTQB Certified Tester - Foundation Level Extension - Agile Tester) exam is a globally recognized certification

designed to test the skills and knowledge of software testers in the agile environment. CTFL-AT Exam is an extension of the ISTQB Foundation Level and focuses on the specific skills needed by testers working in an agile environment.

## ISQI ISTQB Certified Tester - Foundation Level Extension - Agile Tester Sample Questions (Q17-Q22):

### NEW QUESTION # 17

What is the main benefit of the Test Pyramid?

- A. It shows complexity of testing activities.
- B. It acts as a metric for testing progress.
- C. It means testing is involved early in the development cycle.
- **D. It helps in evaluating the amount of test cases needed.**

**Answer: D**

Explanation:

The Test Pyramid is a model for organizing tests in a way to make the process of testing faster, efficient and cost-effective. This model focusses on getting maximum functional testing getting covered by faster and less brittle tests like Unit and API tests<sup>1</sup>. The main benefit of the Test Pyramid is that it helps in evaluating the amount of test cases needed for each level of testing. The Test Pyramid suggests that the number of test cases should decrease as we move up the pyramid, from unit tests to integration tests to end-to-end tests. This is because unit tests are more granular, isolated, and easy to write and maintain, while end-to-end tests are more complex, dependent, and brittle. The Test Pyramid also helps in balancing the test coverage and the test execution time, as unit tests provide high coverage and low execution time, while end-to-end tests provide low coverage and high execution time. By following the Test Pyramid, teams can optimize their testing efforts and resources, and ensure that they have a sufficient and effective test suite for their software. References:

### NEW QUESTION # 18

Which of the following allows a developer to define accurate unit tests focused on business needs?

- A. Acceptance Test-Driven Development
- B. Design-Driven Development
- **C. Behavior-Driven Development**
- D. Test-Driven Development

**Answer: C**

Explanation:

Explanation

Behavior-Driven Development (BDD) is a software development approach that allows a developer to define accurate unit tests focused on business needs. BDD uses a common language that is understandable by both technical and non-technical stakeholders, such as Given-When-Then scenarios. BDD helps to align the development and testing activities with the customer expectations and business goals. References:

1: ISTQB Foundation Level Agile Tester Syllabus, Version 2014, Section 2.2.2

2: ASTQB Agile Tester Certification Resources, Agile Testing Foundations, Chapter 3, Section 3.2.2

### NEW QUESTION # 19

Which of the following statements about test-driven development (TDD) and behavior-driven development (BDD) is true?

- A. Both BDD tests and TDD tests are written primarily at the acceptance level, though these tests may also be written at the integration or system levels
- **B. TDD tests are focused on the implementation of the software while BDD tests on the exhibited behavior of the software**
- C. TDD tests and BDD tests are written by developers, but TDD tests are generally easier for other team members and stakeholders to understand than BDD tests
- D. Specific BDD frameworks can be used to define acceptance criteria based on the role/feature/benefit template ("As a..., I

want..., so that...")

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From CTFL-AT Syllabus v4.0, Section 3.3 Behavior-Driven Development, and 3.2 Test-Driven Development:

"TDD focuses on writing unit tests that guide the implementation of code."

"BDD focuses on writing scenarios that describe the behavior of the software, often using a language that stakeholders can understand." Thus, Option B is accurate - TDD targets code implementation, BDD targets behavioral expectations.

\* Option A is incorrect - TDD is at unit level, while BDD is at the acceptance level.

\* Option C is false - BDD is more readable and accessible for non-technical stakeholders.

\* Option D confuses BDD with user story formats; BDD uses Given-When-Then, not the "As a... I want..." template.

Learning Objective (K2) - Differentiate TDD and BDD practices

### NEW QUESTION # 20

Which of the following statements is true?

- A. Early and frequent feedback in Agile projects allows the team to find a greater number of defects at the unit test level than in non-Agile projects
- B. Early and frequent feedback in Agile projects helps maintain a uniform distribution of defects through the code and thus avoid defect clustering
- C. Early and frequent feedback in Agile projects provides earlier information about the stability of the software product but not about its quality
- **D. Early and frequent feedback in Agile projects allows the team to provide customers with products that better meet their requirements sooner**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From the CTFL-AT Syllabus v4.0, Section 2.3 The Role of Feedback, it explains:

"Agile development promotes early and continuous feedback, which leads to the development of a product that better meets customer needs and expectations." Also:

"Frequent feedback loops support the team in identifying and resolving issues earlier, improving both the product quality and customer satisfaction." Therefore, Option D is the most accurate reflection of the true benefit of early and frequent feedback in Agile environments.

\* Option A incorrectly implies Agile feedback redistributes defect clustering, which is not a recognized principle.

\* Option B makes an unverifiable claim about defect volume at the unit level. Agile encourages unit testing, but this comparison is not substantiated in the syllabus.

\* Option C is incorrect because feedback provides both stability and quality indicators early on.

Learning Objective (K2) - Understand the role of feedback in Agile projects

### NEW QUESTION # 21

Which of the following allows a developer to define accurate unit tests focused on business needs?

- A. Behavior-Driven Development
- B. Design-Driven Development
- **C. Acceptance Test-Driven Development**
- D. Test-Driven Development

**Answer: C**

## NEW QUESTION # 22

.....

The way to pass the CTFL-AT actual test is diverse. You can choose the one which is with high efficiency and less time and energy invested to get qualified by CTFL-AT certification. The CTFL-AT practice download pdf offered by Test4Engine can give you some reference. You just need to practice with CTFL-AT Vce Torrent for 1-2 days, then, you can be confident to face the CTFL-AT actual test with ease mood. The 99% pass rate of CTFL-AT training vce will ensure you 100% pass.
