CTS Practice Exam Questions

What area(s) of consideration should the AV professional address with the client regarding building structure and AV service issues? - ✓✓Ensure adequate power source(s), ensure AV program source access.

How is an AV project estimate created for a client? - ✓✓Calculating goods, labor, materials and other projected costs, plus a markup.

What is the diagram shown in the exhibit used for in AV management activities? - ✓✓Helps in sequencing and scheduling project events.

Detailed descriptions of specific services, experience required for proposed project staff and AV drawings may be included when creating a(n)? - ✓✓Request for proposal (RFP) for labor and service providers

Which pieces of equipment are necessary for testing leads and evaluating an audio signal chain? - ✓✓A Signal Generator and Signal Analyzer

When commissioning for video display installation, how will the AV technician test to ensure that the video display system is working properly? - ✓✓Confirm brightness, contrast and color adjustments using SMPTE PLUGE Pattern.

What type of diagram or drawing is pictured in the exhibit? - ✓✓A Block Diagram

If an AV professional believes that an AV system requires its own VLAN (Virtual Local Area Network), what information must be communicated to the AV professional's IT counterparts? - ✓✓Why the VLAN is necessary.

Noise in a room can be a distraction to users and have an impact on the effectiveness of an AV system. Which of the following generates mechanical and structural noise? - ✓✓HVAC fans, diffusers and air handlers.

What would mechanical drawings be used to determine on a site visit? - ✓✓Locations of heating, plumbing and ventilation in a venue.

If the text size in a projected presentation is 3 inches (76 mm), then the viewer should not be farther away than ____ for reading the text? - ✓✓450 inches (11,400 mm)

One major difference between the Service Level Agreement process and the traditional Program Report is the SLA focuses upon? - ✓✓Measurement of service through monitoring procedures.

2025 Latest ExamsTorrent CTS PDF Dumps and CTS Exam Engine Free Share: <https://drive.google.com/open?id=1qEHtNOOEM5LFbKfti1MDyvB9UFiJDvWh>

Our CTS test torrent was designed by a lot of experts in different area. You will never worry about the quality and pass rate of our CTS study materials, it has been helped thousands of candidates pass their CTS exam successful and helped them find a good job. If you choose our CTS study torrent, we can promise that you will not miss any focus about your CTS exam. It is proved that our CTS learning prep has the high pass rate of 99% to 100%, you will pass the CTS exam easily with it.

AVIXA CTS - General Exam Syllabus Topics:

Topic	Weight
Duty A:Creating AV Solutions	47%
Task 1:Gather Customer Information	10%
Task 2:Conduct Initial Site Survey	9%
Task 3: Evaluate Site Environment (acoustics, lighting, seating, finishing, etc.)	9%
Task 4:Develop an AV Project Scope	9%
Task 5: Design AV Solutions	10%

Hot CTS Valid Guide Files | Amazing Pass Rate For CTS Exam | Trusted CTS: Certified Technology Specialist

More and more people hope to enhance their professional competitiveness by obtaining CTS certification. However, under the premise that the pass rate is strictly controlled, fierce competition makes it more and more difficult to pass the CTS examination. In order to guarantee the gold content of the CTS Certification, the official must also do so. However, it is an indisputable fact that a large number of people fail to pass the CTS examination each year, some of them may choose to give it up while others may still choose to insist.

AVIXA CTS Exam Certification Details:

Passing Score	350 / 500
MemberExam Price	\$375(USD)
Books / Training	Candidate Handbook
Non-Member Exam Price	\$475(USD)
Exam Code	CTS
Sample Questions	AVIXA CTS Sample Questions
Schedule Exam	Pearson VUE
Number of Questions	110
Duration	150 mins

AVIXA Certified Technology Specialist Sample Questions (Q253-Q258):

NEW QUESTION # 253

When running audio in an enclosed booth, what feature is MOST important for the studio monitors used by the sound engineer?

- A. Dolby Digital 5.1 surround sound
- B. A subwoofer with a bass boost feature
- C. Flat frequency response across the entire audio spectrum
- D. Digital signal processing including acoustic echo cancellation

Answer: C

Explanation:

For critical listening environments like enclosed booths or mixing stations, the most important factor is a flat frequency response, meaning the monitors reproduce sound as accurately as possible, without coloration or enhancement.

"A flat response ensures that the sound engineer hears the audio signal as it truly is, which is essential for accurate mixing and mastering."

- AVIXA CTS Exam Guide, Audio Systems Chapter

NEW QUESTION # 254

Which document identifies who is responsible for each part of the system delivery, including schedule and scope?

- A. Statement of work
- B. Project charter
- C. Responsibility matrix
- D. Scope of work

Answer: C

Explanation:

A Responsibility Matrix (also called RACI) outlines who is responsible, accountable, consulted, and informed for each project task or deliverable. It helps eliminate ambiguity and aligns team expectations.

"A responsibility matrix details task ownership and accountability across stakeholders-essential for project clarity."

- CTS Exam Guide, Project Management Documentation

NEW QUESTION # 255

During a site survey, a sound pressure level (SPL) meter can be used for measuring

- A. the efficiency of the amplification.
- B. the room acoustics.
- C. distance to existing loudspeakers.
- **D. the ambient noise level.**

Answer: D

Explanation:

An SPL (Sound Pressure Level) meter is commonly used during a site survey to measure the ambient noise level in a room. This measurement provides a baseline for audio system design, ensuring that the sound reinforcement system can deliver adequate volume levels above the background noise.

CTS Technology Specialist Reference According to CTS materials, assessing ambient noise levels with an SPL meter is a standard step in designing sound systems, especially in environments where speech intelligibility is critical.

NEW QUESTION # 256

During a site survey, a client states that there will be no acoustical treatment to their new council chamber and they want a voice lifting (reinforcement) system. Which loudspeaker should be recommended to achieve optimal speech intelligibility?

- **A. narrow beam loudspeaker**
- B. coaxial loudspeaker
- C. ceiling mount loudspeaker
- D. broad beam loudspeaker

Answer: A

Explanation:

In a space with no acoustic treatment, a narrow beam loudspeaker is ideal for voice reinforcement as it can focus sound more precisely to reduce reverberation and enhance speech intelligibility. This directionality minimizes sound reflections that can degrade clarity in untreated spaces.

CTS Technology Specialist Reference

CTS materials on audio system design recommend narrow beam loudspeakers for environments with challenging acoustics to maintain intelligibility.

NEW QUESTION # 257

In order to calculate throw distances for an existing installation, what is the FIRST thing to evaluate?

- A. light conditions
- B. aspect ratio
- **C. the size of the screen**
- D. the height of the ceiling

Answer: C

Explanation:

To calculate throw distance, the size of the screen is essential as it determines the distance needed for the projector to fill the screen adequately. Throw ratio calculations depend directly on screen size, impacting projector placement.

CTS Technology Specialist Reference Throw distance calculations are covered in CTS training, where screen size is the primary factor in determining projector positioning for optimal image display.

NEW QUESTION # 258
