

Customizable PDF Questions for Improved Success in Palo Alto Networks PCCP Certification Exam

We strongly advise you to buy our online engine and windows software of the PCCP study materials, which can simulate the real test environment. There is no doubt that you will never feel bored on learning our PCCP practice materials because of the smooth operation. You will find that learning is becoming interesting and easy. And you will be more confident to pass the exam since that you have experience the Real PCCP Exam.

The emerging field of information technology has created a vast space for Palo Alto Networks PCCP certification exam holders to get promotions and high-paying jobs. Thousands of candidates don't clear the Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) exam because they have short time and they don't prepare for the PCCP exam questions. It results in a loss of time, money, and confidence. Braindumpsqa is here to save you from this unfortunate situation with its Real PCCP Exam Questions. These Palo Alto Networks PCCP Exam Questions are enough to ace the PCCP exam and move forward into Palo Alto Networks sector with full ease and confidence.

Sample PCCP Questions Pdf | PCCP Test Discount

As a hot test of Palo Alto Networks certification, PCCP practice exam become a difficult task for most candidates. So choosing right study materials is a guarantee success. Our website will be first time to provide you the latest PCCP Exam Braindumps and test answers to let you be fully prepared to pass PCCP actual test with 100% guaranteed.

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details
Topic 1	Secure Access: This part of the exam measures skills of a Secure Access Engineer and focuses on defining and differentiating Secure Access Service Edge (SASE) and Secure Service Edge (SSE). It covers challenges related to confidentiality, integrity, and availability of data and applications across data, private apps, SaaS, and AI tools. It examines security technologies including secure web gateways, enterprise browsers, remote browser isolation, data loss prevention (DLP), and cloud access security brokers (CASB). The section also describes Software-Defined Wide Area Network (SD-WAN) and Prisma SASE solutions such as Prisma Access, SD-WAN, AI Access, and enterprise DLP.

Topic 2	• Cybersecurity: This section of the exam measures skills of a Cybersecurity Practitioner and covers fundamental concepts of cybersecurity, including the components of the authentication, authorization, and accounting (AAA) framework, attacker techniques as defined by the MITRE ATT&CK framework, and key principles of Zero Trust such as continuous monitoring and least privilege access. It also addresses understanding advanced persistent threats (APT) and common security technologies like identity and access management (IAM), multi-factor authentication (MFA), mobile device and application management, and email security.
Topic 3	• Endpoint Security: This domain is aimed at an Endpoint Security Analyst and covers identifying indicators of compromise (IOCs) and understanding the limits of signature-based anti-malware. It includes concepts like User and Entity Behavior Analytics (UEBA), endpoint detection and response (EDR), and extended detection and response (XDR). It also describes behavioral threat prevention and endpoint security technologies such as host-based firewalls, intrusion prevention systems, device control, application control, disk encryption, patch management, and features of Cortex XDR.
Topic 4	• Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL • TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.
Topic 5	• Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xpanse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q68-Q73):

NEW QUESTION # 68

Which capability does Cloud Security Posture Management (CSPM) provide for threat detection within Prisma Cloud?

- A. Integration with threat feeds
- B. Real-time protection from threats
- **C. Continuous monitoring of resources**
- D. Alerts for new code introduction

Answer: C

Explanation:

Cloud Security Posture Management (CSPM), including Prisma Cloud's offering, continuously monitors all cloud resources - such as compute instances, storage, network configurations, and identities - to detect misconfigurations, vulnerabilities, and potential threats in near real time.

NEW QUESTION # 69

Which two descriptions apply to an XDR solution? (Choose two.)

- A. It is designed for reporting on key metrics for cloud environments.
- B. It is focused on single-vector attacks on specific layers of defense.
- **C. It employs machine learning (ML) to identify threats.**
- **D. It ingests data from a wide spectrum of sources.**

Answer: C,D

Explanation:

XDR (Extended Detection and Response) uses machine learning (ML) to detect threats by identifying patterns and anomalies. XDR ingests data from multiple sources - including endpoints, networks, servers, and cloud workloads - to provide a unified and correlated view of threats across the environment.

NEW QUESTION # 70

Which type of firewall should be implemented when a company headquarters is required to have redundant power and high processing power?

- A. Physical
- B. Virtual
- C. Containerized
- D. Cloud

Answer: A

Explanation:

A physical firewall is ideal for environments like a company headquarters that require redundant power, high throughput, and dedicated hardware for maximum reliability and performance. It supports more robust failover and scalability compared to virtual or containerized options.

NEW QUESTION # 71

Which Palo Alto Networks solution has replaced legacy IPS solutions?

- A. Advanced WildFire
- B. Advanced Threat Prevention
- C. Advanced URL Filtering
- D. Advanced DNS Security

Answer: B

Explanation:

Advanced Threat Prevention is the Palo Alto Networks solution that has replaced legacy Intrusion Prevention Systems (IPS). It offers inline, ML-powered threat detection and evasion-resistant inspection to block sophisticated threats in real time, going beyond traditional signature-based IPS.

NEW QUESTION # 72

What is a function of SSL/TLS decryption?

- A. It identifies IoT devices on the internet.
- B. It protects users from social engineering.
- C. It applies to unknown threat detection only.
- D. It reveals malware within web-based traffic.

Answer: D

Explanation:

SSL/TLS decryption allows security tools to inspect encrypted traffic, enabling them to detect hidden malware, command-and-control communication, or data exfiltration that would otherwise bypass inspection if left encrypted.

NEW QUESTION # 73

.....

PCCP training dumps are created in the most unique, customized way so it can cover different areas of exam with the Quality and Price of the product which is unmatched by our Competitors. The 100% guarantee pass pass rate of PCCP training materials that guarantee you to pass your Exam and will not permit any type of failure. You will find every question and answer within PCCP
