Also, we have tested many volunteers who can prove that after studying our SC-300 Exam Questions for 20 to 30 hours, it is easy to pass the exam. The results show that our SC-300 study materials are easy for them to understand. In addition, they all enjoy learning on our SC-300 practice exam study materials.

Microsoft Identity and Access Administrator Sample Questions (Q217-Q222):

NEW QUESTION # 217

Your company has an Azure AD tenant that contains the users shown in the following table.

Name	Microsoft Role
User1	Application administrator
User2	None
User3	Exchange administrator
User4	Cloud application administrator

You have the app registrations shown in the following table.

App name	Used by	Microsoft Graph permission
App1	User1	Calendars.Read of type Delegated
App2	User2	Calendars.Read of type Delegated Calendars.ReadWrite of type Application
App3	User3, User4	Calendars.Read of type Application

A company policy prevents changes to user permissions.

Which user can create appointments in the calendar of each user at the company?

- **A. User2**
- B. User1
- C. User4
- D. User3

Answer: A

Explanation:

User2 is the only one who has access to Application.write for the calendar.

NEW QUESTION # 218

You are the cloud administrator for Pass4test Inc. and you have been tasked to implement multi- factor authentication for all of your users. In preparation for this, you need to ensure that all users are properly registered for multi-factor Authentication. Of the choices below, which one can NOT be used as an authentication method?

- A. Voice Call
- B. FIDO2 Security Key
- **C. Security Question**
- D. SMS
- E. Microsoft Authenticator App

Answer: C

NEW QUESTION # 219

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You use Azure Monitor to analyze Azure Active Directory (Azure AD) activity logs.

You receive more than 100 email alerts each day for tailed Azure AD user sign-in attempts.

You need to ensure that a new security administrator receives the alerts instead of you.

Solution: From Azure monitor, you modify the action group.

Does this meet the goal?

- **A. Yes**
- B. No

Answer: A

Explanation:

Yes, you modify the action group from Azure Monitor.

NEW QUESTION # 220

You have an Azure subscription named Sub1. Sub1 contains a storage account named storage1. You need to deploy two apps named App1 and App2 that will have the following configurations:

- * App1 will be deployed as a registered app in Sub1.
- * App1 will access storage1 by using Microsoft Entra authentication.
- * App2 will access storage1 by using a single Microsoft Entra identity.
- * App2 will be hosted on two new virtual machines named VM1 and VM2.

The solution must minimize administrative effort.

Which type of identity will each app use to access storage1? To answer, select the appropriate options in the answer area.

Microsoft

App1: Service principal
 Microsoft Entra group account
 Microsoft Entra user account
 Service principal
 System-assigned managed identity
 User-assigned managed identity

App2: User-assigned managed identity
 Microsoft Entra group account
 Microsoft Entra user account
 Service principal
 System-assigned managed identity
 User-assigned managed identity

Answer:

Explanation:

Microsoft

App1: Service principal
 Microsoft Entra group account
 Microsoft Entra user account
 Service principal
 System-assigned managed identity
 User-assigned managed identity

App2: User-assigned managed identity
 Microsoft Entra group account
 Microsoft Entra user account
 Service principal
 System-assigned managed identity
 User-assigned managed identity

Explanation:

ANSWER AREA

Microsoft

App1: Service principal

App2: User-assigned managed identity

NEW QUESTION # 221

You have a Microsoft 365 tenant.

The Sign-ins activity report shows that an external contractor signed in to the Exchange admin center.

You need to review access to the Exchange admin center at the end of each month and block sign-ins if required.

What should you create?

- A. an application-based access review that targets guest users
- B. an access package that targets users outside your directory
- C. a group-based access review that targets guest users
- D. an access package that targets users in your directory

Answer: C

Explanation:

You can target a group with a conditional policy to detect and remediate the login at the end of each month.
