**2025 CV0-003: CompTIA Cloud+ Certification Exam Useful Associate Level Exam**

In order to meet the needs of all customers, our company employed a lot of leading experts and professors in the field. These experts and professors have designed our CV0-003 exam questions with a high quality for our customers. We can promise that our products will be suitable for all people. As long as you buy our CV0-003 practice materials and take it seriously consideration, we can promise that you will pass your exam and get your certification in a short time. So choose our CV0-003 exam questions to help you review, you will benefit a lot from our CV0-003 study guide.

## CompTIA Cloud+ Certification Exam Sample Questions (Q298-Q303):

### NEW QUESTION # 298

An administrator recently provisioned a file server in the cloud. Based on financial considerations, the administrator has a limited amount of disk space. Which of the following will help control the amount of space that is being used?

- A. Network file system
- **B. User quotas**
- C. Thick provisioning
- D. Software-defined storage

**Answer: B**

### NEW QUESTION # 299

A company that utilizes an IaaS service provider has contracted with a vendor to perform a penetration test on its environment. The vendor is able to exploit the virtualization layer and obtain access to other instances within the cloud provider's environment that do not belong to the company.

Which of the following BEST describes this attack?

- A. Buffer overflow
- B. Directory traversal
- **C. VM escape**
- D. Heap spraying

**Answer: C**

Explanation:

VM escape is a type of attack that allows an attacker to break out of a virtual machine (VM) and access the host system or other VMs within the same cloud provider's environment. VM escape can exploit the vulnerabilities in the virtualization layer or hypervisor that separates and isolates the VMs from each other and from the host system. VM escape can result in serious consequences, such as compromising the security and privacy of other customers' data or resources, gaining unauthorized access to the cloud provider's infrastructure or services, or launching further attacks on other systems or networks. VM escape best describes the attack that was performed by a vendor who was able to exploit the virtualization layer and obtain access to other instances within the cloud provider's environment that do not belong to the company. Reference: CompTIA Cloud+ Certification Exam Objectives, page 19, section 4.1

### NEW QUESTION # 300

A cloud administrator is reviewing the authentication and authorization mechanism implemented within the cloud environment. Upon review, the administrator discovers the sales group is part of the finance group, and the sales team members can access the financial application. Single sign-on is also implemented, which makes access much easier.

Which of the following access control rules should be changed?

- A. Discretionary-based
- B. Attribute-based
- C. Mandatory-based
- **D. Role-based**

**Answer: D**

Explanation:

Role-based access control (RBAC) is a type of access control model that assigns permissions and privileges to users based on their roles or functions within an organization or system. RBAC can help simplify and streamline the management and enforcement of access policies, as it can reduce the complexity and redundancy of assigning permissions to individual users or groups. RBAC can

also help improve security and compliance, as it can limit or grant access based on the principle of least privilege and the separation of duties.

RBAC is the best access control rule to change when the sales group is part of the finance group and the sales team members can access the financial application due to a single sign-on mechanism being implemented. Reference:

### NEW QUESTION # 301

Which of the following is a difference between cloud computing and virtualization when implementing IaaS?

- A. All hardware is maintained on-site by current IT staff and managers
- B. Cloud computing may use virtualization, while virtualization does not require cloud services
- C. Boxed, retail versions of office suite software must be used for consistent licensing
- D. Both a cloud and a virtual solution will provide additional programmers for application development

**Answer: B**

### NEW QUESTION # 302

Which of the following would be the BEST option for discussion of what individuals should do in an incident response or disaster recovery scenario?

- A. A tabletop exercise
- B. A business continuity plan
- C. A root cause analysis
- D. Incident response/disaster recovery documentation

**Answer: A**

Explanation:

A tabletop exercise is the best option for discussion of what individuals should do in an incident response or disaster recovery scenario. A tabletop exercise is a simulated scenario that involves key stakeholders and decision-makers who review and discuss their roles and responsibilities in response to an emergency situation or event. A tabletop exercise can help to test and evaluate plans, procedures, policies, training, and communication.

### NEW QUESTION # 303

.....

Having a good command of professional knowledge for customers related to this CV0-003 exam is of superior condition. However, that is not certain and sure enough to successfully pass this exam.
