Connectivity to the backup data center is via a third-party, untrusted network. Which of the following is the most important feature required for this solution?

- A. Compression
- B. Deduplication
- C. Encryption
- D. Replication
- E. Labeling

NEW QUESTION # 133

A company serves customers globally from its website hosted in North America. A cloud engineer recently deployed new instances of the website in the Europe region. Which of the following is the most likely reason?

- A. To simplify workflow
- B. To decrease cost
- C. To reduce latency
- D. To enhance security

Answer: C

Explanation:

The most likely reason for deploying new instances of a website in the Europe region, in addition to the ones hosted in North America, is to reduce latency for users located in Europe. By having the website's resources closer to the end-users, the data has a shorter distance to travel, resulting in faster load times and better performance.
