Latest CompTIA CV0-004 Mock Exam - CV0-004 Test Collection Pdf

We respect the private information of our customers. If you buy the CV0-004 exam materials from us, you personal information will be protected well. Once the payment finished, we will not look the information of you, and we also won't send the junk mail to your email address. What's more, we offer you free update for 365 days for CV0-004 Exam Dumps, so that you can get the recent information for the exam. The latest version will be automatically sent to you by our system, if you have any other questions, just contact us.

CompTIA Cloud+ (2024) Sample Questions (Q79-Q84):

NEW QUESTION # 79
Which of the following is the most cost-effective way to store data that is infrequently accessed?

- A. Off-site
- B. Cold site

- C. Warm site
- D. Hot site

Answer: A

Explanation:
The most cost-effective way to store data that is infrequently accessed is typically an off-site storage service, often referred to as cold or archival storage. This type of storage is designed for data that is rarely accessed, providing lower storage costs.References: Data storage solutions and their cost implications, including off-site (cold or archival) storage for infrequently accessed data, are part of the cloud storage options discussed in CompTIA Cloud+.

NEW QUESTION # 80
A cloud administrator recently created three servers in the cloud. The goal was to create ACLs so the servers could not communicate with each other. The servers were configured with the following IP addresses:

	Server 1	Server 2	Server 3
IP address	172.16.12.7	172.16.12.14	172.16.13.4
Subnet mask	255.255.255.240	255.255.255.240	255.255.255.240
Default gateway	172.16.12.1	172.16.12.17	172.16.13.15

After implementing the ACLs, the administrator confirmed that some servers are still able to reach the other servers. Which of the following should the administrator change to prevent the servers from being on the same network?

- A. The IP address of Server 1 to 172.16.12.2
- B. The IP address of Server 2 to 172.16.14.14
- C. The IP address of Server 1 to 172.16.12.36
- D. The IP address of Server 2 to 172.16.12.18

Answer: A

Explanation:
To prevent the servers from being on the same network and communicating with each other, the administrator should change the IP address of Server 1 to 172.16.12.2. This IP address is outside the subnet defined by the subnet mask 255.255.255.240, which would place Server 1 on a different subnet, preventing direct communication without routing. Reference: CompTIA Cloud+ Study Guide (Exam CV0-004) by Todd Montgomery and Stephen Olson

NEW QUESTION # 81
A cloud engineer wants to implement a disaster recovery strategy that:
- Is cost-effective.
- Reduces the amount of data loss in case of a disaster.
- Enables recovery with the least amount of downtime.
Which of the following disaster recovery strategies best describes what the cloud engineer wants to achieve?

- A. Cold site
- B. Warm site
- C. Off site
- D. Hot site

Answer: D

Explanation:
A hot site is a disaster recovery strategy that is cost-effective, minimizes data loss, and allows for the fastest recovery time in case of a disaster. It is an exact replica of the original site of the organization, with full computer systems as well as near-complete backups of user data. Hot sites are operational 24/7 and can take over functionality from the primary site immediately or with minimal delay.

NEW QUESTION # 82

An organization has been using an old version of an Apache Log4j software component in its critical software application. Which of the following should the organization use to calculate the severity of the risk from using this component?

- A. CVE
- B. CWE
- C. CVSS
- D. CWSS

Answer: C

Explanation:

The Common Vulnerability Scoring System (CVSS) is what the organization should use to calculate the severity of the risk from using an old version of Apache Log4j software component. CVSS provides an open framework for communicating the characteristics and impacts of IT vulnerabilities. References: CompTIA Cloud+ Study Guide (Exam CV0-004) - Chapter on Risk Management

NEW QUESTION # 83

Which of the following is a field of computer science that enables computers to identify and understand objects and people in images and videos?

- A. Computer vision
- B. Facial recognition
- C. Image reconstruction
- D. Natural language processing

Answer: A

Explanation:

Computer vision is a field of computer science that enables computers to identify and understand objects and people in images and videos. It involves the development of systems that can capture and interpret visual information from the world, similar to the way humans do.
The application of computer vision and its role in cloud services, particularly in relation to AI and machine learning capabilities, is discussed in CompTIA Cloud+.

NEW QUESTION # 84

......

Therefore, you must prepare as per the changes of the CompTIA CV0-004 real test. For your assistance, ActualPDF offers free real CompTIA CV0-004 dumps updates if CompTIA Certification Exams changes the CV0-004 examination content within 365 days of your purchase. These free CV0-004 dumps updates will prevent you from mental stress, wasting time, and losing money.
