CWAP-404 Relevant Exam Dumps, CWAP-404 Exam Passing Score

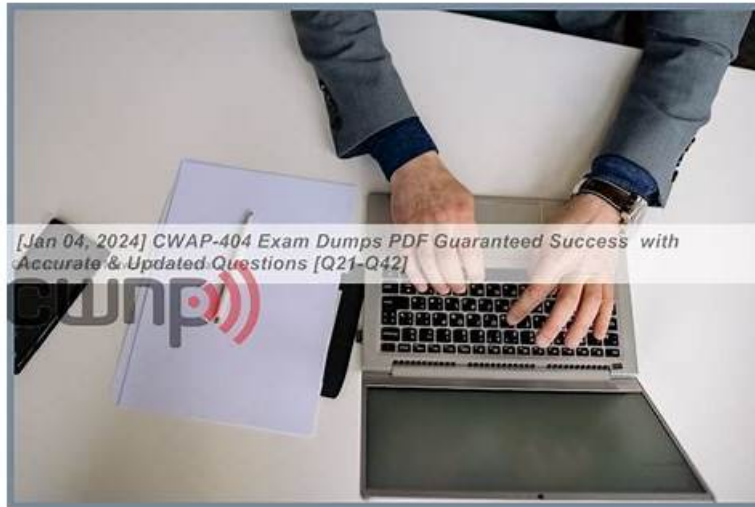

BONUS!!! Download part of Pass4Test CWAP-404 dumps for free: https://drive.google.com/open?id=1PqrYvytlwMlx3cLwivWXTTgePYNspafz

When it comes to negotiating your salary with reputed tech firms, you could feel entirely helpless if you're a fresh graduate or don't have enough experience. You will have no trouble landing a well-paid job in a reputed company if you have CWNP CWAP-404 Certification on your resume. Success in the test is also a stepping stone to climbing the career ladder. If you are determined enough, you can get top positions in your firm with the CWNP CWAP-404 certification.

Our CWAP-404 study materials are widely read and accepted by people. Through careful adaption and reorganization, all knowledge will be integrated in our CWAP-404 real exam. The explanations of our CWAP-404 exam materials also go through strict inspections. So what you have learned are absolutely correct. All in all, we have invested many efforts on compiling of the CWAP-404 Practice Guide. At last, we will arrange proofreaders to check the study materials.

2025 CWAP-404 Relevant Exam Dumps | High-quality 100% Free CWAP-404 Exam Passing Score

Our Pass4Test is the most reliable backing for every CWAP-404 candidate. All study materials required in CWAP-404 exam are provided by Our Pass4Test. Once you purchased our CWAP-404 exam dump, we will try our best to help you Pass CWAP-404 Exam. Additionally, our excellent after sales service contains one-year free update service and the guarantee of dump cost full refund if you fail the exam with our dump.

CWNP Certified Wireless Analysis Professional Sample Questions (Q82-Q87):

NEW QUESTION # 82
You are analyzing a problem with a specific client adapter.
The vendor specifications sheet does not provide detailed information.
What tool can you use to provide the most detailed specification information in many such cases?

- A. FCC ID Search
- B. WLAN controller
- C. Spectrum analyzer
- D. Wi-Fi finder

Answer: A

NEW QUESTION # 83

A manufacturing facility has installed a new automation system which incorporates an 802.11 wireless network. The automation system is controlled from tablet computers connected via the WLAN. However, the automation system has not gone live due to problem with the tablets connecting to the WLAN. The WLAN vendor has been onsite to perform a survey and confirmed good primary and secondary coverage across the facility. As a CWAP you are called in to perform Spectrum Analysis to identify any interference sources.

From the spectrum analysis, you did not identify any interference sources but were able to correctly identify the issue. Which of the following issues did you identify from the spectrum analysis?

- A. A high noise floor has resulted in a SNR of less than 20dB
- B. There is a power mismatch between the APs and the clients
- C. The tablets are entering power save mode and failing to wake up to receive the access points transmissions
- D. The tablets are connecting to the wrong SSID

Answer: B

Explanation:
Explanation
The most likely issue that can be identified from the spectrum analysis is a power mismatch between the APs and the clients. A power mismatch occurs when the APs transmit at a higher power level than the clients, or vice versa. This can cause asymmetric communication, where one side can hear the other, but not vice versa.
This can result in poor performance, disconnections, or packet loss. A spectrum analysis can reveal a power mismatch by showing different signal amplitudes or RSSI values for the APs and the clients on the same channel or frequency. The other options are not correct, as they cannot be identified from the spectrum analysis alone. The tablets' SSID, power save mode, and noise floor can be determined by using other tools or methods, such as protocol analysis, site survey, or device configuration. NEW QUESTION # 84

When evaluating modulation and coding schemes, you must determine the best coding rate available.
In 802.11 MCS tables, what is the best coding rate from the perspective of highest data rates?

- A. 5/6
- B. 1/2
- C. 3/4
- D. 2/3

Answer: A

NEW QUESTION # 85

What is encrypted within the third message of the 4-Way Handshake?

- A. PTK
- B. GMK
- C. GTK
- D. PMK

Answer: C

Explanation:
Explanation
The GTK (Group Temporal Key) is encrypted within the third message of the 4-Way Handshake. The 4-Way Handshake is a process that establishes a secure connection between a STA (station) and an AP (access point) using WPA2 (Wi-Fi Protected Access 2), which is a security protocol that uses AES-CCMP (Advanced Encryption Standard-Counter Mode CBC-MAC Protocol) as its encryption algorithm. The 4-Way Handshake consists of four messages that are exchanged between the STA and the AP. The first message is sent by the AP to the STA, containing the ANonce (Authenticator Nonce), which is a random number generated by the AP.
The second message is sent by the STA to the AP, containing the SNonce (Supplicant Nonce), which is a random number

generated by the STA, and the MIC (Message Integrity Code), which is a value that verifies the integrity of the message. The third message is sent by the AP to the STA, containing the GTK, which is a key that is used to encrypt and decrypt multicast and broadcast data frames, and the MIC. The GTK is encrypted with the KEK (Key Encryption Key), which is derived from the PTK (Pairwise Temporal Key). The PTK is a key that is used to encrypt and decrypt unicast data frames, and it is derived from the PMK (Pairwise Master Key), the ANonce, and the SNonce. The fourth message is sent by the STA to the AP, containing only the MIC, to confirm the completion of the 4-Way Handshake. The other options are not correct, as they are not encrypted within the third message of the 4-Way Handshake. The PMK is a key that is derived from a passphrase or obtained from an authentication server, and it is not transmitted in any message of the 4-Way Handshake. The PTK is a key that is derived from the PMK, the ANonce, and the SNonce, and it is not transmitted in any message of the 4-Way Handshake. The GMK (Group Master Key) is a key that is generated by the AP and used to derive the GTK, and it is not transmitted in any message of the 4-Way Handshake. References: [Wireless Analysis Professional Study Guide CWAP-404], Chapter 8: Security Analysis, page 211-213

NEW QUESTION # 86

You need to determine RF activity over time in a spectrum analyzer. It is to be able to see the activity and the amplitude of that activity.
What kind of view should be used?

- A. Device listing
- B. Channel listing
- C. Swept spectrogram
- D. Real-time FFT

Answer: C

NEW QUESTION # 87
