NEW QUESTION # 66

What does the number in the various Quadrature Amplitude Modulation levels, such as 16 in QAM-16 and 64 in QAM-64, indicate? (Choose the single best answer.)

- A. The channel width, which is stipulated in MHz
- **B. The number of target points in the QAM constellation, which are equivalent to amplitude and phase combinations**
- C. The number of spatial streams, which is 1/4 the number in the QAM level
- D. The speed of data transfer, which is four times the number in the QAM level

Answer: B

Explanation:

* QAM Constellations: QAM (Quadrature Amplitude Modulation) uses a constellation diagram where points represent unique combinations of amplitude and phase.

* Bits per Symbol: The number in QAM-XX indicates the number of points:

* QAM-16: 16 points = 4
