CWNP CWDP-305 Valid Test Bootcamp - CWDP-305 Downloadable PDF

As is known to us, the high pass rate is a reflection of the high quality of CWDP-305 study torrent. The more people passed their exam, the better the study materials are. There are more than 98 percent that passed their exam, and these people both used our CWDP-305 test torrent. There is no doubt that our Certified Wireless Design Professional guide torrent has a higher pass rate than other study materials. We deeply know that the high pass rate is so important for all people, so we have been trying our best to improve our pass rate all the time. Now our pass rate has reached 99 percent. If you choose our CWDP-305 study torrent as your study tool and learn it carefully, you will find that it will be very soon for you to get the Certified Wireless Design Professional certification in a short time. Do not hesitate and buy our CWDP-305 test torrent, it will be very helpful for you.

The CWNP CWDP-305 questions PDF questions are portable and printable, making it simple for you to prepare for the Certified Wireless Design Professional (CWDP-305) test in a short time. Smart devices such as smartphones, tablets, and laptops all support the CWNP CWDP-305 Exam PDF dumps format of our study material.

CWNP CWDP-305 Downloadable PDF & CWDP-305 Trustworthy Exam Torrent

Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills on our CWDP-305 exam questions. All the members of our experts and working staff maintain a high sense of responsibility, which is why there are so many people choose our CWDP-305 Exam Materials and to be our long-term partner. Believe in our CWDP-305 study guide, and you will have a brighter future!

CWNP Certified Wireless Design Professional Sample Questions (Q75-Q80):

NEW QUESTION # 75
What single tool, by design, can be used to verify channel selection, encryption in use, and number of APs above a specified signal

threshold in a given location during deployment?

- A. Throughput tester
- B. WLAN scanner
- C. Spreadsheet
- D. Spectrum analyzer

Answer: B

Explanation:
A WLAN scanner is a lightweight tool used during deployment and validation to verify channel utilization, detect SSIDs and APs, evaluate encryption schemes (e.g., WPA2/WPA3), and assess signal strength from APs in a particular area. It is not meant to perform in-depth frame analysis but provides a high-level overview.
From CWDP-305:
"WLAN scanners are useful tools for deployment validation and troubleshooting. They reveal AP signal strength, encryption in use, and can help verify if channel plans have been implemented correctly."
- Reference: CWDP-305 Official Study and Reference Guide, Chapter on Post-Design Validation and Troubleshooting

NEW QUESTION # 76
Your customer requires a security solution in which client credentials are used and the authentication server must have a certificate with optional client certificate use. Which EAP method would be the best fit for their requirement?

- A. LEAP
- B. EAP-TTLS
- C. EAP-TLS
- D. EAP-FAST

Answer: C

NEW QUESTION # 77
When deploying a new WLAN infrastructure using Power over Ethernet (PoE) to power the access points (APs), you find that a known good AP is not powering up. You connect your laptop using the same cable without any issues. What is the most likely reason the AP did not power up?

- A. Missing AP licenses on the controller
- B. Spanning-tree convergence
- C. Lack of PoE budget on the switch
- D. Layer 3 routing

Answer: C

Explanation:
A switch has a limited power budget that dictates how many PoE devices it can support at once. Even if the cable is functional and supports data (as seen with the laptop test), the switch may have exhausted its PoE budget, making it unable to provide power to additional devices. The CWDP-305 Study Guide highlights the importance of understanding power budgets when designing and deploying infrastructure, especially with newer AP models that draw more power under 802.3at or 802.3bt.
Reference: CWDP-305 Study Guide, Chapter on Infrastructure Design - "Power requirements and PoE budgeting"

NEW QUESTION # 78
When designing a static channel plan for an office using voice devices near an airport, which range of channels may be avoided to avoid channel switching when implemented in this environment?

- A. 116-124
- B. 36-40
- C. 44-48
- D. 1-11

Answer: A

NEW QUESTION # 79
Main Topic:Infrastructure Design
Question:
To increase capacity in a coverage-based wireless network, which of the following techniques are typically recommended? (Choose all that apply.)

- A. Add additional APs and use directional antennas.
- B. Lower power on the access points and, after careful planning, add more APs.
- C. Turn up power on the access points.
- D. Maximize airtime usage by disabling lower data rates.

Answer: A,B,D

Explanation:
Comprehensive and Detailed Explanation:
Increasing capacity in a coverage-based wireless network involves optimizing the network to handle more clients and traffic efficiently. The recommended techniques include:
A: Maximize airtime usage by disabling lower data rates:Disabling lower data rates (e.g., 1 Mbps, 2 Mbps) reduces the time the medium is occupied by slower transmissions, thereby increasing overall network efficiency and capacity.
B: Add additional APs and use directional antennas:Deploying more access points (APs) with directional antennas helps in segmenting the coverage area, reducing co-channel interference, and increasing capacity by allowing more simultaneous transmissions in different directions.
D: Lower power on the access points and, after careful planning, add more APs:Reducing the transmit power of APs minimizes overlap and interference between cells. After careful planning, adding more APs ensures coverage continuity and increases capacity by distributing the load among more APs.
C: Turn up power on the access points:Increasing the transmit power can lead to excessive overlap between cells, causing interference and reducing overall network capacity. Therefore, this is not a recommended practice for increasing capacity.

NEW QUESTION # 80
......

It is certain that the pass rate among our customers is the most essential criteria to check out whether our CWDP-305 training materials are effective or not. The good news is that according to statistics, under the help of our CWDP-305 training materials, the pass rate among our customers has reached as high as 98% to 100%. Our training materials have been honored as the panacea for the candidates for the exam since all of the contents in the CWDP-305 Guide materials are the essences of the exam. Consequently, with the help of our study materials, you can be confident that you will pass the exam and get the related certification easily. So what are you waiting for? Just take immediate actions!
