

Cyber AB CMMC-CCP Questions - 100% Success Guaranteed [2025]

CMMC-CCP Exam Questions & Answers (100% Score) Latest Updated 2024/2025 Comprehensive Questions & Graded Answers 100% Pass	
How Many domains are in Level 1 and What are they? - ✓✓6 domains: AC, IA, MP, PE, SC, SI	
How many controls are in Level 1? - ✓✓17	
What is some evidence For control AC.L1-3.1.2 - Limit information system access to the types of transactions and functions that authorized users are permitted to execute. - ✓✓CUI Allowed Roster, Access Control Policy, Screenshot of AD CUI Allowed Group, Screenshot of Users in Preveil, Principle of least privilege in AD	
What is some evidence For control IA.L1-3.5.2 - Authenticate (or verify) the identities of those users, processes, or devices, as a prerequisite to allowing access to organizational information systems - ✓✓Computer Naming Schema - PD102, Unique Usernames and passwords are in place, Screenshot of password policy, Identification & Authentication Policy	
What does the domain PE stand for? - ✓✓Physical Protection	
What does the domain SI stand for? - ✓✓System & Information Integrity	
Control SI.L1-3.14.1 - Flaw Remediation is defined as Identify, report, and correct information and information system flaws in a timely manner. What evidence can be used as Clamco's Response for this control? - ✓✓Screenshot of Ninja Patches, Change Mgmt smartsheet log, communication email alerts from fortinet, cisa, etc.	
According to our Media Protection Policy what do we do after the electronic media is picked up and we receive the destruction certificate? - ✓✓Document on the MP- Inventory Recycling Log in smart sheets under the Destroyed By and Destroyed by Date	
What does CMMC stand for? - ✓✓Cybersecurity Maturity Model Certification	
What does CUI Stand for? - ✓✓Controlled Unclassified Information	

2025 Latest ITdumpsfree CMMC-CCP PDF Dumps and CMMC-CCP Exam Engine Free Share: <https://drive.google.com/open?id=1Qg9WUaqA1BIw4eOFT7HpZy-R5G9xLNG3>

We guarantee you that our top-rated Cyber AB CMMC-CCP practice exam will enable you to pass the Cyber AB CMMC-CCP certification exam on the very first go. The authority of Certified CMMC Professional (CCP) Exam CMMC-CCP Exam Questions rests on its being high-quality and prepared according to the latest pattern.

Cyber AB CMMC-CCP Exam Syllabus Topics:

Topic	Details
Topic 1	CMMC Ecosystem: This section of the exam measures the skills of consultants and compliance professionals and focuses on the different roles and responsibilities across the CMMC ecosystem. Candidates must understand the functions of entities such as the Department of Defense, CMMC-AB, Organizations Seeking Certification, Registered Practitioners, and Certified CMMC Professionals, as well as how the ecosystem supports cybersecurity standards and certification.

Topic 2	• Scoping: This section of the exam measures the analytical skills of cybersecurity practitioners, highlighting their ability to properly define assessment scope. Candidates must demonstrate knowledge of identifying and classifying Controlled Unclassified Information (CUI) assets, recognizing the difference between in-scope, out-of-scope, and specialized assets, and applying logical and physical separation techniques to determine accurate scoping for assessments
Topic 3	• CMMC-AB Code of Professional Conduct (Ethics): This section of the exam measures the integrity of cybersecurity professionals by evaluating their understanding of the CMMC-AB Code of Professional Conduct. It emphasizes ethical responsibilities, including confidentiality, objectivity, professionalism, conflict-of-interest avoidance, and respect for intellectual property, ensuring candidates can uphold ethical standards throughout their CMMC-related duties.
Topic 4	• CMMC Model Construct and Implementation Evaluation: This section of the exam measures the evaluative skills of cybersecurity assessors, focusing on the application and assessment of the CMMC model. It includes understanding its levels, domains, practices, and implementation criteria, and how to assess whether organizations meet the required cybersecurity practices using evidence-based evaluation.

The more efforts you make, the luckier you are. As long as you never abandon yourself, you certainly can make progress. Now, our CMMC-CCP exam questions just need you to spend some time on accepting our guidance, then you will become popular talents in the job market. As a matter of fact, you only to spend about 20 to 30 hours on studying our CMMC-CCP Practice Engine and you will get your certification easily. Our CMMC-CCP training guide can help you lead a better life.

Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q194-Q199):

NEW QUESTION # 194

Recording evidence as adequate is defined as the criteria needed to:

- A. verify, based on an assessment and organizational practice.
- B. verify, based on an assessment and organizational scope.
- C. determine if a given artifact, interview response, demonstration, or test meets the CMMC scope.
- **D. determine if a given artifact, interview response, demonstration, or test meets the CMMC practice.**

Answer: D

NEW QUESTION # 195

A dedicated local printer is used to print out documents with FCI in an organization. This is considered an FCI Asset Which function BEST describes what the printer does with the FCI?

- A. Manage
- B. Distribute
- **C. Process**
- D. Encrypt

Answer: C

NEW QUESTION # 196

Contractor scoping requirements for a CMMC Level 2 Assessment to document the asset in an inventory, in the SSP and on the network diagram apply to:

- A. CUI and Security Protection Asset categories.
- B. Contractor Risk Managed Assets and Specialized Assets.
- C. all asset categories except for the Out-of-scope Assets.
- D. GUI Assets.

Answer: A

Explanation:

Under CMMC Level 2, contractors are required to identify, document, and categorize assets involved in handling Controlled Unclassified Information (CUI). This is part of the scoping process, which ensures that all security-relevant assets are properly protected and accounted for in the System Security Plan (SSP), asset inventory, and network diagram.

CMMC Scoping Requirements for Level 2 Assessments:

The CMMC Scoping Guide (CMMC v2.0) identifies four asset categories:

CUI Assets: Systems that store, process, or transmit CUI.

Security Protection Assets (SPA): Systems providing security functions for CUI Assets (e.g., firewalls, SIEMs).

Contractor Risk Managed Assets (CRMA): Assets that interact with CUI but are not directly controlled by the organization (e.g., personal devices).

Specialized Assets: These include IoT devices, OT systems, and Government Furnished Equipment (GFE) that may require specific security controls.

Where Documentation is Required:

The contractor must document all assets (except out-of-scope assets) in:

The System Security Plan (SSP): A key document detailing security controls and asset categorization.

An asset inventory: Lists all in-scope assets (CUI Assets, SPAs, CRMA, and Specialized Assets).

The network diagram: Provides a visual representation of system connectivity and security boundaries.

Why Out-of-Scope Assets Are Excluded:

The CMMC Scoping Guide specifically states that Out-of-Scope Assets are not required to be documented in these compliance artifacts because they have no direct or indirect interaction with CUI.

These assets do not require CMMC controls because they are completely isolated from CUI handling environments.

Why the Other Answer Choices Are Incorrect:

(A) GUI Assets: There is no specific "GUI Asset" category in CMMC scoping.

(B) CUI and Security Protection Asset categories: While these are included, this answer excludes Contractor Risk Managed and Specialized Assets, which are also required.

(D) Contractor Risk Managed Assets and Specialized Assets: These assets are included in scoping but this answer excludes CUI Assets and Security Protection Assets, making it incomplete.

Step-by-Step Breakdown: Final Validation from CMMC Documentation: According to the CMMC Assessment Scope Level 2 Guide, all in-scope assets must be documented in the SSP, inventory, and network diagram. The only assets excluded are Out-of-Scope Assets.

Thus, the correct answer is:

C). All asset categories except for the Out-of-Scope Assets.

NEW QUESTION # 197

An employee is the primary system administrator for an OSC. The employee will be a core part of the assessment, as they perform most of the duties in managing and maintaining the systems. What would the employee be BEST categorized as?

- A. Analyzer
- B. Applicable staff
- C. Inspector
- D. Demonstration staff

Answer: B

Explanation:

In the context of a Cybersecurity Maturity Model Certification (CMMC) assessment, the roles and responsibilities of individuals involved are clearly delineated to ensure a structured and effective evaluation process. The term "applicable staff" refers to personnel within the Organization Seeking Certification (OSC) who possess specific knowledge or expertise pertinent to the assessment.

These individuals are integral to the assessment process as they provide essential information, demonstrate the implementation of security practices, and facilitate the assessment team's understanding of the organization's cybersecurity posture.

In this scenario, the employee serving as the primary system administrator is responsible for managing and maintaining the organization's systems. Given their comprehensive understanding of the system configurations, security controls, and operational procedures, this individual is best categorized as "applicable staff." Their involvement is crucial during the assessment, as they can

provide detailed insights, demonstrate compliance measures, and address technical inquiries from the assessment team.

The other options can be delineated as follows:

* **Analyzer:**Typically refers to individuals who analyze data or security incidents, often as part of a security operations center. This role is not specifically defined within the CMMC assessment context.

* **Inspector:**Generally denotes a person who examines or inspects systems and processes, possibly as part of an internal audit or compliance check. This term is not a standard designation within the CMMC assessment framework.

* **Demonstration staff:**While this could imply personnel responsible for demonstrating systems or processes, it is not a recognized role within the CMMC assessment process.

Therefore, the primary system administrator, by virtue of their role and responsibilities, aligns with the "applicable staff" category, playing a pivotal role in facilitating a successful CMMC assessment.

NEW QUESTION # 198

Which phase of the CMMC Assessment Process includes developing the assessment plan?

- A. Phase 1
- B. Phase 3
- C. Phase 2
- D. Phase 4

Answer: A

Explanation:

Understanding the Phases of the CMMC Assessment ProcessThe CMMC Assessment Process (CAP) consists of multiple phases, with each phase focusing on a different aspect of the assessment. Developing the assessment plan occurs in Phase 1, which is the Pre-Assessment Phase.

* **Engagement Agreement:** The OSC (Organization Seeking Certification) and the Certified Third-Party Assessment Organization (C3PAO) formalize the assessment contract.

* **Developing the Assessment Plan:** The Lead Assessor and the assessment team create an Assessment Plan, which outlines:

* Scope of the assessment

* CMMC Level requirements

* Assessment methodology

* Timeline and logistics

* **Initial Data Collection:** Review of system documentation, policies, and relevant security controls.

Key Activities in Phase 1 - Pre-Assessment Phase

* A. Phase 1 # Correct

* Phase 1 is where the assessment plan is developed.

* It ensures clarity on scope, methodology, and logistics before the assessment begins.

* B. Phase 2 # Incorrect

* Phase 2 is the Assessment Conduct Phase, where assessors execute the plan by examining evidence and interviewing personnel.

* C. Phase 3 # Incorrect

* Phase 3 is the Post-Assessment Phase, which involves finalizing findings and submitting reports, not developing the plan.

* D. Phase (Incomplete Answer) # Incorrect

* The question requires a specific phase, and the correct one is Phase 1.

Why is the Correct Answer "Phase 1" (A)?

* **CMMC Assessment Process (CAP) Document**

* Defines Phase 1 as the stage where the assessment plan is developed.

* **CMMC Accreditation Body (CMMC-AB) Guidelines**

* Specifies that planning and pre-assessment activities occur in Phase 1.

* **CMMC 2.0 Certification Workflow**

* Outlines the assessment planning process as part of the initial engagement between the C3PAO and the OSC.
