At RealExamFree, we understand your needs when it comes to passing the Dell PowerStore Deploy 2023 Exam (D-PST-DY-23) Certification exam. If you prefer studying at home for the D-PST-DY-23 Exam, we have got you covered. RealExamFree offers D-PST-DY-23 exam questions in PDF format, which can be easily downloaded and accessed on all your devices. Moreover, the EMC D-PST-DY-23 Actual Questions PDF file will be available for immediate download right after your purchase, eliminating any waiting time.

EMC D-PST-DY-23 (Dell PowerStore Deploy 2023) Certification Exam is designed to test the knowledge and skills of individuals regarding the deployment of Dell PowerStore 2023 solutions. D-PST-DY-23 exam is intended for professionals who have experience in planning, deploying, managing, and supporting Dell PowerStore solutions. Dell PowerStore Deploy 2023 Exam certification exam covers various topics such as Dell PowerStore architecture, networking, storage provisioning, data protection, and system administration. Passing the EMC D-PST-DY-23 certification exam validates that an individual has the necessary skills and knowledge to deploy Dell PowerStore 2023 solutions in a production environment.

To earn the EMC D-PST-DY-23 Certification, IT professionals must demonstrate their competence in various PowerStore Deploy 2023 system functionalities through a series of questions, lab exercise, and simulations. D-PST-DY-23 exam is designed to challenge IT professionals to think critically and test their problem-solving capabilities in a real-world environment.

Practice D-PST-DY-23 Exams Free & Valid D-PST-DY-23 Exam Camp Pdf

If you have a dream to get the EMC certification? Why don't you begin to act? The first step is to pass D-PST-DY-23 exam. Time will wait for no one. Only if you pass the D-PST-DY-23 exam, can you get a better promotion. And if you want to pass it more efficiently, we must be the best partner for you. Because we are professional D-PST-DY-23 Questions torrent provider, and our D-PST-DY-23 training materials are worth trusting; because we make great efforts on our D-PST-DY-23 learning guide, we do better and better in this field for more than ten years. Our D-PST-DY-23 study guide is your best choice.

EMC Dell PowerStore Deploy 2023 Exam Sample Questions (Q82-Q87):

NEW QUESTION # 82

SIMULATION

An administrator received a request to provision a new test dev volume.

Use the simulator to provision a volume of 50 GB for their application team. Use a category of Other. The volume performance must not impact the production I/O when the system is heavily loaded.

When you have finished continue to the next question.

Answer:

Explanation:

See explanation below

Explanation:

Access the Storage Management System
Log into your storage management interface
Navigate to Volume Creation
Go to the volume management section and click on "Create Volume" or similar option.
Configure Volume Settings
Name the volume appropriately to indicate it is for test dev. Set the size to 50 GB. Choose the category or type as "Other".
Set Performance Parameters
Look for an option to set performance priority or QoS settings. Configure the volume to have lower priority or a limited I/O capacity to ensure it does not impact production systems when the system is heavily loaded.
Create the Volume
Review the settings to ensure they match the requirements. Click "Create" to provision the volume.
Confirm Volume Creation
Verify that the volume appears in the list of available volumes and with the correct settings.

1. Create the Volume

Navigate to Storage > Volumes.

Click + CREATE.

Enter the volume name (e.g., "TestDevVolume").

Set the volume size to 50 GB.

In the "Category" dropdown, select Other.

Important: Under "Advanced Settings," locate the "Performance" section and set the Workload Type to Low. This will ensure that the volume's performance has minimal impact on production I/O, especially during periods of heavy system load.

Click Add.

Verification

After creating the volume, you can verify its settings on the Volumes page. Check that the size, category, and workload type are correctly configured.

Key Considerations

Workload Type: The "Low" workload type setting is crucial in this scenario. It prioritizes production I/O over the test/dev volume, preventing performance contention.

Performance Monitoring: It's a good practice to monitor the system's performance after provisioning the volume, especially during peak usage, to ensure that the production workloads are not negatively affected.

By following these steps, you'll successfully provision a 50 GB volume for the application team with the appropriate performance settings to avoid impacting production I/O. This meets the requirements of the simulation task.

NEW QUESTION # 83

What is the role of the migration source in the PowerStore migration process?

- A. It holds the data to be migrated.
- B. It configures the target applications.
- C. It defines the network settings.
- D. It provides the destination storage.

Answer: A

NEW QUESTION # 84

Which two pieces of information are required to create a new remote system connection? (Choose two.)

- A. Network Latency
- B. IP address of local system
- C. Remote domain name
- D. Remote PowerStore name
- E. IP address of remote system

Answer: A,E

Explanation:

In the Add Remote System slide-out panel, configure the following fields:

- Remote system type - Select PowerStore.
- Management IP address
- Description (optional)
- Network latency

<https://www.dell.com/support/manuals/en-us/powerstore-7000/pwrstr-protect-data/add-a-remote-system-connection-for-replication-and-metro?guid=guid-937b06e1-2a74-40e1-a8b6-9aae6f72e27d&lang=en-us>

NEW QUESTION # 85

A storage administrator needs to group Volume-1 and Volume-2 for consistency. The group should have a snapshot every day that is retained for 25 hours.

Use the simulator to make this configuration change.

When you have finished continue to the next question.

Answer:

Explanation:

See the steps in Explanation.

Explanation:

1. Open the simulator and log in with the default credentials: admin/Password123#.
2. Select Storage > Volumes from the left menu.
3. Select Volume-1 and Volume-2 from the list of volumes and click Group.
4. Enter a name for the volume group, such as Consistent-Group, and click Create.
5. Select Protection > Protection Policies from the left menu.

6. Click+ CREATEto launch the Create Protection Policy wizard.
7. Enter a name for the protection policy, such asDaily-Snapshot, and clickNext.
8. Click+ CREATEto create a new snapshot rule for the policy.
9. Enter a name for the snapshot rule, such asDaily-Rule, and clickNext.
10. SelectAll Daysfor the days to run the rule andTime of dayfor the frequency. Enter00:00as the start time and clickNext.
11. Enter25as the retention hours and clickNext.
12. Review the summary and clickFinishtto create the snapshot rule.
13. ClickNextto continue the protection policy wizard.
14. Review the summary and clickFinishtto create the protection policy.
15. SelectStorage>Volume Groupsfrom the left menu.
16. SelectConsistent-Groupfrom the list of volume groups and clickEdit.
17. ClickProtection Policyand selectDaily-Snapshotfrom the drop-down list. ClickSave.
18. The volume group is now configured with a protection policy that creates a snapshot every day at 00:00 and retains it for 25 hours.

NEW QUESTION # 86

What is the default performance policy on PowerStore?

- A. Low
- B. High
- C. Highest
- D. Medium

Answer: D

NEW QUESTION # 87
