Solutions is one of the top platforms that has been helping Dell PowerStore Deploy 2023 Exam exam candidates for many years. Over this long time period countless candidates have passed their dream Dell PowerStore Deploy 2023 Exam (D-PST-DY-23) certification exam. They all got help from Exams. Solutions D-PST-DY-23 Practice Questions and easily passed their exam. The EMC D-PST-DY-23 exam questions are designed by experience and qualified D-PST-DY-23 certification expert.

The Dell PowerStore is a modern storage platform that is designed to provide high performance, scalability, and flexibility. It is built on a foundation of industry-standard hardware and software components and is designed to support a wide range of workloads. The PowerStore platform leverages advanced technologies such as NVMe, SCM, and machine learning to provide the performance and efficiency required by modern data centers.

The Dell PowerStore Deploy 2023 exam consists of several topics that include system architecture, hardware installation, cluster configuration, storage provisioning, data protection, and system management. D-PST-DY-23 Exam validates the candidate's ability to design and implement Dell PowerStore solutions that meet the technical requirements of the organizations. Successful candidates will be equipped with the technical knowledge and skills required to deploy Dell PowerStore technology in a data center environment.

EMC D-PST-DY-23 Valid Exam Brindumps - D-PST-DY-23 Reliable Test Sample

TestkingPDF is one of the leading best platforms that have been offering valid, verified, and updated EMC Exam Questions for many years. Over this long time period, countless D-PST-DY-23 exam candidates have passed their D-PST-DY-23 Exam. They all got help from real and valid TestkingPDF Dell PowerStore Deploy 2023 Exam (D-PST-DY-23) practice questions and prepared well for the final EMC exam.

EMC Dell PowerStore Deploy 2023 Exam Sample Questions (Q66-Q71):

NEW QUESTION # 66

Refer to the exhibit.

Which host initiator type can be added to the existing host group?

- A. Windows FC
- B. ESXi iSCSI
- C. ESXi NVMe
- D. Solaris iSCSI
- E. Windows iSCSI

Answer: C

NEW QUESTION # 67

Refer to the Exhibit.

```
#(config) interface vlan 1501
#(conf-if-vl-1501) interface ethernet 1/1/54
#(conf-if-eth1/1/54) description Discovery_Laptop
#(conf-if-eth1/1/54) switchport access vlan 1501
#(conf-if-eth1/1/54) no shutdown
```

A Network administrator is failing to discover a PowerStore T system using the PowerStore Discovery Utility. What might be the issue?

- A. Port 54 needs to be enabled
- B. Dedicated port needs to be used for discovery network
- C. Discovery network uses only native VLAN
- D. Port 54 has not been set to trunk mode

Answer: C

NEW QUESTION # 68

SIMULATION

You're absolutely right! I apologize for my previous response. I can definitely try to extract the text from the image.

Here's the "Task" as written in the image:

A storage administrator must provision local storage resources for his database as per the below requirements:

Create a new "Database" storage resource as a capacity of 5TB

PowerStore under load must prioritize this workload

ESXi host called "ESXi3" is using iSCSI connectivity

The ESXi host must use the LUN number of 101

Use the simulator to make this configuration change.

The screenshot displays the Dell EMC PowerStore Cluster2 management interface. On the left, a 'Task' panel contains instructions for provisioning storage resources. The main area shows an 'OVERVIEW' section with metrics for Appliances, Alerts, and Watching. Below this is an 'Inventory' section with icons for Volume Groups, Volumes, Hosts, Virtual Machines, File Systems, SMB Shares, NFS Exports, and NAS Servers. A 'Watchlist' section at the bottom indicates no items are currently being watched. On the right, a 'CAPACITY' section shows 6.1 TB free and physical space, and a 'PERFORMANCE' section displays latency, IOPS, and bandwidth metrics. An 'Alerts' section on the far right shows no critical alerts.

Answer:

Explanation:

See explanation below

Explanation:

1. Create the Host

Navigate to Compute > Hosts.

Click Add Host.

Enter the host name: ESXi3

Select iSCSI as the protocol.

Click Next.

Select the appropriate Network and Port Group for iSCSI connectivity.

Click Add.

2. Create the Volume

Navigate to Storage > Volumes.

Click Add Volume.

Enter the volume name: SQL_Datastore

Set the volume size to 5 TB.

Important: Under "Advanced Settings," locate the "Performance" section and set the Workload Type to Database. This will prioritize the volume's performance for database operations.

Click Add.

3. Map the Volume to the Host

On the Volumes page, locate the newly created SQL_Datastore volume.

Click the More Actions button (three vertical dots) and select Map to Host.

Choose the ESXi3 host.

Important: In the "LUN ID" field, enter 101 to assign the desired LUN number.

Click Map.

Verification

After completing these steps, go back to the Hosts page and select ESXi3.

Click the Volumes tab to confirm that the SQL_Datastore volume is mapped to the host with the correct LUN ID (101).

Key Considerations

iSCSI Network Configuration: Ensure that your iSCSI network is properly configured with the necessary VLANs and IP addresses.

Host Connectivity: Make sure that the ESXi3 host has the correct iSCSI initiator configuration to connect to the PowerStore appliance.

By following these steps, you'll successfully provision the local storage resources for the database on your new ESXi host, meeting

all the specified requirements.

NEW QUESTION # 69

A PowerStore user has a business need for file system snapshots of NAS Server NAS1 with the following attributes:

Taken M-F every 2 hoursOT

Retention of 2 daysOT

The snapshots must be accessible through the Previous Versions menu in Windows Using the PowerStore Simulator, make the appropriate configuration change.

When you have finished, continue to the next question.

Answer:

Explanation:

see the Explanation for the solution.

Explanation:

1. Launch the PowerStore Simulator and log in with the admin credentials.
2. On the left navigation pane, click Protection and then click Protection Policies.
3. Click Create Policy and enter a name and description for the policy, such as NAS1 Snapshot Policy.
4. Under Snapshot Rules, click Add Rule and configure the following settings:
5. Name: Enter a name for the rule, such as NAS1 Snapshot Rule.
6. Schedule: Select Custom and enter the following cron expression: 0 */2 * * 1-5. This expression means that the snapshots will be taken every 2 hours on Monday to Friday
7. Retention: Select Until and enter 2 days. This means that the snapshots will be deleted after 2 days.
8. Access Type: Select Snapshot. This means that the snapshots will be accessible through the Previous Versions menu in Windows
9. Click Save to create the snapshot rule and then click Next.
10. Under Replication Rules, click Skip. This means that no replication rule will be added to the policy.
11. Click Next and then click Finish to create the protection policy.
12. On the left navigation pane, click Storage and then click File Systems.
13. Select the file system that belongs to NAS Server NAS1 and click More Actions.
14. Click Edit and then click Protection Policy.
15. Select the protection policy that was created in the previous steps, such as NAS1 Snapshot Policy, and click Save.
16. Click Confirm to apply the protection policy to the file system

NEW QUESTION # 70

An administrator removes a volume from an existing volume group which is part of replication. The system generates an error stating that it cannot create a replication session for the volume.

Why does removing the volume generate an error message?

- A. The volume group alerts must be acknowledged
- B. The volume is not mapped to the volume group host
- C. The volume group configuration must be synchronized
- D. The volume already has a protection policy

Answer: D

NEW QUESTION # 71

.....

The learning material is open in three excellent formats, PDF, a desktop practice test, and a web-based practice test. EMC D-PST-DY-23 Dumps is organized by experts while saving the furthest down-the-line plan to them for the EMC D-PST-DY-23 Exam. The sans bug plans have been given to you all to drift through the EMC D-PST-DY-23 certification exam
