D-PVM-OE-01 Questions Answers, D-PVM-OE-01 Reliable Learning Materials

Among all substantial practice materials with similar themes, our D-PVM-OE-01 practice materials win a majority of credibility for promising customers who are willing to make progress in this line. With excellent quality at attractive price, our D-PVM-OE-01 Exam Questions get high demand of orders in this fierce market. You can just look at the data about the hot hit on the D-PVM-OE-01 study braindumps everyday, and you will know that how popular our D-PVM-OE-01 learning guide is.

EMC D-PVM-OE-01 Exam Syllabus Topics:

Topic	Details

Topic 1	• Solutions Enabler 10 Implementation: This section of the exam measures the skills of Infrastructure Engineers and focuses on the fundamentals of Solutions Enabler. Candidates must understand its installation, upgrade processes, gatekeeper management, and daemon functions across different platforms. One crucial skill tested is managing Solutions Enabler daemons.
Topic 2	• PowerMax Family Management in a Virtual Environment: This section of the exam measures the skills of Virtualization Engineers and evaluates the integration of PowerMax storage in virtualized environments. Candidates must understand VMware vSphere, the functionalities of Virtual Storage Integrator (VSI), and how to monitor virtualized workloads using Unisphere for PowerMax. One critical skill assessed is tracking virtual machine storage performance.
Topic 3	• PowerMax Family Monitoring and Workload Planning: This section of the exam measures the skills of Performance Analysts and focuses on monitoring storage environments and workload planning using Unisphere for PowerMax. Candidates must understand how to track performance metrics, detect issues, and optimize workloads to enhance storage efficiency. One key skill tested is monitoring storage health through Unisphere.
Topic 4	• Unisphere for PowerMax 10 Implementation and Administration: This section of the exam measures the skills of System Administrators and covers the implementation and management of Unisphere for PowerMax. Candidates must understand the installation process, post-installation tasks, and interface navigation to efficiently operate the platform. One key skill evaluated is setting up Unisphere for PowerMax.
Topic 5	• PowerMax Family Storage Provisioning: This section of the exam measures the skills of Storage Administrators and covers the architecture, configurations, and management of the PowerMax family. Candidates must understand system models, port and device management, and provisioning methods using Unisphere for PowerMax. They are expected to perform service level-based provisioning and allocate storage through auto-provisioning groups. One key skill assessed is configuring storage using Unisphere for PowerMax.
Topic 6	• PowerMaxOS 10 Data Mobility: This section of the exam measures the skills of Data Migration Specialists and covers data mobility and migration features in PowerMaxOS 10. Candidates must understand the benefits of non-disruptive migration and be able to perform migrations using Unisphere for PowerMax. One key skill assessed is executing non-disruptive data migrations.
Topic 7	• PowerMax Family Business Continuity Administration: This section of the exam measures the skills of Disaster Recovery Engineers and focuses on replication technologies used for business continuity. Candidates must perform SnapVX and Clone operations using Unisphere for PowerMax and understand Symmetrix Remote Data Facility (SRDF) replication. They must also execute SRDF operations using Unisphere and SYMCLI.

EMC Dell Technologies PowerMax Operate Sample Questions (Q85-Q90):

NEW QUESTION # 85
Which symrdf flag and operation allows new devices to be added to an active SRDF/A session without suspending the session?

- A. establish with the movepair operation
- B. cons_exempt with the modifygrp operation
- C. cons_exempt with the movepair operation
- D. establish with the resume operation

Answer: C

NEW QUESTION # 86
Refer to the Exhibit.

Diamond	Platinum	Gold	Silver	Bronze	Optimized
Expected Avg. RT	Expected Avg. RT	Expected Avg. RT	Expected Avg. RT	Expected Avg. RT	Expected Avg. RT
0.6 ms	0.8 ms	1 ms	3.6 ms	7.2 ms	System Optimized
Remaining Headroom	Remaining Headroom	Remaining Headroom	Remaining Headroom	Remaining Headroom	Remaining Headroom
11124.37 GB	11026.57 GB	11124.37 GB	11124.37 GB	11124.37 GB	11124.37 GB

Which service levels are available for CKD devices'?

- A. Diamond and Platinum only
- B. All service levels
- C. Diamond, Bronze, and Optimized only
- D. Service levels are not used

Answer: C

NEW QUESTION # 87

Which Open Replicator device type resides on the array running Open Replicator?

- A. Remote
- B. Local
- C. Control
- D. Donor

Answer: C

NEW QUESTION # 88

When listing the details of a snapshot, what does "Total Deltas" reference?

- A. Difference between the snapshot and the target
- B. Difference between the snapshot and the source
- C. Difference between the source and target
- D. Difference between the snapshot and a newer snapshot
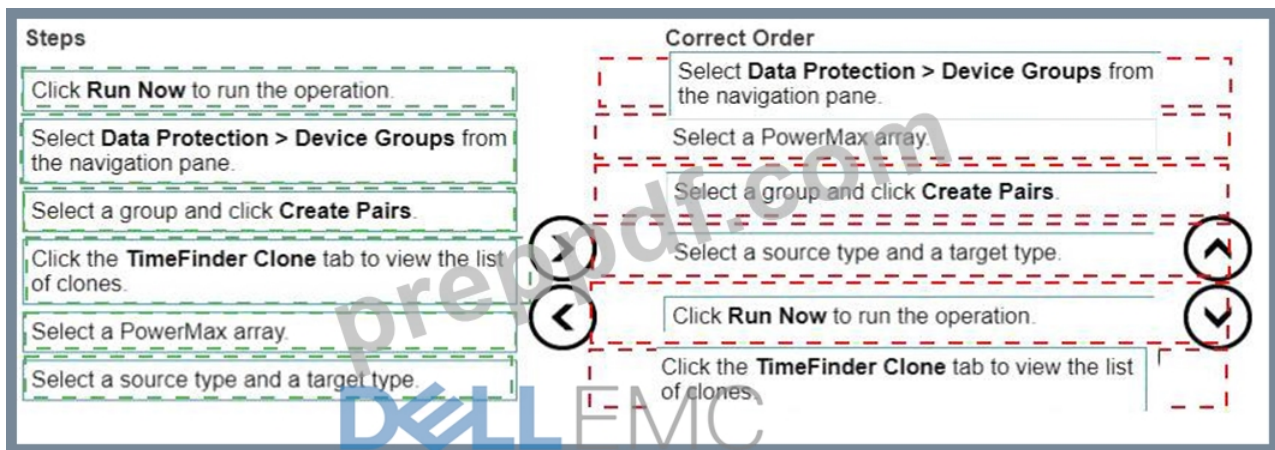

Answer: D

NEW QUESTION # 89

Place the steps in the correct order to create clone copy sessions of device groups.

Steps | Correct Order

Click **Run Now** to run the operation.

Select **Data Protection > Device Groups** from the navigation pane.

Select a group and click **Create Pairs**.

Click the **TimeFinder Clone** tab to view the list of clones.

Select a PowerMax array.

Select a source type and a target type.

Answer:

Explanation:

Explanation:

Here's the correct sequence of steps along with explanations:

Correct Order:

* Select Data Protection > Device Groups from the navigation pane.

* Why:This is the starting point within Unisphere for PowerMax. You need to navigate to the section where device groups are managed and where TimeFinder operations are initiated.

* Select a PowerMax array.

* Why:In an environment with multiple PowerMax arrays, you must specify the array on which you want to create the clone copy sessions.

* Select a group and click Create Pairs.

* Why:You are selecting the specific device group that will be the source for the clone operation and choosing the "Create Pairs" action to initiate the clone session creation process. This implies you are creating a clone from an existing group of devices.

* Select a source type and a target type.

* Why:This step defines the characteristics of the source and target devices for the clone session.

This could involve selecting from different storage groups, specifying thin or thick provisioning, or other relevant settings. Note that in a clone context, the "target type" often refers to how the clone will be linked to the source (e.g., a full copy or a linked target).

* Click Run Now to run the operation.

* Why:After configuring all the settings for the clone session, this action triggers the actual creation of the clone pairs based on the selected source and target types and other parameters.

* Click the TimeFinder Clone tab to view the list of clones.

* Why:Once the operation has been initiated, this is how you would verify that the clone sessions were created successfully and monitor their status.

* Select Data Protection > Device Groups from the navigation pane.

* Select a PowerMax array.

* Select a group and click Create Pairs.

* Select a source type and a target type.

* Click Run Now to run the operation.

* Click the TimeFinder Clone tab to view the list of clones.

NEW QUESTION # 90

......

Success does not come only from the future, but it continues to accumulate from the moment you decide to do it. At the moment you choose D-PVM-OE-01 practice quiz, you have already taken the first step to success. The next thing you have to do is stick with it. D-PVM-OE-01 Training Materials will definitely live up to your expectations. Not only our D-PVM-OE-01 study materials contain the latest exam questions and answers, but also the pass rate is high as 98% to 100%.
