

HPE7-A02 100% Correct Answers & HPE7-A02 Reliable Test Materials

BTW, DOWNLOAD part of PassSureExam HPE7-A02 dumps from Cloud Storage: <https://drive.google.com/open?id=1BAA6ZTnrbbOhbUJ8A5kX-cdX1JJXMnFy>

You will be able to experience the real exam scenario by practicing with HP HPE7-A02 practice test questions. As a result, you should be able to pass your HP HPE7-A02 Exam on the first try. HP HPE7-A02 desktop software can be installed on Windows-based PCs only. There is no requirement for an active internet connection.

It is well known that under the guidance of our HPE7-A02 PDF study exam, you are more likely to get the certification easily. But I think few of you know the advantages after getting certificates. Basically speaking, the benefits of certification with the help of our HPE7-A02 practice test can be classified into three aspects. Firstly, with the certification, you can have access to big companies where you can more job opportunities which you can't get in the small companies. Secondly, with our HPE7-A02 Preparation materials, you can get the HPE7-A02 certificates and high salaries.

HPE7-A02 Reliable Test Materials, HPE7-A02 New APP Simulations

Please believe that our PassSureExam team have the same will that we are eager to help you pass HPE7-A02 exam. Maybe you are still worrying about how to prepare for the exam, but now we will help you gain confidence. By constantly improving our dumps, our strong technical team can finally take proud to tell you that our HPE7-A02 exam materials will give you unexpected surprises. You can download our free demo to try, and see which version of HPE7-A02 Exam Materials are most suitable for you; then you can enjoy your improvement in IT skills that our products bring to you; and the sense of achievement from passing the HPE7-A02 certification exam.

HP Aruba Certified Network Security Professional Exam Sample Questions (Q19-Q24):

NEW QUESTION # 19

A port-access role for AOS-CX switches has this policy applied to it:

plaintext

Copy code

port-access policy mypolicy

10 class ip zoneC action drop

20 class ip zoneA action drop

100 class ip zoneB

The classes have this configuration:

plaintext

Copy code

class ip zoneC

10 match tcp 10.2.0.0/16 eq https

class ip zoneA

10 match ip any 10.1.0.0/16

class ip zoneB
10 match ip any 10.0.0.0/8

The company wants to permit clients in this role to access 10.2.12.0/24 with HTTPS. What should you do?

- A. Add this rule to zoneC: 5 ignore tcp any 10.2.12.0/24 eq https
- **B. Add this rule to zoneC: 5 match any 10.2.12.0/24 eq https**
- C. Add this rule to zoneB: 5 match tcp any 10.2.12.0/24 eq https
- D. Add this rule to zoneA: 5 ignore tcp any 10.2.12.0/24 eq https

Answer: B

Explanation:

Comprehensive Detailed Explanation

* The requirement is to permit HTTPS traffic from clients to the 10.2.12.0/24 subnet.

* ZoneC is configured to drop all HTTPS traffic to the 10.2.0.0/16 subnet. Therefore, the first match in the zoneC class (priority 10) will drop the desired traffic.

* To override this behavior, you must add a higher-priority rule (lower rule number) to zoneC that explicitly matches 10.2.12.0/24 and permits the traffic.

Thus, adding the rule 5 match any 10.2.12.0/24 eq https to zoneC ensures the desired traffic is permitted while maintaining the drop behavior for the rest of 10.2.0.0/16.

NEW QUESTION # 20

Refer to Exhibit.

A company is using HPE Aruba Networking ClearPass Device Insight (CPDI) (the standalone application).

In the CPDI interface, you go to the Generic Devices page and see the view shown in the exhibit.

What correctly describes what you see?

- A. Each cluster is a group of devices that have been classified with user rules, but for which CPDI offers different recommendations.
- B. Each cluster is all the devices that have been assigned to the same category by one of CPDI's built-in system rules.
- C. Each cluster is a group of devices that match one of the tags configured by admins.
- **D. Each cluster is a group of unclassified devices that CPDI's machine learning has discovered to have similar attributes.**

Answer: D

Explanation:

In HPE Aruba Networking ClearPass Device Insight (CPDI), the clusters shown in the exhibit represent groups of unclassified devices that CPDI's machine learning algorithms have identified as having similar attributes. These clusters are formed based on observed characteristics and behaviors of the devices, helping administrators to categorize and manage devices more effectively.

1. Machine Learning: CPDI uses machine learning to analyze device attributes and group them into clusters based on similarities.
2. Unclassified Devices: These clusters typically represent devices that have not yet been explicitly classified by admins but share common attributes that suggest they belong to the same category.
3. Management: This clustering helps in simplifying the process of managing and applying policies to groups of similar devices.

NEW QUESTION # 21

A company has HPE Aruba Networking APs (AOS-10), which authenticate clients to HPE Aruba Networking ClearPass Policy Manager (CPPM). CPPM is set up to receive a variety of information about clients' profile and posture. New information can mean that CPPM should change a client's enforcement profile.

What should you set up on the APs to help the solution function correctly?

- A. In the WLAN profiles, enable interim RADIUS accounting.
- B. In the security settings, configure dynamic denylisting.
- **C. In the RADIUS server settings for CPPM, enable Dynamic Authorization.**
- D. In the RADIUS server settings for CPPM, enable querying the authentication status.

Answer: C

Explanation:

To ensure that HPE Aruba Networking APs (AOS-10) properly interact with HPE Aruba Networking ClearPass Policy Manager (CPPM) and dynamically update a client's enforcement profile based on new profile and posture information, you should enable Dynamic Authorization in the RADIUS server settings for CPPM. This allows ClearPass to send Change of Authorization (CoA) requests to the APs, prompting them to reapply the appropriate enforcement profiles based on updated information.

1. Dynamic Authorization: Enabling this feature allows ClearPass to dynamically push changes to the APs whenever there is new relevant information about a client's profile or posture.
2. Change of Authorization (CoA): This mechanism ensures that clients are assigned the correct enforcement profiles in real-time, based on the latest data.
3. Enhanced Policy Enforcement: This setup helps in maintaining accurate and up-to-date policy enforcement for clients on the network.

NEW QUESTION # 22

What is one use case for implementing user-based tunneling (UBT) on AOS-CX switches?

- A. Adding 802.1X while continuing to use the existing VLAN and ACL structure in the Ethernet network
- B. Tunneling traffic directly to a third-party firewall in a client data center
- **C. Applying enhanced security features such as deep packet inspection (DPI) to wired traffic**
- D. Centralizing the distribution of wired traffic without requiring HPE Aruba Networking gateways

Answer: C

Explanation:

Implementing user-based tunneling (UBT) on AOS-CX switches is beneficial for applying enhanced security features such as deep packet inspection (DPI) to wired traffic. UBT allows the traffic from specific users or devices to be tunneled to a central controller or security appliance where advanced security policies, including DPI, can be applied. This approach ensures that even wired traffic benefits from the same level of security and inspection typically available for wireless traffic, thus enhancing overall network security. Reference: Aruba's documentation on UBT and AOS-CX configuration guides detail how to set up user-based tunneling and the benefits of applying advanced security features like DPI to tunneled traffic.

NEW QUESTION # 23

A company has HPE Aruba Networking APs (AOS-10), which authenticate clients to HPE Aruba Networking ClearPass Policy Manager (CPPM). CPPM is set up to receive a variety of information about clients' profile and posture. New information can mean

that CPPM should change a client's enforcement profile.
What should you set up on the APs to help the solution function correctly?

- A. In the WLAN profiles, enable interim RADIUS accounting.
- B. In the security settings, configure dynamic denylisting.
- **C. In the RADIUS server settings for CPPM, enable Dynamic Authorization.**
- D. In the RADIUS server settings for CPPM, enable querying the authentication status.

Answer: C

Explanation:

To ensure that HPE Aruba Networking APs (AOS-10) properly interact with HPE Aruba Networking ClearPass Policy Manager (CPPM) and dynamically update a client's enforcement profile based on new profile and posture information, you should enable Dynamic Authorization in the RADIUS server settings for CPPM. This allows ClearPass to send Change of Authorization (CoA) requests to the APs, prompting them to reapply the appropriate enforcement profiles based on updated information.

1. Dynamic Authorization: Enabling this feature allows ClearPass to dynamically push changes to the APs whenever there is new relevant information about a client's profile or posture.

2. Change of Authorization (CoA): This mechanism ensures that clients are assigned the correct enforcement profiles in real-time, based on the latest data.

3. Enhanced Policy Enforcement: This setup helps in maintaining accurate and up-to-date policy enforcement for clients on the network.

Reference: ClearPass and AOS-10 documentation on RADIUS server settings and dynamic authorization explain the process and benefits of enabling Dynamic Authorization for real-time policy updates.

NEW QUESTION # 24

.....

Our HPE7-A02 exam guide question is recognized as the standard and authorized study materials and is widely commended at home and abroad. Our HPE7-A02 study materials boost superior advantages and the service of our products is perfect. We choose the most useful and typical questions and answers which contain the key points of the test and we try our best to use the least amount of questions and answers to showcase the most significant information. Our HPE7-A02 learning guide provides a variety of functions to help the clients improve their learning and pass the HPE7-A02 exam.
