

JN0-336 Relevant Questions - JN0-336 Pass Test

P.S. Free 2026 Juniper JN0-336 dumps are available on Google Drive shared by PrepAwayTest: <https://drive.google.com/open?id=1WfBuSxhSWi23Cd5siStJSg6CYUIUs-3B>

Our JN0-336 guide torrent is compiled by experts and approved by the experienced professionals. They are revised and updated according to the change of the syllabus and the latest development situation in the theory and practice. The language is easy to be understood to make any learners have no learning obstacles and our JN0-336 study questions are suitable for any learners. Our JN0-336 study questions are linked tightly with the exam papers in the past and conform to the popular trend in the industry. Our product convey you more important information with less amount of the questions and answers. Thus we can be sure that our JN0-336 guide torrent are of high quality and can help you pass the exam with high probability.

If you want to get Juniper certification and get hired immediately, you've come to the right place. PrepAwayTest offers you the best exam dump for Juniper certification i.e. actual JN0-336 brain dumps. With the guidance of no less than seasoned JN0-336 professionals, we have formulated updated actual questions for JN0-336 Certified exams, over the years. To keep our questions up to date, we constantly review and revise them to be at par with the latest JN0-336 syllabus for Juniper certification. With our customizable learning experience and self-assessment features of practice exam software for JN0-336 exams, you will be able to know your strengths and areas of improvement. We provide authentic braindumps for JN0-336 certification exams.

HOT JN0-336 Relevant Questions 100% Pass | Trustable Juniper Security, Specialist (JNCIS-SEC) Pass Test Pass for sure

Nowadays passing the JN0-336 test certification is extremely significant for you and can bring a lot of benefits to you. Passing the JN0-336 test certification does not only prove that you are competent in some area but also can help you enter in the big company and double your wage. And our JN0-336 Exam Questions are in good quality. As long as you study with our JN0-336 learning guide, you will find that the content is easily to understand and the displays are enjoyable.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q64-Q69):

NEW QUESTION # 64

Click the Exhibit button.

Which two statements describe the output shown in the exhibit? (Choose two.)

- A. Node 1 is controlling traffic for redundancy group 1.
- B. Redundancy group 1 was administratively failed over.
- C. Redundancy group 1 experienced an operational failure.
- D. Node 0 is controlling traffic for redundancy group 1.

Answer: A,D

Explanation:

The output indicates that node1 has a priority of 200 and is marked as "Primary," which means it is currently the active node controlling traffic for redundancy group 1. The "Primary" status designates that this node is handling the traffic for the specified redundancy group.

According to the exhibit, node0 is listed with a priority of 0 and is marked as "Secondary." This status indicates that node0 is currently not controlling traffic for redundancy group 1, serving instead in a standby role ready to take over should node1 fail or become unavailable.

NEW QUESTION # 65

When a security policy is modified, which statement is correct about the default behavior for active sessions allowed by that policy?

- **A. The active sessions allowed by the policy will continue unchanged.**
- B. Only policy changes that involve modification of the action field will cause the active sessions affected by the change to be dropped.
- C. Only policy changes that involve modification of the application will cause the active sessions affected by the change to be dropped.
- D. The active sessions allowed by the policy will be dropped.

Answer: A

Explanation:

When you modify a security policy on the SRX Series device, the default behavior is that the existing sessions that match the policy will continue unchanged. This means that the policy modification will only affect new sessions that are initiated after the change.

However, you can change this behavior by using the clear-policy-session command, which will clear all the sessions that match the modified policy and force them to re-evaluate the new policy. NEW QUESTION # 66

You are configuring logging for a security policy.

In this scenario, in which two situations would log entries be generated? (Choose two.)

- **A. at session initialization**
- B. every 10 minutes
- **C. at session close**
- D. every 60 seconds

Answer: A,C

Explanation:

Log entries would be generated in two situations: at session initialization and at session close. At session initialization, the log entry would include details about the connection, such as the source and destination IP addresses, the service being used, and the action taken by the security policy. At session close, the log entry would include details about the connection, such as the duration of the session, the bytes sent/received, and the action taken by the security policy. For more information, you can refer to the Juniper Security documentation at

https://www.juniper.net/documentation/en_US/junos/topics/reference/configuration-statement/security-log-co

NEW QUESTION # 67

You want to deploy a virtualized SRX in your environment.

In this scenario, why would you use a vSRX instead of a cSRX? (Choose two.)

- A. Only the vSRX provides NAT, IPS, and UTM services
- **B. Only the vSRX provides clustering.**
- **C. The vSRX supports Layer 2 and Layer 3 configurations.**
- D. The vSRX has faster boot times.

Answer: B,C

Explanation:

vSRX provides flexible networking capabilities which include support for both Layer 2 (data link) and Layer 3 (network) configurations. This allows it to handle a variety of routing and switching tasks within virtual environments. Clustering capability, which involves grouping multiple vSRX instances to operate as a single entity for redundancy and high availability, is a feature specific to vSRX. This is critical in environments where continuous uptime and resilience are required.

NEW QUESTION # 68

You are asked to ensure that if the session table on your SRX Series device gets close to exhausting its resources, that you enforce a more aggressive age-out of existing flows.

In this scenario, which two statements are correct? (Choose two.)

- A. The high-watermark configuration specifies the percentage of how much of the session table is left before disabling a more aggressive age-out timer.
- B. The early-ageout configuration specifies the timeout value, in seconds, that will be applied once the high-watermark value is met.
- C. The high-watermark configuration specifies the percentage of how much of the session table can be allocated before applying a more aggressive age-out timer
- D. The early-ageout configuration specifies the timeout value, in seconds, that will be applied once the low-watermark value is met.

Answer: B,C

Explanation:

The early-ageout configuration specifies the timeout value, in seconds, that will be applied once the high-watermark value is met. The high-watermark configuration specifies the percentage of how much of the session table can be allocated before applying a more aggressive age-out timer. This ensures that the session table does not become full and cause traffic issues, and also ensures that existing flows are aged out quickly when the table begins to get close to being full.

NEW QUESTION # 69

.....

If you purchasing our JN0-336 simulating questions, you will get a comfortable package services afforded by our considerate after-sales services. We respect your needs toward the useful JN0-336 practice materials by recommending our JN0-336 Guide preparations for you. Only in a few minutes, your ordered JN0-336 exam questions are sent to you, and whenever you have any question on the JN0-336 practice guide, you can contact with our service at 24/7.
