## 100% Pass-Rate Real UiPath-ADPv1 Exam Answers - Correct UiPath-ADPv1 Exam Tool Guarantee Purchasing Safety

This format is for candidates who do not have the time or energy to use a computer or laptop for preparation. UiPath UiPath-ADPv1 PDF file includes real UiPath UiPath-ADPv1 questions, and they can be easily printed and studied at any time. Itexamguide regularly updates its PDF file to ensure that its readers have access to the updated questions.

## UiPath (ADPv1) Automation Developer Professional Sample Questions (Q86-

Q91):

NEW QUESTION # 86

Given the following variables assignments:

What will the output of the following conditional be: `outputX = If(CInt(doubleX+Cdbl(intX)+Cdbl(stringX))> 38.30, 1, 0)`

- A. 0
- B. 1
- C. Compilation error
- D. Error during runtime

Answer: D

Explanation:

The conditional statement attempts to convert all variables to Double and then adds them up to compare against 38.30. However, the string "9.1" cannot be directly converted to a Double with CDb1 because it is not in a correct format that can be recognized as a number (it might be due to the fact that it's a string with a comma instead of a period for a decimal point, depending on the culture settings of the system). This will cause a runtime error during the execution of the conditional statement. References:

NEW QUESTION # 87

On 10/04/2023 five Queue Items were added to a queue. What is the appropriate processing sequence for Queue Items based on their properties?

Instructions: Drag the Queue Item found on the "Left" and drop on the correct Process Sequence found on the "Right".

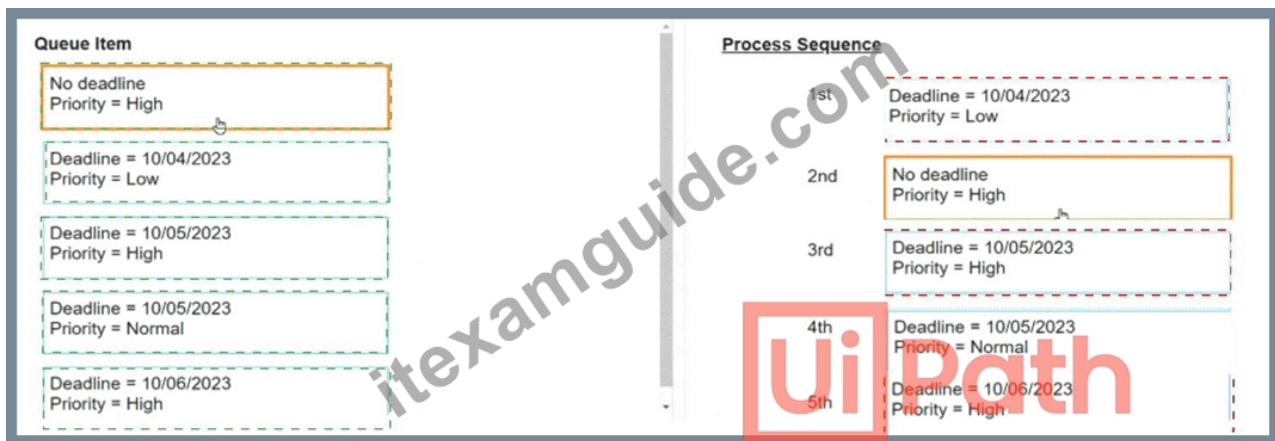

The interface shows a queue management system with the following items on the left:

- No deadline, Priority = High
- Deadline = 10/04/2023, Priority = Low
- Deadline = 10/05/2023, Priority = High
- Deadline = 10/05/2023, Priority = Normal
- Deadline = 10/06/2023, Priority = High

On the right, there is a "Process Sequence" column with five empty slots labeled 1st, 2nd, 3rd, 4th, and 5th.

Answer:

Explanation:

Explanation:

The processing sequence for queue items in UiPath Orchestrator is determined primarily by the deadline and priority of each item. Items with an earlier deadline are processed first. If multiple items have the same deadline, then priority determines the order: High, Normal, then Low.

Following this logic, the processing sequence would be:

1st: Deadline = 10/04/2023 Priority = Low Since this is the only item with the deadline of the current day (assuming today is 10/04/2023), it should be processed first regardless of its priority.

2nd: No deadline Priority = High Although this item has no deadline, its high priority places it next in the sequence after items with a deadline for the current day.

3rd: Deadline = 10/05/2023 Priority = High This item is next due to its combination of an imminent deadline and high priority.

4th: Deadline = 10/05/2023 Priority = Normal This item has the same deadline as the third but a lower priority, so it comes next.

5th: Deadline = 10/06/2023 Priority = High This item, while high priority, has the latest deadline, so it is processed last.

So the order would be:

1st: Deadline = 10/04/2023 Priority = Low 2nd: No deadline Priority = High 3rd: Deadline = 10/05/2023 Priority = High 4th: Deadline = 10/05/2023 Priority = Normal 5th: Deadline = 10/06/2023 Priority = High

### NEW QUESTION # 88

A developer is building a process that types data into input fields using the Hardware Events input method. Which property of the Type Into activity should be modified to reduce the pace at which the input string characters are typed into the fields?

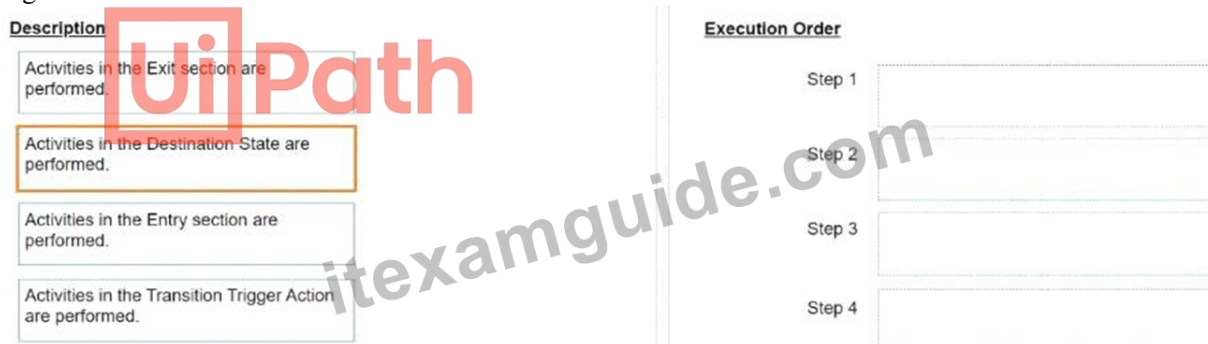

- A. Delay between keys
- B. Alter disabled element
- C. Delay before
- D. Delay after

Answer: A

### NEW QUESTION # 89

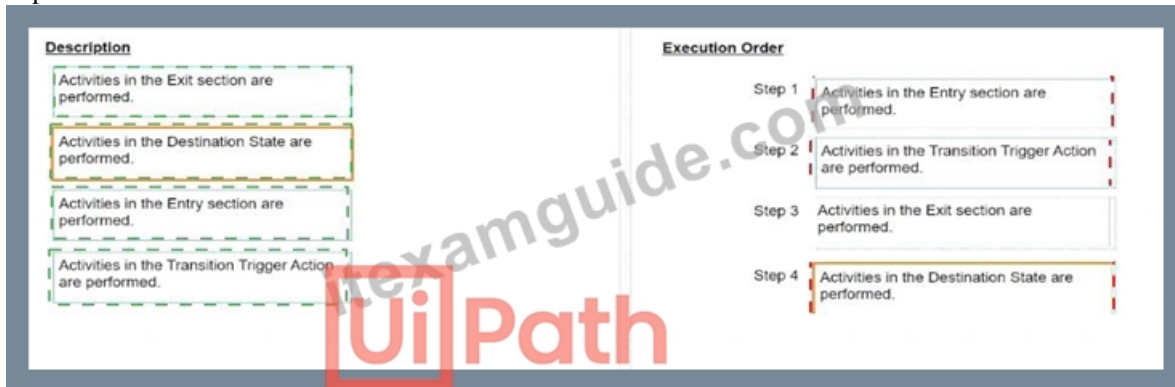

What is the correct execution order of the State activity sections?

instructions: Drag the Description found on the "Left" and drop on the correct Execution Order found on the "Right"

**Answer:**

**Explanation:**

#### **Execution Order**

#### **NEW QUESTION # 90**

Which part of a test case that is using BDD (Behavioral-Driven Development) template structure supports the Surround with mock feature?

- A. Setup
- B. Then
- C. When
- D. Given

**Answer: A**

**Explanation:**

In the BDD (Behavioral-Driven Development) template structure, the "Setup" part of a test case supports the Surround with mock feature. This section is used to set up the testing environment, including mock configurations.

#### **NEW QUESTION # 91**
