APMG-International New ISO-IEC-27001-Foundation Braindumps Files Exam Pass For Sure | ISO-IEC-27001-Foundation: ISO/IEC 27001 (2022) Foundation Exam

After the client pay successfully they could receive the mails about ISO-IEC-27001-Foundation guide questions our system sends by which you can download our test bank and use our ISO-IEC-27001-Foundation study materials in 5-10 minutes. The mail provides the links and after the client click on them the client can log in and gain the ISO-IEC-27001-Foundation Study Materials to learn. The procedures are simple and save clients' time. For the client the time is limited and very important and our ISO-IEC-27001-Foundation learning guide satisfies the client's needs to download and use our ISO-IEC-27001-Foundation practice engine immediately.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q14-Q19):

NEW QUESTION # 14

What activity is done first when preparing for an initial certification audit?

- A. Provide records to the Certification Body auditor for the Stage 2 audit
- **B. Agree the scope of the ISMS with the Certification Body auditor**
- C. Provide documents to the Certification Body auditor for the Stage 1 audit
- D. Provide evidence that nonconformities from an internal audit have been actioned

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance: Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body. ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage 2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first. Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

NEW QUESTION # 15

Which International Standard can be used to implement an integrated management system with ISO/IEC 27001?

- A. ISO 9001
- B. ISO/IEC 27003
- C. None of the above
- **D. ISO/IEC 27013**

Answer: D

Explanation:

ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach. While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.

NEW QUESTION # 16

Which statement about the conduct of audits is true?

- A. One of the focus areas for a surveillance audit is the output from internal audits and management reviews
- B. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- C. During Stage 1 of a certification audit, evidence is collected by observing activities
- D. Third party audits are conducted by a customer of the organization

Answer: A

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC 17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

NEW QUESTION # 17

When are the information security policies required to be reviewed, according to the Policies for information security control?

- A. According to a schedule defined by the Certification Body
- B. Annually
- C. Every six months
- D. At planned intervals and if significant changes occur

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This clearly identifies the review frequency requirement: planned intervals and whenever there are significant changes. Options A and B (six-monthly or annually) are not prescribed by ISO - timing is left to the organization. Option C is also wrong, since Certification Bodies do not dictate policy review schedules.

Therefore, the verified correct answer is D.

NEW QUESTION # 18

Which is a control title within Annex A of ISO/IEC 27001?

- A. Protection of documents
- B. Information security in supplier relationships
- C. Responsibilities and procedures
- D. Change control

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

In ISO/IEC 27002:2022, which provides control guidance for Annex A of ISO/IEC 27001, Clause 5.19 is titled: "Information security in supplier relationships." This control requires organizations to ensure that information security is addressed in supplier agreements and relationships. It is part of the Organizational Controls theme. The other options are not control titles in Annex A:

* "Responsibilities and procedures" (B) was used in older standards like ISO/IEC 27001:2005 but no longer exists.
