質問 # 50

Your company uses Dynamics 365.

When a service ticket is created, a technician visit to the customer is required. Technician visits should be consented to by a manager.

You need to ensure that the process is followed.

What should you use?

- A. Business rule
- **B. Approval flow**
- C. Button flow
- D. Scheduled flow

正解: B

解説:

You should use approval flows to manage the approval process. These are used for managing approval processes or automating the approval system, like approving an inventory request or approving a leave request.

You should not use schedule flows. Schedule flows are used when you want to perform an action on a specific time or duration, like after an hour or once a day.

You should not use button flows. Button flows are used to automate tasks with a click of a button.

Once a button is clicked, it will trigger an action.

You should not use business rules. These are used when you want to perform a series of tasks in a specific order.
