

使用有效的DAA-C01證照準備您的Snowflake DAA-C01考試，確定通過

此外，這些NewDumps DAA-C01考試題庫的部分內容現在是免費的：https://drive.google.com/open?id=1LmnVQbsaT5TpMQPhpdY4Wf-aSHrO_p9b

IT測試和認證在當今這個競爭激烈的世界變得比以往任何時候都更重要，這些都意味著一個與眾不同的世界的未來，Snowflake的DAA-C01考試將是你職業生涯中的里程碑，並可能開掘到新的機遇，但你如何能通過Snowflake的DAA-C01考試？別擔心，幫助就在眼前，有了NewDumps就不用害怕，NewDumps Snowflake的DAA-C01考試的試題及答案是考試準備的先鋒。

NewDumps Snowflake的DAA-C01認證的培訓工具包是由NewDumps的IT專家團隊設計和準備的，它的設計與當今瞬息萬變的IT市場緊密相連，NewDumps的訓練幫助你利用不斷發展的技術，提高解決問題的能力，並提高你的工作滿意度，我們NewDumps Snowflake的DAA-C01認證覆蓋率超過計畫的100%，只要你使用我們的試題及答案，我們保證你一次輕鬆的通過考試。

DAA-C01 PDF題庫，DAA-C01證照指南

NewDumps提供高品質的最佳學習資料，讓通過Snowflake DAA-C01考試從未如此快速、便宜、和簡單。有了最新詳細的題庫和答案，為您的DAA-C01考試做好充分的準備，我們將保證您在考試中取得成功。在購買前，您還可以下載我們提供的DAA-C01免費DEMO來試用，這是非常有效的學習資料。通過客戶的完全信任，我們為考生提供真實有效的訓練，幫助大家在第一次Snowflake DAA-C01考試中順利通過。

最新的 SnowPro Advanced DAA-C01 免費考試真題 (Q13-Q18):

問題 #13

When loading data into Snowflake using Snowsight, what functionalities does this method offer?
(Select all that apply)

- A. Support for only structured data formats

- B. Real-time data loading
- C. Streamlined data import from external/internal stages
- D. Batch data loading

答案: C,D

解題說明:

Snowsight supports batch data loading and streamlined data import from both external and internal stages.

問題 #14

You are designing a data warehouse in Snowflake for a large e-commerce company. One of the key tables is 'TRANSACTIONS', which stores all transaction data'. To ensure data integrity, you need to implement several constraints. Which of the following strategies demonstrate best practices for using constraints in Snowflake in this scenario (Choose two)?

- A. Avoid using NOT NULL constraints as they can negatively impact query performance.
- B. Defer constraint checking until the end of the entire data loading process to improve performance during initial data ingestion.
- C. Apply constraints as close as possible to the data source to catch errors early in the data pipeline.
- D. Use constraints primarily for informational purposes only, relying on ETL processes to enforce data integrity.
- E. Explicitly name all constraints for better maintainability and debugging.

答案: C,E

解題說明:

Option B and E are the correct choices. B) Explicitly naming constraints greatly improves maintainability and debugging as it allows you to easily identify which constraint is causing an issue. E) Applying constraints close to the data source helps catch data quality issues early, preventing bad data from propagating through the system. Deferring constraints (A) is generally not recommended as it can lead to data integrity issues. NOT NULL constraints (C) are crucial for data integrity and should be used where appropriate. While ETL processes are important, relying solely on them for data integrity without database-level constraints is risky.

問題 #15

You are preparing data for a machine learning model that predicts customer churn. You have a table 'CUSTOMER TRANSACTIONS' with columns 'CUSTOMER ID', 'TRANSACTION DATE', and 'TRANSACTION AMOUNT'. Your model requires a feature representing the recency of the customer's last transaction (days since last transaction) calculated as of today. Which of the following SQL snippets in Snowflake best achieves this, considering potential performance implications on a large dataset?

- A. ☐
- B. ☐
- C. ☐
- D. ☒
- E. ☐

答案: D

解題說明:

The best approach is E because it explicitly casts 'CURRENT _' to a DATE data type using 'CAST(CURRENT This ensures consistency and avoids potential issues if the 'TRANSACTION DATE' column is also of DATE data type. provides a date only, while provides date and time. Using 'CURRENT directly in 'DATEDIFF with a DATE field could lead to unexpected results due to the time component. Also other options are incorrect because 'GETDATE()' does not exist in snowflake, and because is redundant since CURRENT TIMESTAMP returns a timestamp already

問題 #16

You are designing a dimensional model for a subscription-based service. You have a 'FACT SUBSCRIPTIONS' table with columns like 'subscription_id', 'customer id', 'start date', 'end date', and 'subscription_amount'. The business wants to analyze monthly recurring revenue (MRR) and churn rate. You need to model the temporal aspect of subscriptions to accurately calculate these metrics. Select the TWO best approaches to model the time dimension to facilitate these calculations:

- A. Create a 'DIM MONTH' table with columns like 'month id', 'month start date', and 'month end date' and link the 'FACT SUBSCRIPTIONS' table to it based on the 'start_date' falling within the month.
- B. Create a 'DIM DATE' table and link 'FACT SUBSCRIPTIONS' to it using 'start_date' and 'end_date' columns.
- C. Create a snapshot fact table FACT SUBSCRIPTION SNAPSHOTS that captures the state of each subscription at the end of each month. This table would include 'subscription_id', 'customer_id', 'snapshot_date', 'is_active', and 'subscription_amount'.
- D. Create a 'DIM SUBSCRIPTION' table with 'subscription_id' as the primary key and store all subscription details there, avoiding the need for a fact table.
- E. Store 'start_date' and 'end_date' as VARCHAR columns in the 'FACT SUBSCRIPTIONS' table to avoid data type conversions.

答案：A,C

解題說明：

Creating a snapshot fact table (option B) allows for direct calculation of MRR and churn at a specific point in time. Analyzing subscription state at monthly intervals is helpful for these metrics. Creating a 'DIM MONTH' table (option E) simplifies grouping and aggregation of subscriptions by month. Option A (linking to 'DIM DATE' using both start and end dates) might be useful for other types of analysis, but not directly for MRR/churn calculations. Storing dates as VARCHAR (option C) is bad practice and will hinder performance. A dimension table for subscriptions (option D) won't capture the temporal changes necessary for these metrics.

問題 #17

When evaluating and selecting data for building dashboards, what factors should be considered for ensuring data relevance and usefulness? (Select all that apply)

- A. Filtering data based on irrelevant attributes
- B. Ignoring data complexities for simplicity in visualization
- C. Including all available data for comprehensive visualization
- D. Evaluating data based on business requirements

答案：A,D

解題說明：

To ensure relevant and useful dashboards, data must be evaluated based on business requirements and filtered for irrelevant attributes.

問題 #18

.....

有了Snowflake DAA-C01認證考試的證書就相當於人生有了個新的里程碑，工作將會有很大的提升，相信作為IT行業人士的每個人都很想擁有吧。很多人都在討論說這麼好的一個證書是很難通過的，實際上確實通過率是相當的低。沒有做過任何的努力當然是不容易通過的，畢竟通過Snowflake DAA-C01認證考試需要相當過硬的專業知識。我們NewDumps是可以為你提供通過Snowflake DAA-C01認證考試捷徑的網站。我們NewDumps有針對Snowflake DAA-C01認證考試的培訓工具，可以有效的確保你通過Snowflake DAA-C01認證考試，獲得Snowflake DAA-C01認證考試證書。而且我們還可以幫你節約很多時間，這樣一個可以花更少時間更少金錢就可以獲得如此有價值的證書的方案對你是非常划算的。

DAA-C01 PDF題庫：<https://www.newdumpsdf.com/DAA-C01-exam-new-dumps.html>

想要通過Snowflake的DAA-C01考試認證其實也沒有那麼難，關鍵在於你用什麼樣的方式方法，Snowflake DAA-C01證照工作中你能為老闆創造很大的價值，老闆當然在乎你的職位，包括薪水，Snowflake DAA-C01題庫資料不僅可靠性強，而且服務也很好，NewDumps DAA-C01 PDF題庫實行“無效即退還購買費用”承諾，我們的IT團隊致力於提供真實的Snowflake DAA-C01題庫問題和答案，所有購買我們DAA-C01題庫的客戶都將獲得長達一年的免費更新，確保考生有足夠的時間學習，如果你用過Snowflake DAA-C01考古題以後仍然沒有通過考試，我們會全額退款，我們提供給您最高品質的Snowflake DAA-C01題庫問題及答案，覆蓋面廣，可以幫助考生進行有效的考前學習。

不過這回倒是轉了性子，喲，這是什麼呀，想要通過Snowflake的DAA-C01考試認證其實也沒有那麼難，關鍵在於你用什麼樣的方式方法，工作中你能為老闆創造很大的價值，老闆當然在乎你的職位，包括薪水，Snowflake DAA-C01題庫資料不僅可靠性強，而且服務也很好。

值得信賴的DAA-C01證照擁有模擬真實考試環境與場境的軟件VCE版本 & 最新的DAA-C01 PDF題庫

NewDumps實行“無效即退還購買費用”承諾，我們的IT團隊致力於提供真實的Snowflake DAA-C01題庫問題和答案，所有購買我們DAA-C01題庫的客戶都將獲得長達一年的免費更新，確保考生有足夠的時間學習。
